**Philosophy** Nikolay Milkov,2023-05-22 Hermann Lotze was a key figure in the philosophy of the second half of the 19th century influencing practically all leading philosophical schools of the late 19th and the early 20th century i the neo Kantians ii Brentano and his school of descriptive psychology iii the British idealists iv Husserl s phenomenology v Dilthey s philosophy of life vi Frege s new logic vii the early Cambridge analytic philosophy viii William James s pragmatism The book first presents the main ideas of Hermann Lotze s philosophy Part I and then traces his influence on the descriptive psychology of Franz Brentano and Carl Stumpf Part 2 and Cambridge analytic philosophy Part 3 In addition the book includes Bertrand Russell s conspectus of J E McTaggart s 1898 lectures on Lotze

## **The Volitional Theory of Causation** W. J.

Mander,2023-01-10 This book presents a history of the volitional theory of causation the philosophical proposal that volition or will of the same or broadly the same stamp as that which we experience in our own deliberate and voluntary doings should be taken as the basis for all causality Few today know much about the volitional theory of causation and even fewer have given it any serious attention But if current opinion regards this suggestion as an unusual one of minor importance the historical record shows otherwise revealing that it is a theory which has been proposed and developed again and again throughout the modern era Its obscurity is only a recent phenomenon Starting at the beginning of the Early Modern period and progressing right up the modern times the historical discussion takes in both supporters and critics as well as both famous and less well known figures to tell the story of a long running debate which contemporary history of philosophy has forgotten The principal figures discussed are Berkeley Hume Reid Maine de Biran Schopenhauer Mansel Mill Martineau Alexander Campbell Fraser Borden Parker Bowne and G F Stout although many other philosophers are also considered The book ends with a consider of the philosophical merits of the theory

*Forgotten Streams in the History of 19th-Century German Psychology* Carlos Cornejo,Cristián Hernández

Maturana,2025-05-10 The 19th century was a defining era for psychology rich with an intellectual diversity that shaped modern thought but which remains largely overlooked The roots of 20th century thought can be traced to the 19th century when a mechanical worldview took hold society grew increasingly secular modern urban metropolises emerged and evolutionist ideas reshaped the understanding of nature s developmental principles Throughout this century the natural sciences extended beyond their traditional limits influencing and reshaping the human moral and social sciences among which psychology was especially impacted as this transformation sparked profound debates on the very possibility of a science of the soul *Forgotten Streams in the History of 19th Century German Psychology* recovers the vibrant roots of psychology in empiricism romanticism idealism phenomenology among other streams of thought that explored consciousness the soul and the self before experimental psychology took center stage Unlike the standard view this book invites readers to

reconsider psychology's history revealing a complex landscape that questions the simplistic story of a linear path toward empiricism. Through profiles of significant yet forgotten thinkers, this work uncovers how their ideas contributed to discussions of the unconscious, mind-body duality, and inner experience. Written by leading scholars, each chapter offers a unique window into an intellectual movement that continues to influence debates in psychology, philosophy, and beyond. Essential for historians, psychologists, and anyone curious about psychology's deeper origins, *Forgotten Streams* is an indispensable reference that fills an important gap, enriching our understanding of psychology's complex and multifaceted development.

Lotze's system of philosophy Hermann Lotze, 1884      **Hermann Lotze** William R. Woodward, 2015-06-09

As a philosopher, psychologist, and physician, the German thinker Hermann Lotze (1817–81) defies classification. Working in the mid-nineteenth-century era of programmatic realism, he critically reviewed and rearranged theories and concepts in books on pathology, physiology, medical psychology, anthropology, history, aesthetics, metaphysics, logic, and religion. Leading anatomists and physiologists reworked his hypotheses about the central and autonomic nervous systems. Dozens of *fin de siècle* philosophical contemporaries emulated him, yet often without acknowledgment, precisely because he had made conjecture and refutation into a method. In spite of Lotze's status as a pivotal figure in nineteenth-century intellectual thought, no complete treatment of his work exists, and certainly no effort to take account of the feminist secondary literature. *Hermann Lotze: An Intellectual Biography* is the first full-length historical study of Lotze's intellectual origins, scientific community, institutional context, and worldwide reception.

**A Review of the Systems of Ethics Founded on the Theory of Evolution** Cora May Williams, 1893      The Husserlian Mind Hanne Jacobs, 2021-07-20

Edmund Husserl (1859–1938) is widely regarded as the principal founder of phenomenology, one of the most important movements in twentieth-century philosophy. His work inspired subsequent figures such as Martin Heidegger, his most renowned pupil, as well as Jean-Paul Sartre and Maurice Merleau-Ponty, all of whom engaged with and developed his insights in significant ways. His work on fundamental problems such as intentionality, consciousness, and subjectivity continues to animate philosophical research and argument. *The Husserlian Mind* is an outstanding reference source to the full range of Husserl's philosophy. Forty chapters by a team of international contributors are divided into seven clear parts covering the following areas: major works, phenomenological method, phenomenology of consciousness, epistemology, ethics, and social and political philosophy, philosophy of science, metaphysics. Contained in these sections are chapters on many of the key aspects of Husserl's thought, including intentionality, transcendental philosophy, reduction, perception, time, self, and subjectivity, personhood, logic, psychology, ontology, and idealism. Offering an unparalleled guide to the enormous range of his thought, *The Husserlian Mind* is essential reading for students and scholars of Husserl, phenomenology, and the history of twentieth-century philosophy. It will also be of interest to those in related fields in the humanities, social sciences, and psychology and the cognitive sciences.

