Lysenkoism In China Proceeding Of The 1956 Qingdao Genetics Conference:

Lysenkoism in China Laurence Schneider, 1987 Adopting a comparative perspective this book traces the social political economic and cultural conditions under which environmental movements have emerged and assesses the transformative capacities of these movements

China and Albert Einstein Danian HU, Danian Hu, 2009-06-30 China and Albert Einstein is the first extensive study in English or Chinese of China's reception of the celebrated physicist and his theory of relativity Tracing the influence of Jesuit missionaries in the seventeenth century and Western missionaries and educators in the nineteenth and twentieth centuries as they introduced key concepts of Western physical science and paved the way for Einstein's radical new ideas Danian Hu shows us that Chinese receptivity was fostered by the trickle of Chinese students sent abroad for study beginning in the mid nineteenth century and by the openness of the May Fourth Movement 1916 1923 In a series of biographical studies of Chinese physicists Hu describes the Chinese assimilation of relativity and explains how Chinese physicists offered arguments and theories of their own Hu's account concludes with the troubling story of the fate of foreign ideas such as Einstein's in the Chinese Cultural Revolution 1966 1976 when the theory of relativity was denigrated along with Einstein's ideas on democracy and world peace China and Albert Einstein is an important contribution to Einstein studies and a landmark work in the history of Chinese science

Contested Environmentalisms Cheng Li, 2025-01-21 For decades tree planting and forestry have been pivotal to Chinese environmentalism During the Mao era while forests were razed to fuel rapid increases in industrial production the Greening the Motherland campaign promoted conservationist tree planting nationwide Contested Environmentalisms explores the seemingly contradictory rhetoric and desires of Chinese conservation from the early twentieth century through to the present Drawing on literary cinematic scientific archival and digital media sources Cheng Li investigates the emergence evolution and devolution of Chinese conservationist ideas Combining literary historical and environmental studies approaches he shows that these ideas acquired their value and assumed their power precisely because of their malleability and adaptability Li historicizes authoritarian environmentalism and probes the global local dynamics underlying conservationist ideas that energize environmental impulses in China Examining ethnic borderlands the Beijing political center and China's growth on the world stage this book demonstrates the strength of Chinese environmentalism to adapt and survive through tumultuous change lies in what seems to be a weakness its inconsistency and contestation

Lysenkoism in China Laurence Schneider, 1986 Biology and Revolution in Twentieth-Century China Laurence Schneider, 2005-10 In this first comprehensive analysis of biological science in modern China Laurence Schneider traces its troubled development from the 1920s across the 1949 boundary and into contemporary post socialist China Schneider uses his detailed portrayals of influential scientists and key education and research institutions to explore both internal and external forces at work in scientific development The author examines the largely U S sources of its technical development and the subsequent quality of its research and educational accomplishments At the

same time he firmly grounds these in the context of China's national economic and social revolutions. These upheavals have been the source of periodic obsessions to use science to regulate nature to manage foreign influence on science and to control scientists. The author argues that populist mass science was Mao's solution to problems of control especially in the 1950s when Soviet Lysenkoism was granted the power in China to monopolize biology and ban genetics. This book provides the only detailed study of Lysenkoism in China linking its ascendance to the Great Leap Forward and the Cultural Revolution. It concludes with an analysis of the phoenix-like rise of genetics in recent decades and the assignment of biotechnology to a leading role in plans for economic development. Based on a broad range of archival materials and interviews with major actors in the story, this book will be a rich resource for all those interested in contemporary China.

Chinese Studies in the History and Philosophy of Science and Technology Fan Dainian, Robert S. Cohen, 2013-03-09. The articles in this collection were all selected from the first five volumes of the *Journal of Dialectics of Nature* published by the Chinese Academy of Sciences between 1979 and 1985. The *Journal* was established in 1979 as a comprehensive theoretical publication concerning the history, philosophy and sociology of the natural sciences. It began publication as a response to China's reform, particularly the policy of opening to the outside world. Chinese scholars began to undertake distinctive original research in these fields. This collection provides a cross section of their efforts during the initial phase. To enable western scholars to understand the historical process of this change in Chinese academics, Yu Guangyuan's *On the Emancipation of the Mind* and Xu Liangying's *Essay on the Role of Science and Democracy in Society* have been included in this collection. Three of the papers included on the philosophy of science are discussions of philosophical issues in cosmology and biology by scientists themselves. The remaining four are written by philosophers of science and discuss information and cognition, homeostasis and Chinese traditional medicine, the *I Ching*, *Yi Jing* and mathematics etc. Papers have been selected on the history of both classical and modern science and technology, the most distinctive of which are macro comparisons of the development of science in China and the west. Some papers discuss the issue of the demarcation of periods in the history of science, the history of ancient Chinese mathematics, astronomy, metallurgy, machinery, medicine etc. Others discuss the history of modern physics and biology, the history of historiography of science in China and the history of regional development of Chinese science and technology. Also included are biographies of three post-eighteenth century Chinese scholars: Li Shanlan (1811-1882), Hua Hengfang (1833-1902) and Cai Yuanpei (1868-1940) who contributed greatly to the introduction of western science and scholarship to China. In addition, three short papers have been included introducing the interactions between Chinese scholars and three great western scientists: Niels Bohr, Norbert Wiener and Robert A. Millikan.

