A Quantitative Analysis of Regional Well-Being Vani Kant Borooah, 2020-10-14 Using data from the World Values Survey this book sheds light on the link between happiness and the social group to which one belongs The work is based on a rigorous statistical analysis of differences in the probability of happiness and life satisfaction between the predominant social group and subordinate groups The cases of India and South Africa receive deep attention in dedicated chapters on cast and race with other chapters considering issues such as cultural bias religion patriarchy and gender An additional chapter offers a global perspective On top of this the longitudinal nature of the data facilitates an examination of how world happiness has evolved between 1994 and 2014 This book will be a valuable reference for advanced students scholars and policymakers involved in development economics well being development geography and sociology

Hooked on Growth Douglas E. Booth, 2004-05-03 Challenging conventional wisdom on the virtues of a consumer economy this provocative book explores the nexus between growth and environment sustainability The miracle of the modern affluent economy is an ever swelling cornucopia of consumer goods leading to expanding consumption as the essential underpinning of economic growth in more and more parts of the globe Douglas Booth contends that expansion in this form amounts to an addiction Are we as a society hooked on economic growth of a kind that carries with it significant threats to the natural environment A critical dilemma for the modern economy is that growth is required to prevent the pain of unemployment As growth continues the environment declines but if growth slows unemployment rises We seem trapped in a spiraling predicament like that of the addict This accessible work explores whether getting unhooked from growth to meet the needs of the environment is possible Giving the environment priority over growth may seem to some like a radical idea yet the author argues that it can be accomplished using marketable emissions allowances transferable development rights and other tools popular with conventional economists It can also be achieved by creating more interesting and environmentally friendly urban landscapes less beholden to the automobile The key problem a less growth oriented society will face is ensuring that everyone who wants employment can find it This will require something that many people wish for anyway a shorter workweek More leisure a higher quality

environment and more attractive cities and towns are the potential rewards of a less consumption oriented society Yet powerful economic interests that benefit from a high growth economy are arrayed against changes in the status quo Under what circumstances can the power of special interests be overcome in the name of environmental conservation This is the author's critical final question as he offers a clear path to a sustainable economic and environmental future

Consumer Capitalism Gunnar Trumbull, 2018-07-05 The unfettered marketplace in which uncertainty rules and the admonition caveat emptor let the buyer beware dictates each consumer decision has today virtually disappeared Consumers have become the focus of intensive economic policymaking designed to protect them from the risks and disappointments of the market Today arguably no other economic actor in the advanced industrial countries not the investor not the worker not the welfare recipient enjoys a more thorough set of legal and institutional protections than the modern consumer when he or she enters the corner store from the Introduction Gunnar Trumbull investigates the origins of national systems of consumer protection in France and Germany where in the early 1970s consumer groups and producers organized to advance their own ideas about the identity and interests of the affluent consumer Through a comparison of eight areas of policy product liability law product safety standards and recall misleading advertising comparative product tests product labeling quality standards consumer contracts and pricing Trumbull shows that different conceptions of the consumer interest emerged in the two countries The result was the development of distinctive national consumption regimes which have in turn influenced the market strategies of domestic producers Trumbull's findings help to clarify distinctive national approaches to recent product crises including cases of BSE and genetically modified foods His research suggests that in the age of consumer capitalism national competitiveness may hinge not only on endowments of labor and capital but also on the institutional forms of national consumption

Geographies of the Super-rich Iain Hay, 2013-01-01 Globalization it seems has propelled the world's uber wealthy to new heights of power and money with tremendous repercussions for the other 99.9 percent of us At a time when neoliberalism has propelled the world into a new Gilded Age with rising inequality everywhere an aggressive class war being waged by the wealthy and billionaires inserting themselves bluntly into the political arena understanding the behavior and spatiality of the super rich has acquired a pressing urgency This volume offers a richly textured suite of essays concerning how the super rich have restructured local places transforming landscapes as varied as London and Kentucky Ireland and St Barts as well as domains as varied as art thoroughbred horses and housing Barney Warf University of Kansas US The world's super rich made up of just 11 million people have access to about US 42.0 trillion of wealth These are people who each have a spare million of liquid wealth Their wealth is roughly equal to two thirds of global GDP They own most of everything As the editor of this book states library shelves and the pages of journals remain largely devoid of geographical work on the super rich a startling lacuna this volume sets out to fill The super rich now own most of the planet During the last year their share fell slightly Times may be changing Now is the time to begin to study the super rich in detail especially if you are worried

about where all the wealth has gone Danny Dorling University of Sheffield UK This timely and path breaking book brings together a group of distinguished and emerging international scholars to critically consider the geographical implications of the world's super rich a privileged yet remarkably overlooked group Emerging from this unique collection is an enlightening picture of the influence of the super rich over a diverse range of affairs extending from the shape of urban and rural landscapes to the future of art history By concentrating on those at the apex of the economic pyramid this book provides valuable insights to the institutions practices and cultural values of our society as well as allowing us a more comprehensive view of the consequences of global capitalism Presenting case studies from across the globe from Singapore to St Barts London to Lexington the spatial and cultural span of the book is wide ranging and diverse This truly unique book will prove a fascinating read for academics researchers and students in the fields of geography regional and urban studies sociology political science and development studies

Kardes, 2018-12-07 This Handbook contains a unique collection of chapters written by the world's leading researchers in the dynamic field of consumer psychology Although these researchers are housed in different academic departments ie marketing psychology advertising communications all have the common goal of attaining a better scientific understanding of cognitive affective and behavioral responses to products and services the marketing of these products and services and societal and ethical concerns associated with marketing processes Consumer psychology is a discipline at the interface of marketing advertising and psychology The research in this area focuses on fundamental psychological processes as well as on issues associated with the use of theoretical principles in applied contexts The Handbook presents state of the art research as well as providing a place for authors to put forward suggestions for future research and practice The Handbook is most appropriate for graduate level courses in marketing psychology communications consumer behavior and advertising

