Gaither, Alma E. Cavazos-Gaither, 2008-01-08

Scientists and other keen observers of the natural world sometimes make or write a statement pertaining to scientific activity that is destined to live on beyond the brief period of time for which it was intended This book serves as a collection of these statements from great philosophers and thought influencers of science past and present It allows the reader quickly to find relevant quotations or citations Organized thematically and indexed alphabetically by author this work makes readily available an unprecedented collection of approximately 18 000 quotations related to a broad range of scientific topics

The Oxford and Cambridge Review, 1911 **Science In The Making** E. A. Davis, 1997-05-08 Volume Two of the Science in the Making Series covers the scientific advancements of the day between 1850 and 1900 as reported in the Philosophical Magazine This period culminated with the discovery of the electron Xrays and radioactivity This beautifully produced volume contains facsimiles of original papers by eminent scientists including Kelvin *Nature* Sir Norman Lockyer, 1894 The Life of Lord Kelvin Silvanus Phillips Thompson, 2005 An important component of a biography of any great scientist is that the biographer also have deep scientific knowledge This holds true for Silvanus P Thompson a scientist of distinction who authored this biography of Lord Kelvin Thompson was a Fellow of the Royal Society President of the Physical Society President of the Institution of Electrical Engineers and President of the Illuminating Engineering Society all within a six year span He also held the office of president for other scientific organizations This biography was begun in 1906 and published in 1910 It was re issued in 1976 by Chelsea Publishing The work is considered the definitive biography of Lord Kelvin It includes Kelvin's personal recollections and data His death in 1907 affected the project by extending the scope of the original work He left letters diaries and other documents that supplemented the existing information These documents would allow Thompson to create a much more comprehensive account of Kelvin's career than was previously possible From the Preface by Thompson It has been the author's desire to let documents and letters speak as far as possible for themselves

and if he has not always been able to avoid letting his own views tinge these pages he has at least endeavoured to avoid attributing to others that which is only his own Doubtless there are many of Lord Kelvin's former pupils who will find gaps in the presentation of his life and character as must needs be when the author can himself claim no nearer association than that of disciple But the disciple of one who was himself conspicuously faithful in little things must at least try to be faithful The peculiar and affectionate admiration amounting in some almost to worship which characterizes those who had the high privilege of that more intimate association spreads far beyond their circle to the disciple Let it be hoped that the affectionate admiration which he too shares may not have warped his judgment

Theory of Energy Harmony Stanislav Tregub, 2020-08-08 Current mainstream theories of physics the Standard Model of particle physics and the General Theory of Relativity are incompatible due to the different mechanisms that they offer as explanations of fundamental energy interactions This is considered the main problem for unifying them into a theory of everything Unfortunately the problems are not limited to this issue Both theories contain arbitrary variables and constants that do not have any physical meaning and are fitted to the results of experimental tests

every time the predictions fail Moreover the equations lead to infinities that are hidden by mathematical tricks to adjust the solutions to reality Many physicists consider this internal inconsistency to be a sign of the mathematical ingenuity of the models However the sad truth is that the descriptive and explanatory basis of the models is a muddle and the predictive power is zero Thus they are practically useless On top of this both postulate the existence of virtual entities responsible for observable physical interactions This means that the models have become metaphysical belief systems Some physicists dare to correctly call the situation the fall of theoretical physics as a science To see it rise we need an alternative path In the second volume the author continues to build the Theory of Energy Harmony based on the model of the universal mechanism proposed in the first part of the study This mechanism underlies all fundamental interactions and can be called a unifying physical principle The model does not use any virtual ghosts or arbitrary postulated parameters It is self consistent and adequate to reality It contains only empirically verifiable assumptions and predictions This is a paradigm shift that takes us back to physics
