Neuronal Calcium Sensor Proteins Pavel P. Philippov, Karl-Wilhelm Koch, 2006 Calcium signalling is an astonishing example how a simple caption can trigger and regulate an enormous variety of cellular and physiological responses Ca^{2+} signalling routes very often involve Ca^{2+} binding proteins that sense changes in intracellular Ca^{2+} and trigger cellular responses by regulating specific targets One fascinating group among these Ca^{2+} sensors are the neuronal calcium sensor NCS proteins named for their localisation in neuronal tissue although there are reports of their expression in non neuronal tissues as well While recent excellent reviews have covered key aspects of this protein group the field expanded in recent years making it more and more difficult to represent every facet of this ongoing research endeavour This book is intended to represent properties of NCS proteins
