The Psychology of Leadership David M. Messick, Roderick M. Kramer, 2004-09-22 In this book some of the world s leading scholars come together to describe their thinking and research on the topic of the psychology of leadership Most of the chapters were originally presented as papers at a research conference held in 2001 at the Kellogg School of Management of Northwestern University The contributions span traditional social psychological areas as well as organizational theory examining leadership as a psychological process and as afforded by organizational constraints and opportunities The editors goal was not to focus the chapters on a single approach to the study and conceptualization of leadership but rather to display the diversity of issues that surround the topic Leadership scholars have identified a host of approaches to the study of leadership What are the personal characteristics of leaders What is the nature of the relation between leaders and followers Why do we perceive some people to be better leaders than others What are the circumstances that evoke leadership qualities in people Can leadership be taught And so on The contributions to this book examine these important questions and fall into three categories conceptions of leadership factors that influence the effectiveness of leadership and the consequences and effects of leadership on the leader All in all the chapters of this volume display part of a broad spectrum of novel and important

approaches to the study of the psychology of leadership We hope that they are equally useful to those who are or would be leaders and to those who study the topic As recent events have served to remind us it is too important a topic to be ignored by psychologists

The Word on the Wind Alison Morgan, 2013-03-07 The average age of churchgoers in Britain is now 47 Almost every denomination is experiencing steady decline How sure can we be that we are still offering something people want to hear Alison Morgan identifies four clear reasons to be confident 1 The gospel still speaks to confused teens and weary sceptics By embracing doubts and welcoming questions it remains open to us to present something which answers people s real needs 2 The word of truth and the Spirit of power still exercise authority and compel attention Alison s own experience of ministry in the UK and abroad provides illustrations 3 Spiritual gifts given not to excite individuals but in order to renew the church for its core task of mission are powerfully present and widely recognised and practised 4 In a time of rapid cultural change new expressions of church are constantly emerging this is necessary to guard against vital spirituality sliding into drab religion

The Wild Gospel Alison Morgan, 2012-10-18 A prophetic challenge to the Western church The Christian faith is always subversive to the dominant world view Jesus overturned every assumption which stopped people experiencing the living reality of God the heart of truth Sadly the Western world has reduced truth to the merely rational and then discarded it as inadequate In Africa and other parts of the world where God s truth has never been straitjacketed in this way the church is characterised by a joy now absent in the West Western culture has limited what we can believe and receive Can we Burst free from this restrictive secular framework Learn not only to know truth but to feel it and live it Live our faith in such a way that it becomes real to those around us Alison Morgan shows that Jesus lived free from the culturally imposed norms which restrict our understanding of truth Examining church history prophecy past and present the state of our culture and of the church today and drawing on personal experience and the experience of others Alison blends analysis and imagination history and poetry in this prophetic challenge to Western Christians

Parent-School Conflict Management: Research, Theory and Practice Professor John Kanjogu Kiumi, 2019-12-23 Education empowers individuals with knowledge skills and values which in turn enables them to build a better world Since the school is the

primary context within which education takes place it follows that parents and teachers must work in harmony so as to maximize children's learning gains. The process of parent school interaction however has the potential to generate conflict due to differing perspectives between teachers and parents on how best to educate children. This brings to the fore a number of questions: How can headteachers manage these conflicts productively since their role expectation is to provide quality leadership so as to enhance the school's capacity to deliver on its mandate? Are there personal factors that are likely to influence the choice of parent school conflict management styles by headteachers? These are the two questions that Prof J Kanjogu sought to answer in this book. The book is a product of field based research in public primary schools in Nyahururu sub county Kenya. The book will be useful to school managers, teachers, parents, education researchers and teacher education institutions given that they teach courses in school management.
