in our literary history. Rebelling against increased commercialism and the ebb of cosmopolitan society in early twentieth century America, they rejected the culture of what Ernest Hemingway called a place of broad lawns and narrow minds. Much of what we know about these iconic literary figures comes from their own published letters and essays revealing how adroitly they developed their own reputations by controlling the reception of their work. Surprisingly, the literary world has paid less attention to their autobiographies. In *Writing the Lost Generation*, Craig Monk unlocks a series of neglected texts while reinvigorating our reading of more familiar ones. Well-known autobiographies by Malcolm Cowley, Ernest Hemingway, and Gertrude Stein are joined here by works from a variety of lesser-known but still important expatriate American writers, including Sylvia Beach, Alfred Kreymborg, Samuel Putnam, and Harold Stearns. By bringing together the self-reflective works of the Lost Generation and probing the ways the writers portrayed themselves, Monk provides an exciting and comprehensive overview of modernist expatriates from the United States.

Generations of Lucky Devils and Unlucky Dogs Henk A. Becker, 2015-06-17

Silver grey manpower is a gold mine to society. One by one, the baby boom cohorts will reach the age of 65, starting from 2010. They are large cohorts, relatively well educated and healthy, with considerable pension and health care rights. In short, they are lucky devils. As a result of ageing cohorts that were born in 1985 onwards and that enter the labour market as from approximately 2010, will be required to pay many additional taxes during the course of their entire working life, spanning more than forty years. They are, in short, unlucky dogs. Redistribution of joys and burdens could trigger conflicts between generations. A better solution is to identify and deploy society's hidden resources. Taking this issue as a basis, the book in hand explores strategies that enable senior citizens and young people to give meaning to solidarity among generations. For a start, in 2012, as the European Year for Active Ageing, but also as part of Europe 2020, the European Commission's 2010-2020 strategy. With these two strategies, journalists and television producers will swing into action. In secondary and higher education, as well as in universities, more papers on life courses and patterns of generations will be written than ever before. Senior citizens' unions, but actually all social organizations, will organize lectures. Educated laymen will wish to go deeply into this issue.

Henk A. Becker, 1933, is Professor Emeritus of Sociology at Utrecht University in the Netherlands. He has worked on a research project focusing on generations since 1985.

engaged with the Africans His total picture approach model as the key to interpreting the African condition and in comprehensively addressing the challenges facing Africa offers a helpful and original tool in understanding Africa It helps to overcome the stereotypes prejudices and paternalism which non Africans apply in their reading of African history and their relation with the African reality With masterly skills a keen sense of history a balanced perspective and objectivity Ilo identifies the constraints to growth and innovation in Africa in terms of the low stocks in the human capital and cultural development He introduces a new concept in the interpretation of the African condition homelessness in terms of cultural and existential crises that confront Africans today His conclusion is that cultural and human development is the irreducible decimal in any proposal for the transformation of the continent that grassroots village based action should be preferred over bogus and unworkable national approaches to African development
