Mississippi Floods Designing A Shifting Landscape:

Mississippi Floods Anuradha Mathur, Dilip da Cunha, Professor Dilip Da Cunha, 2001-01-01 Each time the waters of the mighty Mississippi River overflow their banks questions arise anew about the battle between man and river How can we prevent floods and the damage they inflict while maintaining navigational potential and protecting the river's ecology The design of the Mississippi and how it should proceed has long been a subject of controversy What is missing from the discussion say the authors of this book is an understanding of the representations of the Mississippi River Landscape architect Anuradha Mathur and architect planner Dilip da Cunha draw together an array of perspectives on the river and show how these different images have played a role in the process of designing and containing the river landscape Analyzing maps hydrographs working models drawings photographs government and media reports painting and even folklore Mathur and da Cunha consider what these representations of the river portray what they leave out and why that might be With original silk screen prints and a selection of maps the book joins historic scientific engineering and natural views of the river to create an entirely new portrait of the great Mississippi

and Ecology in the Bengal Delta Debjani Bhattacharyya, 2018-05-24 What happens when a distant colonial power tries to
tame an unfamiliar terrain in the world's largest tidal delta This history of dramatic ecological changes in the Bengal Delta
from 1760 to 1920 involves land water and humans tracing the stories and struggles that link them together Pushing beyond
narratives of environmental decline Bhattacharyya argues that property thinking a governing tool critical in making land and
water discrete categories of bureaucratic and legal management was at the heart of colonial urbanization and the
technologies behind the draining of Calcutta The story of ecological change is narrated alongside emergent practices of land
speculation and transformation in colonial law Bhattacharyya demonstrates how this history continues to shape our built
environments with devastating consequences as shown in the Bay of Bengal's receding coastline **Solving Critical**

Design Problems Tania Allen, 2019-06-06 Solving Critical Design Problems demonstrates both how design is increasingly
used to solve large complex modern day problems and as a result how the role of the designer continues to develop in
response With 13 case studies from various fields including program and product design Tania Allen shows how types of
design thinking such as systems thinking metaphorical thinking and empathy can be used together with methods such as
brainstorming design fiction and prototyping This book helps you find ways out of your design problems by giving you other
ways to look at your ideas so that your designs make sense in their setting Solving Critical Design Problems encourages a
design approach that challenges assumptions and allows designers to take on a more critical and creative role With over 100
images this book will appeal to students in design studios industrial and product design as well as landscape and urban
design **The Big Muddy** Christopher Morris, 2012-09-13 The Mississippi Valley has been a place where the battle between

water and land has been a constant for centuries It has shaped the relationship between its inhabitants and their
environment long before Hurricane Katrina though of course these events have put the topic in the headlines and made this

the preeminent issue shaping the region today In this work Christopher Morris takes a long view of the interaction between people and the wet landscape of the Mississippi Valley from pre contact hunter gatherer bands to present day industrial and post industrial society

Multiple City Aditi De, 2008 Founded by the chieftain Kempe Gowda around 1537 the story of Bangalore has no grand linear narrative The location has revealed different facets to settlers and passers through The city the site of bloody battles between the British and Tipu Sultan was once attached to the glittering court of Mysore Later it became a cantonment town where British troops were stationed Over time it morphed into a city of gardens and lakes and the capital of PBI Indian scientific research More recently it has been the hub of PBI India's information technology boom giving rise to Brand Bangalore an PBI Indian city whose name is recognized globally Hidden beneath these layers lies a cosmopolitan city of sub cultures engaging artists and writers young geeks and students People from every corner of PBI India and beyond now call it home In this collection of writings about a multi layered city there are stories from its history translations from Kannada literature personal responses to the city's mindscape portraits of special citizens accounts of searches for lost communities and traditions among much more U R Ananthamurthy writes about Bangalore's Kannada identity Shashi Deshpande maps the city through the places she has lived in since she was a young girl Anita Nair draws a touching portrait of a florist who celebrates the glories of the Raj Ramachandra Guha describes his close bond with Bangalore's most unusual bookseller and Rajmohan Gandhi recounts the Mahatma's trysts with the city From traditional folk ballads to a nursery rhyme about Bangalore from poems to blogs from reproductions of turn of the twentieth century picture postcards to cartoons Multiple City is the portrait of a metropolis trying to retain its roots as it hurtles into the future

