Machine Musicianship:

Machine Musicianship Robert Rowe, 2004-01-30 Musicians begin formal training by acquiring a body of musical concepts commonly known as musicianship These concepts underlie the musical skills of listening performance and composition Like humans computer music programs can benefit from a systematic foundation of musical knowledge This book explores the technology of implementing musical processes such as segmentation pattern processing and interactive improvisation in computer programs It shows how the resulting applications can be used to accomplish tasks ranging from the solution of simple musical problems to the live performance of interactive compositions and the design of musically responsive installations and Web sites Machine Musicianship is both a programming tutorial and an exploration of the foundational concepts of musical analysis performance and composition The theoretical foundations are derived from the fields of music theory computer music music cognition and artificial intelligence The book will be of interest to practitioners of those fields as well as to performers and composers The concepts are programmed using C and Max The accompanying CD ROM includes working versions of the examples as well as source code and a hypertext document showing how the code leads to the program s musical functionality

Robotic Musicianship Gil Weinberg, Mason Bretan, Guy Hoffman, Scott Driscoll, 2020-02-07 This book discusses the principles methodologies and challenges of robotic musicianship through an in depth review of the work conducted at the Georgia Tech Center for Music Technology GTCMT where the concept was first developed Robotic musicianship is a relatively new research field that focuses on the design and development of intelligent music making machines The motivation behind the field is to develop robots that not only generate music but also collaborate with humans by listening and responding in an expressive and creative manner This combination of human and machine creativity has the potential to surprise and inspire us to play listen compose and think about music in new ways The book provides an in depth view of the robotic platforms designed at the GTCMT Robotic Musicianship Group including the improvisational robotic percussionists Haile and Shimon the personal robotic companion Shimi and a number of wearable robots such as the Robotic Drumming Prosthesis The Third Drumming Arm and the Skywalker Piano Hand The book discusses numerous research studies based on these platforms in the context of five main principles Listen like a Human Play Like a Machine Be Social Watch and Learn and Wear It

Machines as Agency Christoph Lischka, Andrea Sick, 2015-07-15 This book supports and deepens the existing interfaces between art science and technology transgressing traditional principles and styles of research and selectively overcoming the side by side coexistence in favour of an integrated laboratory of the future Instead of relying on traditional dualisms like nature culture subject object as well as man and machine heterogeneous networks with humans and non humans Latour are opened in shared contexts of agency New momentary propositions are developed meeting the complexity of discovering exploring and inventing things things which do not exist just as given beings The artists and theoreticians can pursue using the tools and techniques of science actively not only to

comment them but also to fathom their possibilities and employ them in their artistic and scientific projects

Machines as Agency is an artistic perspective