Commonwealth and Covenant Marcia Pally, 2016-03-02 In Commonwealth and Covenant Marcia Pally argues that in order to address current socioeconomic problems we need not more economic formulas but rather a better understanding of how the world is set up an ontology of how we and the world work Without this good proposals that arise lack political will and go unimplemented Pally describes our basic setup as separability amid situatedness or distinction amid relation Though we are all unique individuals we become our singular selves through our relations and responsibilities to the people and environments around us Pally argues that our culture's overemphasis on separability individualism run amok results in greed adversarial and deceitful political discourse and chicanery resource grabbing broken relationships and anomie Maintaining that separability and situatedness can and must be considered together in public policy Pally draws on intellectual history philosophy and especially historic Christian and Jewish theologies of relationality to construct a new framework for addressing present economic and political ills

Reintroducing Macroeconomics Steven Mark Cohn, 2015-01-28 This lively introduction to heterodox economics provides a balanced critique of the standard introductory macroeconomic curriculum In

clear and accessible prose it explains many of the key principles that underlie a variety of alternative theoretical perspectives including institutionalist economics radical economics Post Keynesian economics feminist economics ecological economics Marxist economics social economics and socioeconomics Because the book's structure parallels the chapters and subject matter presented in a typical introductory macroeconomics textbook *Reintroducing Macroeconomics* provides readers with a running commentary on the standard approach while simultaneously introducing them to a broader range of ideas about the causes and appropriate policy responses to a wide range of common economic problems Although designed primarily as a companion volume for students in introductory economics courses the book can also be used effectively for more targeted applications that highlight a particular economic issue or approach It will be of particular interest to students in related disciplines such as American Studies anthropology black studies environmental studies gender studies history political science and sociology who may be required to take introductory economics classes and who are interested in gaining an alternative perspective By demonstrating the vitality and common ground underlying a broad spectrum of heterodox approaches *Reintroducing Macroeconomics* brings alternative perspectives into the classroom in an accessible way that empowers students to think about the economy in new and exciting ways The text includes end of chapter study questions as well as a detailed note to instructors

Modern Developments in Behavioral Economics John Malcolm Dowling, Chin-Fang Yap, 2007 This book examines the field of behavioral economics and provides insights into the following questions Does utility bring happiness How do emotions and personal perspectives color our economic decisions How do altruism trust fairness and justice come into play in game theory Why are some organizations so successful in implementing their objectives Can advances in neuroeconomics unlock the secrets of how decisions are made The book looks at decision making and behavior from the point of view of i individual behavior and choice ii group and interactive choice and iii collective choices and decision making In particular it covers the following aspects instances when bounded rationality leads to decisions inconsistent with standard economic assumptions risk and the processes by which investors and consumers make decisions altruistic and cooperative behavior as alternatives to competition game theory as a way to explore motives of cooperation versus competition the determinants of happiness and the relationship between utility and well being the concept of social capital including motivations for charity and being a responsible citizen how trust and fairness relate to economic actions and the motivation to cooperate rather than compete behavior such as crime corruption and bribery from ethical social and economic viewpoints and finally the decision making process of collective choice and how societies develop rules for governing themselves This is the first book to bridge economics psychology sociology and political sciences and explain the nuanced subtleties of decision making

The World and U2 Alan McPherson, 2015-06-04 The Irish rock band U2 and especially its frontman Bono are among the most effective activists ever U2 has convinced wealthy governments to forgive tens of billions of dollars in loans while spreading its activist messages to billions of people helping save millions of lives So

how did four boys from one of the poorest countries in the West achieve this Who and what influenced them What strategies did they use to succeed as much as they did as activists and how did those strategies change over time In particular how did lead singer Bono make the leap into superstar lobbying And with so much attention on him how has he handled critics who have taken to task his work on behalf of developing countries In *The World and U2 One Band's Remaking of Global Activism* Alan McPherson trains a historian's eye on the evolution and influence of the band's activism from its formation in 1976 to its most recent album and concert tour Throughout its nearly four decades the band has held up a mirror to the increasing selfishness in the world while at the same time working to fill the void left by those who have abandoned the world's poor to their plight From raising awareness about war and human rights in the 1980s to engaging in direct action in the 1990s to moving mountains of cash for the planet's poorest in the twenty first century the band and especially Bono have both raised the bar and set the example for other celebrity activists But it is also a success that has brought a greater scrutiny to bear on U2's activism and initiated a healthy debate about the merits of Western development aid *The World and U2 One Band's Remaking of Global Activism* tells this story of U2's successful storming of the world's philanthropic stage It will enchant the band's fans engage its critics and offer lessons and warnings to activists seeking to change things for the better

ethnographic research in a range of hotel jobs including concierge bellperson and housekeeper Sherman gives an insightful analysis of what exactly luxury service consists of how managers organize its production and how workers and guests negotiate the inequality between them She finds that workers employ a variety of practices to assert a powerful sense of self including playing games comparing themselves to other workers and guests and forming meaningful and reciprocal relations with guests Through their contact with hotel staff guests learn how to behave in the luxury environment and come to see themselves as deserving of luxury consumption These practices Sherman argues help make class inequality seem normal something to be taken for granted Throughout Class Acts sheds new light on the complex relationship between class and service work an increasingly relevant topic in light of the growing economic inequality in the United States that underlies luxury consumption