**Genealogy of Values** Edward Andrew, 1995 Until the time of Karl Marx and John Stuart Mill philosophers generally held economics to be an integral element of moral philosophy These days the language of values moral aesthetic and cognitive dominates philosophic discourse even though contemporary philosophers rarely hold economics to be integral to moral philosophy Examining the thought of Friedrich Nietzsche and the art of Marcel Proust Edward Andrew provides the first sustained critical analysis of values discourse an analysis that deconstructs its content and its form **Dict Philos Terms**

**Germ-Eng V1** Phillip Herdina, 2013-01-11 Available on its own or as part of a two volume set this German English dictionary is the first comprehensive work in the field and an indispensable companion for students academics translators and linguists concerned with almost any area of philosophy Logic Martin Heidegger, 2010 Martin Heidegger's 1925/26 lectures on truth and time provided much of the basis for his work Being and Time This title is central to Heidegger's overall project of reinterpreting Western thought in terms of time and truth It shows the degree to which Aristotle underlies Heidegger's hermeneutical theory of meaning Kant, Lotze, and Ritschl, a critical examination, tr. by D.W. Simon Leonhard Stählin, 1889 **Heidegger's Concept of Truth** Daniel O. Dahlstrom, 2001 This major new study of Heidegger is the first to examine in detail the concept of existential truth that Heidegger developed in the 1920s Daniel Dahlstrom offers a critical focus on the genesis nature and viability of Heidegger's radical reconceptualization The book has several distinctive and innovative features First it is the only study that attempts to understand the logical dimension of Heidegger's thought in its historical context Second no other book length treatment explores the breadth and depth of Heidegger's confrontation with Husserl his erstwhile mentor Third the book demonstrates that Heidegger's deconstruction of Western thinking occurs on three interconnected fronts truth being and time Lotze's System of Philosophy: Logic in three books of thought, of investigation, and of Knowledge Hermann Lotze, 1884 The Dawn of Cognitive Science L. Albertazzi, 2013-04-17 Current debate in cognitive science from robotics to analysis of vision deals with problems like the perception of form the structure and formation of mental images and their modelling the ecological development of artificial intelligence and cognitive analysis of natural language It focuses in particular on the presence of a hierarchy of intellectual constructions in different formats of representation These diverse approaches which share a common assumption of the inner nature of representation call for a new epistemology even a new psychophysics based on a theory of reference which is intrinsically cognitive As a contribution to contemporary research the reading presents the core of theories developed in Central Europe between the late nineteenth and early twentieth centuries by philosophers physicists psychologists and semanticists who shared a dynamic approach and a pronounced concern with problems of interaction and dependence These theories offer innovative solutions to some of the epistemological and philosophical problems currently at the centre of debate like part whole theory of relations and conceptual and linguistic categorization *The Methodist Review Quarterly*, 1921 The Fragmentation of Being Kris McDaniel, 2017-07-28 The Fragmentation of Being offers answers to some of the most fundamental questions in

ontology There are many kinds of beings but are there also many kinds of being The world contains a variety of objects each of which let us provisionally assume exists but do some objects exist in different ways Do some objects enjoy more being or existence than other objects Are there different ways in which one object might enjoy more being than another Most contemporary metaphysicians would answer no to each of these questions So widespread is this consensus that the questions this book addressed are rarely even raised let alone explicitly answered But Kris McDaniel carefully examines a wide range of reasons for answering each of these questions with a yes In doing so he connects these questions with many important metaphysical topics including substance and accident time and persistence the nature of ontological categories possibility and necessity presence and absence persons and value ground and consequence and essence and accident In addition to discussing contemporary problems and theories McDaniel also discusses the ontological views of many important figures in the history of philosophy including Aquinas Aristotle Descartes Heidegger Husserl Kant Leibniz Meinong and many more

**Against Values** Philip J. Harold, 2022-11-01 Today's wholesale lack of trust in our institutions is a problem with deep roots in liberalism and it cannot be solved by tweaking a liberal paradigm in which different conceptions of the good create conflict that is resolved by a sovereign state without reference to a nonexclusive common good Ultimately the essence of liberalism is contained in the language of values which serve as wedges to divide people Philip J Harold takes this problem head on with a thoroughgoing survey reaching back to the early modern era to uncover the nature of liberalism's basic assumptions and diagnose its breakdown As opposed to traditional liberal denial of a good superior to individual interest Harold proposes a postliberal political philosophy able to understand the common good as friendship and social trust built up by loyalty While critiquing values language Harold also addresses the concept of sovereignty and the invention of morality as its supplement the inappropriate distinction between the empirical and the transcendental the true nature of the secular and the sacred the necessarily symbolic expression of the common good and the false conceptualization of religion and politics
