Looking Around A Journey Through Architecture:

Looking Around Witold Rybczynski, 1993 An inspired engaging look at what architecture is and how we live and work in it by the acclaimed author of *Home* and *The Most Beautiful House in the World* Rybczynski discusses buildings like the Wexner Center for the Visual Arts demonstrates how architecture actually works and more

An Illustrated Guide to Tactical Diagramming Sid Heal, 2005-11 This book is not about construction although you will learn about building codes and practices It is not about tactics although the information gained by knowing a floor plan will undoubtedly affect them Instead this book is designed to provide a quick and simple method of confidently determining floor plans by using outside architectural features It assumes no knowledge of construction or tactics and is designed to be useful whether it is read cover to cover or occasionally referred to as a reference It provides time tested tried and true principles that any tactician can use to determine avenues of approach observation and fields of fire obstacles and cover or concealment not to mention where a suspect might be most vulnerable Using this essential tool for quick and clear comprehension of tactical diagramming even a novice tactical planner will learn to use windows doors vents and other clues to confidently determine interior features After reading this book it will be clear that the proverbial glass house is in the mind's eye

Designing a Place Called Home James Wentling, 2012-12-06 are often lined with garages in front of houses that are clearly more internalized in design some even taking on a fortress like appearance Today's new homes are technically superior in construction i.e. they are more energy efficient weather resistant and maintenance free However they also seem to lack the warmth and charm of prewar homes for which more construction dollars were spent on quality veneers but in features and other human scale details The postwar need for massive amounts of affordable housing for returning GIs helped to encourage building practices that could reduce on site labor and material costs in houses The accommodation of the automobile cost cutting movements and a variety of other trends caused a gradual decline in the human social and emotional qualities of postwar residential architecture This book will attempt to look at the issues and choices facing today's residential designers and home builders and ask How can we make our new houses and neighborhoods more responsive to humanistic needs particularly in light of constant pressures to keep housing costs down This question will generally be addressed by comparing historical designs to those of today to see if we might be able to reconsider some old fashioned ideas in new housing designs

William C. Brocklesby: A Connecticut Valley Architect in the Gilded Age Bill Ranauro, 2023-07-07 The late nineteenth century known commonly as the Gilded Age produced some of the most beautiful yet controversial architecture in America's history The great influencers of the period including Richard Upjohn Henry Hobson Richardson and Charles McKim each spread the gospel of his own architectural style The result was an eclectic mix of styles that some detested but that others embraced Caught in the struggle to find an architecture America could claim as its own Hartford Connecticut architect William Brocklesby carved out his own stylistic path In an age when the taste for ostentation and pretension was adopted by

many William Brocklesby produced some of the most dignified and beautiful architecture in the Connecticut Valley His churches libraries and theaters remain as artistic landmarks throughout western New England and his work at colleges from Hartford to Amherst Massachusetts make for some of the most picturesque college campuses in America This book serves as a companion to the author s earlier book *Asher Benjamin American Architect* Author Artist Taken together the two books provide a view of developments in American architecture from 1790 to 1910 The Architecture of William C Brocklesby Hailing from Hartford Connecticut architect William C Brocklesby 1847 1910 spent his career designing beautiful yet dignified churches libraries and public buildings throughout the Connecticut River Valley and western New England Working in an age when ostentation was the rule rather than the exception Brocklesby maintained a restrained hand in the application of ornament His design of Forbes Library in Northampton Massachusetts stands out as a monument to his ability as a design architect In addition William Brocklesby was among a handful of nineteenth century architects who made the Connecticut River Valley the birthplace of the prototypical American college campus Working largely within the vision of the famed American landscape architects Andrew Jackson Downing and Frederick Law Olmstead Brocklesby and others built campuses that were meant to mimic the traditional New England village Through the designs of the college buildings by Peabody and Stearns and William Brocklesby Smith College s architectural history traces the development of late nineteenth century styles National Register of Historic Places Inventory

Need to Know John G. Stackhouse Jr., 2014-05-30 How should a Christian think If a serious Christian wants to think seriously about a serious subject from considering how to vote in the next election to choosing a career from deciding among scientific theories to selecting a mate from weighing competing marketing proposals to discerning the best fitness plan what does he or she do This basic question is at the heart of a complex discourse epistemology A bold new statement of Christian epistemology Need to Know presents a comprehensive coherent and clear model of responsible Christian thinking Grounded in the best of the Christian theological tradition while being attentive to a surprising range of thinkers in the history of philosophy natural science social science and culture the book offers a scheme for drawing together experience tradition scholarship art and the Bible into a practical yet theoretically profound system of thinking about thinking John Stackhouse's fundamental idea is as simple as it is startling Since God calls human beings to do certain things in the world God can be relied upon to supply the knowledge necessary for human beings to do those things The classic Christian concept of vocation then supplies both the impetus and the assurance that faithful Christians can trust God to guide their thinking on a need to know basis
