Vritables manuels de construction, ces livres vous guideront dans la conception et le suivi de tous vos travaux de gros œuvre et de second œuvre. Des plans de maisons personnalisés. L'ouvrage présente différentes configurations de maisons individuelles de plain pied, combles aménagés partiellement ou totalement avec étage partiel ou complet pour vous aider à élaborer les plans avec la distribution intérieure des locaux. Il apporte une aide précieuse pour concrétiser l'aspect architectural afin de choisir l'implantation de la maison en rectangle, en L, en V, en U, avec avancée, etc. l'agencement des baies avec ou sans arcades suivant la configuration du terrain et l'exposition, les formes et les volumes des toits, couverture en tuiles ou en ardoises. Plans et idées pour construire Alain Hirselberger, 2011-07-07 Plus qu'un simple catalogue de plans de maisons, cet ouvrage guidera le futur propriétaire dans ses premiers choix effectués pour définir l'implantation, l'architecture et l'aménagement de sa future maison. Les exemples de plans permettent de valoriser au mieux son terrain tout en respectant les spécificités et les contraintes de sa parcelle. Faire construire une maison sur un terrain très relevé en effet d'un véritable défi. Quelle que soit la typologie du terrain, Alain Hirselberger propose des idées et des variantes architecturales qui intègrent les équipements producteurs d'énergie renouvelable ainsi qu'une grande diversité de plans de maisons tous conformes aux règles d'urbanisme en vigueur depuis la réforme du nouveau permis de construire du 1er octobre 2007. Une dizaine de projets en fin d'ouvrage sont adaptés et aménagés aux déplacements quotidiens des personnes handicapées circulant en fauteuil roulant. Une vue axonométrique ouvre chaque projet et permet de visualiser en trois dimensions la future maison avant d'entrer dans le détail des plans, cotés avec l'emplacement des ouvertures pour aménager son intérieur en fonction de son mode de vie familial. L'aspect général de la construction vue de l'extérieur est donné par le dessin de la façade principale. Chacune de ces réalisations est unique. Elles sont toutes étudiées selon les contraintes de terrain et d'urbanisme et les attentes des futurs propriétaires qui souhaitent faire construire des énergies renouvelables, accéder au handicap et nouveau permis de construire.

Maisons sur vide sanitaire Henri Renaud, 2011-07-07 L'ouvrage développe les procédés de réalisation des maisons individuelles sur vide sanitaire en fonction du terrain, à bâtir avec soit des fondations par semelles filantes ou des fondations par plots et longrines et poutres préfabriquées. L'isolation thermique en planchers bas est prise en compte par des entrevous isolants et des rupteurs thermiques de rive et d'about ou par une dalle ou une chape flottante sur panneaux isolants. Les caractéristiques techniques des planchers bas courants, poutrelles sont également détaillées et accompagnées des plans de pose pour la mise en œuvre. La réalisation du chantier.
