contributions from poets and fiction writers literary historians musicologists and historians of architecture agriculture and
women this volume implements some of the most innovative and intriguing approaches to the history and value of
regionalism as a category for investigation in the humanities In the volume s inaugural essay Annie Proulx discusses
landscapes in American fiction comments on how she constructs characters and interprets current literary trends Edward
Watts offers a theory of region that argues for comparisons of the United States to other former colonies of Great Britain
including New Zealand Australia and Canada Whether considering a writer s connection to region or the idea of place in
exploring what is meant by regionalism these essays uncover an enduring and evolving concept Although the approaches and
