Poor Parents:

Poor Parents Bill Jordan, 2025-07-15 Originally published in 1974 this book provides a critique of official policy towards families with young children living on low incomes and looks in detail at some of the myths prevalent in the public debate both political and academic about the cycle of deprivation a phrase coined by Sir Keith Joseph British Politician 1918 1994 One of these myths is that it is possible to provide on a selective basis the best services for the poorest members of the community Another is that the poorest group is the one which is in most need of every kind of social service A third is that the more generous provision of social services to areas with high concentrations of poor families can reduce tensions and conflicts between social groups The author contends that these myths are being used to obscure the fact that the persistent force behind post war social policy is none other than the spirit of the Poor Law **Shattered Bonds** Dorothy

Roberts, 2009-02-23 The story of foster care in the United States is the story of the failure of the social safety net to aid poor largely black parents in their attempt to make a home for their children Shattered Bonds tells this story as no other book has before from the perspective of a prominent black female legal theoretician The current state of the child welfare system in America is a well known tragedy Thousands of children every year are removed from their parents homes often for little reason other than the endemic poverty that afflicts women and children more than any other group in the United States Dorothy Roberts an acclaimed legal scholar and social critic reveals the racial politics of child welfare in America through extensive legal research and original interviews with Chicago families in the foster care system She describes the racial imbalance in foster care the concentration of state intervention in certain neighborhoods the alarming percentages of children in substitute care the difficulty that poor and black families have in meeting state standards for regaining custody of children placed in foster care and the relationship between state supervision of families and continuing racial inequality

Population Control Mohammed Sharif, 2016-04-08 This book contends that high fertility is rational in that it achieves short term economic benefit and long term old age support for families Wider macroeconomic effects are not the concern of the individual family This means that the fertility choices of the poor are not a result of ignorance The objective of this book is to drive home the fact that it is poverty that is responsible for high fertility and that until the problem of poverty is effectively

dealt with the problem of high fertility will continue to persist The book concludes with a series of policy recommendations for the eradication of poverty

Sampson, 2004 Here author William A Sampson examines the role of the family in the school preparation process among poor Blacks and Latinos It is based upon the data collected during intense long term observations of 21 disadvantaged minority students and families in their homes within the same community The data suggests that the differences in performances are to a large degree a function of differences in the specific ways in which their parents most often the mother prepares them for the educational experience When discipline responsibility delayed gratification internal control the value of education and high self esteem are emphasized consistently in the home students tend to achieve When the home environment is quiet structured and orderly the students do well in school Most importantly when parents help their children with homework the students excel This book Frames the issues of the educational improvement Lays out the methodology Presents the data arranged by the academic performance of the students Presents a detailed analysis of the data and their impact upon both the debate over educational improvement and the theoretical issue of the link between race ethnicity social class and education Offers comparisons between poor Black families and poor Latino families Will be of interest to scholars in educational improvement public school teachers administrators policy makers and those concerned with social class and its ramifications Library of Congress Subject

What Money Can't Buy Susan E. Mayer, 1997 Children from poor families generally do a lot worse than children from affluent families They are more likely to develop behavior problems to score lower on standardized tests and to become adults in need of public assistance Susan Mayer asks whether income directly affects children's life chances as many experts believe or if the factors that cause parents to have low incomes also impede their children's life chances She explores the question of causation with remarkable ingenuity First she compares the value of income from different sources to determine for instance if a dollar from welfare is as valuable as a dollar from wages She then investigates whether parents income after an event such as teenage childbearing can predict that event If it can this suggests that income is a proxy for unmeasured characteristics that affect both income and the event Next she compares children living in states that pay high welfare benefits with children living in states with low benefits Finally she examines whether national income trends have the expected impact on children Regardless of the research technique the author finds that the effect of income on children's outcomes is smaller than many experts have thought Mayer then shows that the things families purchase as their income increases such as cars and restaurant meals seldom help children succeed On the other hand many of the things that do benefit children such as books and educational outings cost so little that their consumption depends on taste rather than income Money alone Mayer concludes does not buy either the material or the psychological well being that children require to succeed

Between the Social and the Spatial Katrien De Boyser, Jürgen Friedrichs, 2016-04-15 Since the beginning of the 1990s the gradual widening of scientific and policy debates on poverty from a narrow focus on income poverty to a more inclusive concept of social exclusion has made poverty research both more interesting and more complicated This transition to a more multidimensional conceptualization of poverty forms the background and starting point of this book Researchers studying the social and spatial dimensions of poverty have only started to challenge and explore the boundaries of each other's research perspectives and instruments This book brings together these different bodies of literature on the intersection of spatial and social exclusion for the first time by providing a state of the art review written by internationally recognized experts who critically reflect on the theoretical status of their research on social exclusion and on the implications this has for future research and policy making agendas Welfare in
