Classroom Language Jill Richards, 2012 The acquisition and use of language are just as vital to children's learning when the newer classroom methods are being employed as ever they were when the more traditional approaches were being used Child centred learning has increasingly influenced language use and language work in the classroom mainly in the primary sector but also in the teaching of English and indirectly in the teaching of other subject areas including the sciences In this volume the author focuses mainly on the language of subject learning in the secondary schools She looks critically at some current notions concerned with language and learning and examines their translation into classroom practice She then develops a picture of the language demands made by other subject areas using collected language material and finally in the light of this evidence she attempts to identify the range of language in everyday use in schools goes on to draw conclusions and then makes recommendations

Verbal Deficit J. C. B. Gordon, 2018-09-14 Originally published in 1981

class This critique considers such theories especially in the form propounded by Bernstein primarily from a sociolinguistic viewpoint but with special attention to the historical and educational context behind the theories It claims that verbal deficit theories are not only unscientific and non linguistic but are educationally damaging as well and proposes instead a linguistic difference theory
