United States - Africa Security Relations Kelechi A. Kalu,George Klay Kieh,2013-11-07 United States Africa relations have experienced four major cycles The first cycle was during the Cold War 1960 1990 During this period the U S developed a one sided relationship with various African states in which the latter served as foot soldiers for the U S in its competition with the Soviet Union for global domination Among other things the various client African states provided the U S with access to airfields deep water ports and sites for the establishment of various intelligence gathering facilities In addition the U S used various groups like UNITA

led by Jonas Savimbi in Angola to undermine and fight pro Soviet regimes on the continent The second cycle of the relationship covered the period 1991-1998 During this time the U S scaled down its security activities in Africa The major reason was that with the end of the Cold War Africa with few exceptions like Egypt was no longer a major front for the promotion of U S Security interests The third cycle commenced in 1998 and ended in 2001 This period was characterized by the U S search for an approach to frame its security relations with Africa In this vein the U S undertook various military security initiatives The fourth cycle began after the 9/11 terrorist attacks against the American homeland Since then the U S has expanded the scope of its security relations with Africa as reflected in the establishment of various initiatives and programs At the core is the prosecution of the American war on terror Against this backdrop this book examines some of the major dimensions of the U S security relations with Africa including American security interests on the continent the war on terror AFRICOM and military cooperation Using the book's integrative theoretical framework each of the chapters in the volume examines the various factors that shape the issue of focus

PostNegritude: Visual and Literary Culture Mark A. Reid, 1997-03-06 In the 1960s and 1970s the civil rights movement and other national and cultural movements fractured dominant paradigms of American identity and demanded a reformulation of American values and norms This book borrows the moral, ethical and political purposes of these movements to show how film, literature, photography and television news broadcasts construct essentialist myths about race, gender, sexuality and nation It also examines how some visual and literary works and public reactions challenge these essentialist myths by exploring racial, sexual and national anxieties
