Handbook of Occupational Health and Wellness Robert J. Gatchel, Izabela Z. Schultz, 2012-12-21 This book integrates the growing clinical research evidence related to the emerging transdisciplinary field of occupational health and wellness. It includes a wide range of important topics ranging from current conceptual approaches to health and wellness in the workplace to common problems in the workplace such as presenteeism absenteeism common illnesses job related burnout to prevention and intervention methods. It consists of five major parts. Part I Introduction and Overviews provides an overview and critical evaluation of the emerging conceptual models that are currently driving the clinical research and practices in the field. This serves as the initial platform to help better understand the subsequent topics to be discussed. Part II Major Occupational Symptoms and Disorders exposes the reader to the types of critical occupational health risks that have been well documented as well as the financial and productivity losses associated with them. In Part III Evaluation of Occupational Causes and Risks to Workers Health a comprehensive evaluation of these risks and causes of such occupational health threats is provided. This leads to Part IV Prevention and Intervention Methods which delineates methods to prevent or intervene with these potential occupational health issues. Part V Research Evaluation Diversity and Practice concludes the book with the review of epidemiological measurement diversity policy and practice issues with guidelines on changes that are needed to decrease the economic and health care impact of illnesses in the workplace and recommendations for future. All chapters provide a balance among theoretical models current best practice guidelines and evidence based documentation of such models and guidelines. The contributors were carefully selected for their unique knowledge as well as their ability to meaningfully present this information in a comprehensive manner. Handbook of Rehabilitation in Older Adults Robert J. Gatchel, Izabela Z. Schultz, Christopher T. Ray, 2019-02-27. This book discusses the state of the research and cutting edge practice with regard to chronic illnesses and rehabilitation in older adults. It emphasizes biopsychosocial and culturally appropriate rehabilitation approaches to reduce the degree of disability and maximize independence in the activities of daily living among the burgeoning aging population. Organized in four sections: Introduction and Overview; Major Illnesses and Problems in Aging Populations; Evaluation of Functional Rehabilitation Approaches for Aging Populations; and Future Clinical Research Needs. The book includes chapters on the graying of the West with implications for increased chronic illnesses and disabilities; a review of biopsychosocial rehabilitation approaches; important aging issues such as slips and falls, musculoskeletal pain, chronic disabling conditions such as cancer and cardiovascular disease; and work-related factors to maintain work engagement in older workers. The US Census Bureau projects that by the year 2030 about 20% of the US population will be 65 or older, contributing to the increased concern about healthcare and rehabilitation issues among older adults. This work will be of interest to healthcare, rehabilitation, vocational human resource, and disability management professionals, policy makers, as well as researchers in areas of aging, gerontology, chronic illness, disability, rehabilitation, social work, medicine, and psychology.
