miracle that any one man should have observed read and written down so much in a single lifetime Kenneth Clark Painter sculptor musician scientist architect engineer inventor perhaps no other figure so fully embodies the Western Ideal of Renaissance man as Leonardo da Vinci Leonardo was not content however to master an artistic technique or record the mechanics of a device he was driven by an insatiable curiosity to understand why His writings interests and musings are uniformly characterized by an incisive probing questioning mind It was with this piercing intellectual scrutiny and detailed scientific thoroughness that Leonardo undertook the study of the human body This exceptional volume reproduces more than 1 200 of Leonardo s anatomical drawings on 215 clearly printed black and white plates The drawings have been arranged in chronological sequence to display Leonardo s development and growth as an anatomist Leonardo s text which accompanies the drawings sometimes explanatory sometimes autobiographical and anecdotal has been translated into English by the distinguished medical professors Drs O Malley and Saunders In their fascinating biographical introduction the authors

evaluate Leonardo's position in the historical development of anatomy and anatomical illustration. Each plate is accompanied by explanatory notes and an evaluation of the individual plate and an indication of its relationship to the work as a whole. While notable for their extraordinary beauty and precision, Leonardo's anatomical drawings were also far in advance of all contemporary work and scientifically the equal of anything that appeared well into the seventeenth century. Unlike most of his predecessors and contemporaries, Leonardo took nothing on trust and had faith only in his own observations and experiments. In anatomy as in his other investigations, Leonardo's great distinction is the truly scientific nature of his methods. Herein then are over 1 200 of Leonardo's anatomical illustrations organized into eight major areas of study: Osteological System, Myological System, Comparative Anatomy, Nervous System, Respiratory System, Alimentary System, Genito Urinary System, and Embryology. Artists, illustrators, physicians, students, teachers, scientists, and appreciators of Leonardo's extraordinary genius will find in these 1 200 drawings the perfect union of art and science. Carefully detailed and accurate in their data, beautiful and vibrant in their technique, they remain today, nearly five centuries later, the finest anatomical drawings ever made.

NEW TESTAMENT CONTEXTUAL COMMENTARY, Dr. Robert R. Seyda, 2024-03-26.

The Apostle John tells his readers he has an important message to tell them. It is about a person who was already there before the beginning of the world. We heard him speak. We've seen Him with our own eyes. We watched Him and we touched Him. He is the Word that gives us life with God. This is the message: God is completely good and pure. He is like light. There is nothing dark about Him. Amazingly, John tells us that one of the things Jesus wanted us to understand is that by loving others, we love God. Yes, we do make mistakes and so do other believers, but we are not to hold that against them because just as we were given forgiveness by

God's mercy and grace since we are in union with His Son so can they. What we are not to do is claim access to this privilege but then live like those in the world. Our goal is not just life but eternal life. After all we are God's children and no child of God keeps on sinning after they are born again through Jesus the Anointed One.