Ancestral Leaves Joseph W. Esherick, 2011-02-09. *Ancestral Leaves* follows one family through six hundred years of Chinese history and brings to life the epic narrative of the nation from the fourteenth century through the Cultural Revolution. The lives of the Ye family (Ye means leaf in Chinese) reveal the human side of the large-scale events that shaped

modern China the vast and destructive rebellions of the nineteenth century the economic growth and social transformation of the republican era the Japanese invasion during World War II and the Cultural Revolution under the Chinese Communists Joseph W Esherick draws from rare manuscripts and archival and oral history sources to provide an uncommonly personal and intimate glimpse into Chinese family history illuminating the changing patterns of everyday life during rebellion war and revolution Ancestral Leaves Joseph Esherick,2011-02-09 Esherick looks at familiar historical events and processes anew enriching that history with great personal depth There is really nothing like it William T Rowe author of China's Last Empire The Great Qing A uniquely revealing and humanizing prism through which to view the fascinating human drama of modern Chinese history replete with information for both longtime students of China and newcomers alike An absolutely splendid book Elizabeth Perry author of Patrolling the Revolution Worker Militias Citizenship and the Modern Chinese State

Historical Dictionary of Science and Technology in Modern China Lawrence R. Sullivan,Nancy Liu-Sullivan,2015-03-19 The Historical Dictionary of Science and Technology in Modern China provides the most up to date information on science and technology in China from the late nineteenth century to the present Special attention is given to the historical factors scientists and historical figures behind each scientific development In particular this book pays attention to the scientists who were persecuted to death or tortured during the Cultural Revolution 1966 1976 and whose scientific research was therefore tragically cut short The historical dictionary provides information on science and technology in China from the late nineteenth century to the present including a chronology introduction extensive bibliography over 700 cross referenced dictionary entries on major scientific and technological fields and sub fields entries on western scholars and educators who also impacted scientific achievements in China This book is an excellent access point for students researchers and anyone wanting to know more about the science and technology in China Fang Lizhi's Big Bang James Harley Williams,1994

Bioethics: Asian Perspectives Ren-Zong Qiu,2013-06-29 Bioethics Asian Perspectives A Quest for Moral Diversity is the first volume on bioethics all contributors of which are exclusively non western scholars unfolds a rich and colourful picture addresses thorny bioethical issues from comprehensive Asian perspectives and different from the western paradigm of bioethics covers many topics including the intellectual foundation of Asian bioethics bioethics and Asian culture life and death euthanasia and end of life care in Asia shows in its discussions moral diversity in Asia sheds light on the debate about universal ethics global ethics and moral diversity The book is intended for senior undergraduate and graduate students interested in bioethics as well as for bioethicists philosophers physicians scholars of Asian and culture studies geneticists sinologists medical anthropologists health administrators health officials for relations with Asia foundation officers for health programs in Asia western journalists in Asia and officers of international organizations for Asia **The Cumulative Book Index**,1988 A world list of books in the English language **Science and Medicine in Twentieth-century China** John Z. examinations by historians of attempts to root modern science in China during the Republican period The second contains reports by scientists who have been involved in China's recent efforts to modernize Topics include genetic research taxonomy contraception food policy and schistosomiasis With an introduction by Nathan Sivin Historical Studies in the Physical and Biological Sciences ,1999 *Index of Conference Proceedings Received* British Library. Lending Division,1986-07

Bibliography of Asian Studies ,1991 **China Learns from the Soviet Union, 1949-Present** Hua-Yu Li,2010-01-05

It is well known that the Soviet Union strongly influenced China in the early 1950s since China committed itself both to the Sino Soviet alliance and to the Soviet model of building socialism What is less well known is that Chinese proved receptive not only to the Soviet economic model but also to the emulation of the Soviet Union in realms such as those of ideology education science and culture In this book an international group of scholars examines China's acceptance and ultimate rejection of Soviet models and practices in economic cultural social and other realms The chapters vividly illustrate the wide ranging and multi dimensional nature of Soviet influence which to this day continues to manifest itself in one critical aspect namely in China's rejection of liberal political reform Chinese Law and Government ,1986 **Index of Conference Proceedings Received** British Library.
