Graff, 2017-07-05 In his latest writings on the history of literacy and its importance for present understanding and future rethinking historian Harvey J Graff continues his critical revisions of many commonly held ideas about literacy The book speaks to central concerns about the place of literacy in modern and late modern culture and society and its complicated historical foundations Drawing on other aspects of his research Graff places the chapters that follow in the context of current thinking and major concerns about literacy and the development of both historical and interdisciplinary studies Special emphasis falls upon the usefulness of the literacy myth as an important subject for interdisciplinary study and understanding Critical stock taking of the field includes reflections on Graff's own research and writings of the last three decades and the relationships that connect interdisciplinary rethinking and the literacy myth The collection is noteworthy for its attention to Graff's reflections on his identification of the literacy myth and in developing LiteracyStudies OSU Ohio State University as a model for university wide interdisciplinary programs It also deals with ordinary concerns about literacy or illiteracy that are shared by academics and concerned citizens These nontechnical essays will speak to both academic and nonacademic audiences across disciplines and cultural orientations

Understanding Literacy in Its Historical Contexts Harvey J. Graff, Alison Mackinnon, Bengt Sandin, Ian Winchester, 2009-01-01 For nearly 30 years the work of the Swedish Lutheran pastor and pioneering social historian Egil Johansson astonished the international scholarly world Working initially with parish registers especially examination registers from northern Sweden Johansson discovered the extraordinary usefulness of these documents to detail the history of universal literacy in Sweden In this book a group of renowned scholars review and explore the possibilities for the wider circulation and broader application of central dimensions of the early literacy studies The active thrust and exceptional growth in historical literacy studies over the past two decades has propelled the subject into a new prominence that has come to be the legacy of Egil Johansson's path breaking discoveries Literacy in Sweden occurred well before any other European nation despite the fact that Sweden was industrialised about 100 years later than the European norm Egil Johansson also developed imaginative data analysis techniques that help historians around the world to better picture the complete human cast of the past With the help of numerous contributors Johansson founded a giant data base of church

records and other information which now can help the understanding of pre industrial society Johansson s work spans over many aspects of literacy and social history and their respective relation to religion and gender The contributors to this volume are influential academics in disciplines such as social history history of literacy and gender research and they work in all parts of the world Australia Great Britain Scandinavia as well North America

This Open access book provides a survey of the economic health and somatic progress of Baltic countries during the period 1918-2018 framed by the outline of the historical sociological theory of modern social restorations as originally conceived by the Austrian American comparative historian Robert A. Kann. The author reworks Kann's theory to analyse post-communist transformations in the Baltic region. The book argues that the purpose of modern social restorations is to make restoration societies safe against a recurrence of revolution. There were two waves of modern social restorations: post-Napoleonic and post-communist. Most post-Napoleonic restorations were brief because they failed to economically and socially outperform the pre-revolutionary and post-revolutionary systems. It considers Baltic restorations as laboratory cases of second-wave modern social restorations because they encompass a triple restoration of the nation, state, capitalism, and democracy. The book assesses the performance success of Baltic restorations by comparing economic and social progress of Baltic countries during the periods of original independence (1918-1940), foreign-imposed state socialism (1940-1990), and restored independence since 1990. It then elaborates the criteria to assess the ultimate performance success of these restorations by 2040 when restored Baltic states may endure longer than their ancestors in 1918-1940 and the complete foreign occupations era (1940-1990). The author, an expert in historical sociology, uses extensive historical statistical data in cross-time comparisons to develop his analysis and create future projections. This book is of wide interest to sociologists, social demographers, political scientists, and economists studying the Baltic region. This is an open access book. *Resources in Education*, 1999-10

Irrigation in Early States Stephanie Rost, 2022-06-30. Irrigation has long been of interest in the study of the past. Many early civilizations were located in river valleys and irrigation was of great economic importance for many early states because of the key role it played in producing an agricultural surplus which was the main source of wealth and the basis of political power for the elites who controlled it. Agricultural surplus was also necessary to maintain the very features of statehood such as urbanism, full-time labor specialization, state institutions, and status hierarchy. Yet the presence of large-scale or complex irrigation systems does not necessarily mean that they were under centralized control. While some early states organized the construction, operation, and maintenance of irrigation works and resolved conflicts related to water distribution, other early governments left most of the management to local farmers and controlled only the surplus. The cross-cultural studies in this volume reexamine the role of irrigation in early states. Ranging geographically from South America and the southwestern United States to North Africa, the Middle East, and Asia, they describe the physical attributes and environments of early irrigation systems, various methods for empirical investigation of ancient irrigation, and irrigation's economic, sociopolitical, and cosmological dimensions. Through their interdisciplinary perspectives, the authors, all experts in the field of irrigation studies, advance both methodological and theoretical approaches to understanding irrigation in early civilizations. *Diasporic Chinese Ventures* GREGOR BENTON, Hong Liu, 2004-07-31.
