Nella Larsen and Toni Morrison In a provocative revision of African American literary history Balshaw examines the creation of an urban aesthetic and explores the links between the engagement with the city and fictional reconstructions of racial identity and race writing Focusing on the material culture of the city the visual sense of the urban environment the class dynamics of urban culture and the crucial importance of consumerism this study presents a critically astute challenging and very welcome new approach to a much studied area of contemporary American fiction

Black Reconstruction in America W. E. B. Du Bois,2017-07-12 After four centuries of bondage the nineteenth century marked the long awaited release of millions of black slaves Subsequently these former slaves attempted to reconstruct the basis of American democracy W E B Du Bois one of the greatest intellectual leaders in United States history evaluates the twenty years of fateful history that followed the Civil War with special reference to the efforts and experiences of African Americans Du Bois s words best indicate the broader parameters of his work the attitude of any person toward this book will be distinctly influenced by his theories of the Negro race If he believes that the Negro in America and in general is an average and ordinary human being who under given environment develops like other human beings then he will read this story and judge it by the facts adduced The plight of the white working class throughout the world is directly traceable to American slavery on which modern commerce and industry was founded Du Bois argues Moreover the resulting color caste was adopted forwarded and approved by white labor and resulted in the subordination of colored labor throughout the world As a result the majority of the world s laborers became part of a system of industry that destroyed democracy and led to World War I and the Great Depression This book tells that story

Feminist Technical Communication Erin Clark, 2024-01-15 Feminist Technical

Communication introduces readers to technical communication methodology demonstrating how rhetorical feminist approaches are vital to the future of technical communication Using an intersectional and transcultural approach Erin Clark fuses the well documented surge of work in feminist technical communication throughout the 1990s with the larger social justice turn in the discipline The first book to situate feminisms and technical communication in relationship as the focal point Feminist Technical Communication traces the thread of feminisms through technical communication s connection to social justice studies Clark theorizes slow crisis a concept made readable to technical communicators by apparent feminisms that can help technical communicators readily recognize and address social justice problems Clark then applies this framework to the Deepwater Horizon Disaster an extended crisis that has been publicly framed by a traditional view of

efficiency that privileges economic impact Through rich description of apparent feminist information gathering techniques and a layered analysis this study offers application far beyond this single disaster making available new crisis response possibilities that consider the economy without eliding ecological and human health concerns Feminist Technical Communication offers a methodological approach to the systematic interrogation of power structures that operate on hidden misogynies This book is useful to technical communicators scholars of technical communication and rhetoric and readers interested in gender studies and public health and is an ideal text for graduate level seminars focused on feminisms social justice and cultural studies
