Recent Advances in Optimal Structural Design Scott A. Burns, 2002-01-01 The field of structural optimization has experienced dramatic new developments in both computational techniques and applications over the past two decades. Recent Advances in Optimal Structural Design documents these new developments in computational methods and solution algorithms, the role of optimization during the various stages of structural design, and the stochastic nature of design in relation to structural optimization. Topics include methods for discrete variable structural optimization, decomposition methods in structural optimization, state of the art on the use of genetic algorithms in design of steel structures, conceptual design optimization of engineering structures, topology and geometry optimization of trusses and frames, evolutionary structural optimization, design and optimization of semi rigid framed structures, optimized performance based design for buildings, multi objective optimum design of seismic resistant structures, and reliability and cost oriented optimal bridge maintenance planning. Optimization of Structural and Mechanical Systems Jasbir S. Arora, 2007 This book provides a discussion of the general impact of WTO membership on both sides of the Taiwan Strait and addresses the political and economic impact on cross Strait relations of common membership. The book begins with an introduction which analyzes the state of cross Strait economic and political relations on the eve of dual accession to the WTO and briefly introduces the chapters which follow. The first chapter discusses the concessions made by both sides in their accession agreements and is followed by two chapters which describe the manner in which the Taiwan economy was reformed to achieve compliance as well as the specific

restrictive trade regime that was put into place to manage mainland trade The next two chapters deal with the implications of that restrictive trade regime for the Taiwan economy in Asia and with the nature of the interactions between the two sides within the WTO The final four chapters of the volume examine the impact of membership on four sectors of the economy finance agriculture electronics and automobiles There is a post script which briefly covers developments since the chapters were completed
