Lord Kelvins Machine:

Lord Kelvin's Machine James P. Blaylock, 2013-03-12 Within the magical gears of Lord Kelvin's incredible machine lies the secret of time The deadly Dr Ignacio Narbondo would murder to possess it and scientist and explorer Professor Langdon St Ives would do anything to use it For the doctor it means mastery of the world and for the professor it means saving his beloved wife from death A daring race against time begins *Lord Kelvin* Paul Tunbridge, 1992 Kelvin's great accomplishment was to bring together all the experimental scientists of his time into one co-operative association for investigators whose individual efforts were aided by their combined results expressed in a notation and described in language understood by everyone **Marine Engineer and Motorship Builder**, 1915 **Modern Machinery**, 1899

Everyday Chaos David Weinberger, 2019-04-23 Make More Future Artificial intelligence big data modern science and the internet are all revealing a fundamental truth The world is vastly more complex and unpredictable than we've allowed ourselves to see Now that technology is enabling us to take advantage of all the chaos it's revealing our understanding of how things happen is changing and with it our deepest strategies for predicting preparing for and managing our world This affects everything from how we approach our everyday lives to how we make moral decisions and how we run our businesses Take machine learning which makes better predictions about weather medical diagnoses and product performance than we do but often does so at the expense of our understanding of how it arrived at those predictions While this can be dangerous accepting it is also liberating for it enables us to harness the complexity of an immense amount of data around us We are also turning to strategies that avoid anticipating the future altogether such as A/B testing Minimum Viable Products open platforms and user-modifiable video games We even take for granted that a simple hashtag can organize unplanned leaderless movements such as MeToo Through stories from history business and technology philosopher and technologist David Weinberger finds the unifying truths lying below the surface of the tools we take for granted and a future in which our best strategy often requires holding back from anticipating and instead creating as many possibilities as we can The book's imperative for business and beyond is simple Make More Future The result is a world no longer focused on limitations but optimized for possibilities Memory Machines Belinda Barnet, 2013-07-15 This book explores the history of hypertext an influential concept that forms the underlying structure of the World Wide Web and innumerable software applications Barnet tells both the human and the technological story by weaving together contemporary literature and her exclusive interviews with those at the forefront of hypertext innovation tracing its evolutionary roots back to the analogue machine imagined by Vannevar Bush in 1945 *Re-inventing the Ship* Don Leggett, 2016-04-08 Ships have histories that are interwoven with the human fabric of the maritime world In the long nineteenth century these histories revolved around the re-invention of these once familiar objects in a period in which Britain became a major maritime power This multi-disciplinary volume deploys

different historical geographical cultural and literary perspectives to examine this transformation and to offer a series of interconnected considerations of maritime technology and culture in a period of significant and lasting change Its ten authors reveal the processes involved through the eyes and hands of a range of actors including naval architects dockyard workers commercial shipowners and Navy officers By locating the ship s re invention within the contexts of builders owners and users they illustrate the ways in which material elements as well as scientific artisan and seafaring ideas and practices were bound together in the construction of ships complex identities
