Quality Assurance In Health Care Services:

An Introduction to Quality Assurance in Health Care Avedis Donabedian, 2002-12-26 Avedis Donabedian's name is synonymous with quality of medical care. He unraveled the mystery behind the concept by defining it in clear operational terms and provided detailed blueprints for both its measurement known as quality assessment and its improvement known as quality assurance. Many before him claimed that quality couldn't be defined in concrete objective terms. He demonstrated that quality is an attribute of a system which he called structure, a set of organized activities which he called process, and an outcome which results from both. In this book, Donabedian tells the full story of quality assessment and assurance in simple clear terms. He defines the meaning of quality, explicates its components, and provides clear and systematic guides to its assessment and enhancement. His style is lucid, succinct, systematic, and yet personal, almost conversational. Quality Assurance in Health Care Richard H. Egdahl, Paul M. Gertman, 1976 Quality Assurance in Health Care Services Ross H. Johnson, Raandi Schmidt, Judith Trumbo, 1992 **Quality Assurance of Health Services** Hannu Vuori, 1982 This report presents a policy and methodology oriented discussion of factors involved in developing and analyzing quality assurance in European health care. Data are taken from research literature and interviews with representatives of national health authorities, professional organizations, and research and educational institutions. The first chapter of this report discusses a suggested conceptual framework for a program of health care quality assurance derived from evaluative research and industrial quality control. The second, third, and fourth chapters deal with three major variables in the framework: environment, conceptualization, and methodology. Examples of different approaches to quality assurance are given, and sources of information and measurement instruments and criteria are examined. The fifth chapter presents conclusions concerning the trends and state of quality assurance in health care. A bibliography of 179 items is appended.
