Design Activism Alastair Fuad-Luke, 2013-06-17 Design academics and practitioners are facing a multiplicity of challenges in a dynamic complex world moving faster than the current design paradigm which is largely tied to the values and imperatives of commercial enterprise Current education and practice need to evolve to ensure that the discipline of design meets sustainability drivers and equips students teachers and professionals for the near future New approaches methods and tools are urgently required as sustainability expands the context for design and what it means to be a designer Design activists who comprise a diverse range of designers teachers and other actors are setting new ambitions for design They seek to fundamentally challenge how where and when design can catalyse positive impacts to address sustainability They are also challenging who can utilise the power of the design process To date examination of contemporary and emergent design activism is poorly represented in the literature This book will provide a rigorous exploration of design activism that will re vitalise the design debate and provide a solid platform for students teachers design professionals and other disciplines interested in transformative design activism Design Activism provides a comprehensive study of contemporary and emergent design activism This activism has a dual aim to make positive impacts towards more sustainable ways of living and working and to challenge and reinvigorate design praxis It will collate synthesise and analyse design activist approaches processes methods tools and inspirational examples outcomes from disparate sources and in doing so will create a specific canon of work to illuminate contemporary design discourse Design Activism reveals the power of design for positive social and environmental change design with a central activist role in the sustainability challenge Inspired by past design activists and set against the context of global local tensions expressions of design activism are mapped The nature of contemporary design activism is explored from individual collective action to the infrastructure that supports it generating powerful participatory design approaches a diverse toolbox and inspirational outcomes This is design as a political and social act design to enable adaptive societal capacity for co futuring

Overgrown Julian Raxworthy, 2023-08-01 A call for landscape architects to leave the office and return to the garden Addressing one of the most repressed subjects in landscape architecture this book could only have been written by someone who is both an experienced gardener and a landscape architect With *Overgrown* Julian Raxworthy offers a watershed work in the tradition of Ian McHarg Anne Whiston Spirn Kevin Lynch and J B Jackson As a discipline landscape architecture has distanced itself from gardening and landscape architects take pains to distinguish themselves from gardeners or landscapers Landscape architects tend to imagine gardens from the office representing plants with drawings or other simulations whereas gardeners work in the dirt in real time planting pruning and maintaining In *Overgrown* Raxworthy calls for the integration of landscape architecture and gardening Each has something to offer the other Landscape architecture can design beautiful spaces and gardening can enhance and deepen the beauty of garden environments over time Growth says Raxworthy is the medium of garden development

landscape architects should leave the office and go into the garden in order to know growth in an organic nonsimulated way Raxworthy proposes a new practice for working with plant material that he terms the viridic after the tectonic in architecture from the Latin word for green with its associations of spring and growth He builds his argument for the viridic through six generously illustrated case studies of gardens that range from formal to informal approaches from a sixteenth century French Renaissance water garden to a Scottish poet scientist's marginal garden barely differentiated from nature Raxworthy argues that landscape architectural practice itself needs to be gardened brought back into the field He offers a Manifesto for the Viridic that casts designers and plants as vegetal partners in a renewed practice of landscape gardening

Indispensable Eyesores Mélanie van der Hoorn, 2009 The author presents a rich variety of undesired edifices in Germany Hungary Austria and Bosnia Herzegovina and investigates the different methods used to dispose of them This analysis continues with a reflection on the afterlife of unwanted buildings and concludes with a discussion on the life expectancy of buildings their multi sensory materiality and thingly agency From back cover

Urban Interstices: The Aesthetics and the Politics of the In-between Andrea Mubi Brighenti, 2016-02-11 Bringing together a team of international scholars with an interest in urban transformations spatial justice and territoriality this volume questions how the interstice is related to the emerging processes of partitioning enclave making and zoning showing how in between spaces are intimately related to larger flows networks territories and boundaries Illustrated with a range of case studies from places such as the US Quebec the UK Italy Gaza Iraq India and South east Asia the volume analyses the place and function of interstitial locales in both a disciplined urban space and a disordered space conceptualized through the notions of excess danger and threat Warning not to romanticize the interstice the book invites us to study it as not simply a place but also a set of phenomena events and social interactions How are interstices perceived and represented What is the politics of visibility that is applied to them How to capture their peculiar rhythms speeds and affects On the one hand interstices open up venues for informality improvisation challenge and bricolage playful as well as angry statements on the neoliberal city and enhanced urban inequalities On the other hand they also represent a crucial site of governance even governance by withdrawal and urban management where an array of techniques ranging from military urbanism to new forms of value extraction are experimented At the point of convergence of all these tensions interstices appear as veritable sites of transformation where social forces clash and mesh prefiguring our urban future The book interrogates these territories proposing new ways to explore the dynamics events and visibilities that define them

Design & Nature IV C. A. Brebbia, 2008 Design in engineering and science has often been inspired by nature This has been more evident in recent years after a period during which our civilization thought in terms of taming rather than working in harmony with nature The consequences of that approach are still with us and have resulted in a world increasingly homogenized lacking in biodiversity and with increased pollution Mankind has been slow to learn and even slower to apply the lessons that nature offers in spite of the urgency of

our predicament This book contains papers presented at the fourth International Conference on Comparing Design in Nature with Science and Engineering The emphasis of this Volume is on engineering and architectural applications and on biomimetics reflecting in some measure current interest in finding environmentally friendly solutions which also optimize the use of natural resources The contributions have been arranged into the following topics Biomimetics Shape and Form in Engineering Nature Nature and Architectural Design Natural Materials and Surfaces Complexity and Education

Landscape Ecology in the Dutch Context T.M. de Jong,J.N.M. Dekker,R. Posthoorn,2017-04-03 This book is the result of three symposia of the Dutch Society for Landscape Ecology Werkgemeenschap voor Landschapsecologisch Onderzoek about the Dutch National Ecological Network urban ecology and civil infrastructure The three topics among others show important contexts in which landscape ecologists do their research and apply their knowledge and skills The book focuses on urbanisation intensive land use and water management as characteristic features of the Netherlands and therefore presents an important view on landscape ecology in the Dutch context *Internationale Bibliographie der Rezensionen wissenschaftlicher Literatur* ,2003 *Bibliographic Guide to Art and Architecture* New York Public Library.