Critical Humanities from India D. Venkat Rao, 2018-03-09 The field of humanities generates a discourse that traditionally addressed the questions of what is proper to man rights of man crimes against humanity human creativity and action human reflection and performance human utterance and artefact The university as a philosophical political institution transmits this humanist account This European humanistic legacy which is little more than Christian anthropology barely received any questioning from cultures that faced colonialism In such a context this volume attempts to unravel the barely secularized heritage of Europe Derrida's phrase and its fatal

consequences in other cultures The task of Critical Humanities is to explore the ways in which the question of being human along with non human others today from heterogeneous cultural backgrounds can be undertaken The future of the humanities teaching and research is contingent upon the risky task of configuring cultural difference from non European locations Such a task is inescapable and urgently needed when tectonic cultural upheavals have begun to show devastating effect on planetary coexistence today It is precisely in such a context that this collection of essays on critical humanities affirms without alibi the urgency of collective reflection and innovative research across the traditional disciplinary and institutional borders and communication systems on the one hand and Asian African and European cultural formations on the other Critical Humanities are at one level little more than communities on the verge critical but whose centuries long survival and resilient creations of cultural and as natural habitats are of deeply enduring significance to affirm the biocultural diversities of living that compose the planet Topical and timely this book will be useful to scholars researchers and teachers of cultural theory literary studies philosophy cultural geography legal studies sociology history performance studies environmental studies caste and communalism studies postcolonial theory India studies and education *Ethics in Everyday Places* Tom Koch,2022-11-01 An exploration of moral stress distress and injuries inherent in modern society through the maps that pervade academic and public communications worlds In *Ethics in Everyday Places* ethicist and geographer Tom Koch considers what happens when as he puts it you do everything right but know you ve done something wrong The resulting moral stress and injury he argues are pervasive in modern Western society Koch makes his argument from the ground up from the perspective of average persons and through a revealing series of maps in which issues of ethics and morality are embedded The book begins with a general grounding in both moral stress and mapping as a means of investigation The author then examines the ethical dilemmas of mapmakers and others in the popular media and the sciences including graphic artists journalists researchers and social scientists Koch expands from the particular to the general from mapmaker and journalist to the readers of maps and news He explores the moral stress and injury in educational funding poverty and income inequality Why aren t we angry that one in eight fellow citizens lives in federally certified poverty transportation modeling seen in the iconic map of the London transit system and the hidden realities of exclusion and U S graft organ transplantation This uniquely interdisciplinary work rewrites our understanding of the nature of moral stress distress and injury and ethics in modern life Written accessibly and engagingly it transforms how we think of ethics personal and professional amid the often conflicting moral injunctions across modern society Copublished with Esri Press

Terra-Sorta-Firma Fadi Masoud,2021-05-15 A critical and interdisciplinary exploration of our world s continuously urbanizing and expanding coastline For centuries cities have grown and expanded onto previously saturated grounds reclaiming land from estuaries marshes mangroves and seabeds While these artificial coastlines are sites of tremendous real estate civic and infrastructural investments they are also the most vulnerable to the effects of climate change *Terra Sorta*

Firma documents the global extent of reclaimed coastal lands and provides a framework for comparison across varying geographies cultures and histories It renders visible the ubiquity and precarity of urban coastal reclamation in an age of increased environmental and economic indeterminacy It challenges designers developers policymakers engineers and urbanists to reconsider the design and construction of land itself and to re imagine this most fundamental of all infrastructures along a gradient of inundation
