Can it be that of all the billions of probably planets revolving around strange suns in far corners of the Universe ours is the only home of intelligent life? If life has managed to come into being elsewhere on some bizarre, grotesque world, just how strange and alien will that life be? What if its own planet is dying? It would need a new environment and the questing ships of its explorers would traverse the void. What if they find Earth and decide that it suits their purpose perfectly except for man? How would the battle be fought and who would win? [Five-Star Trails: Raleigh and Durham](#) Joshua Kinser, 2013-02-05. Five Star Trails: Raleigh and Durham is a guide to the best day hiking trails within a two hour drive of the urban areas of Raleigh and Durham. Raleigh is North Carolina's capital and an anchor for the state's famous Research Triangle that includes Durham and Chapel Hill. Amid this metropolitan complex that also embraces Cary, Apex and Wake Forest, home to more than 1.7 million people, the author leads readers to myriad places for scenic beauty, to sites of historic significance and to neighborhoods that showcase the charms of urban life. All of the routes stay true to the book's Five Star Trails title, based on the book series' rating system for scenery, trail condition, suitability for children, difficulty level and solitude. To be selected for the book, each trail must truly shine in one or more of those areas while at the same time all of the trails combine to offer diversity for a wide range of hikers. Thus this is the guidebook for a hiker seeking an arduous climb to a scenic overlook as much as it is for a weekend walker who wants an easy trail for his or her family. **Adobe Photoshop CS6 for Photographers** Martin Evening, 2012-08-06.
