Eighteenth-Century Country House Jon Stobart, 2021-09-21 Country houses were grand statements of power and status but they were also places where people lived This book traces the changes in layout the new technologies and the innovations in furniture that made them more convenient and comfortable It argues that these material changes were just one aspect of comfort in the country house feeling comfortable was just as important as being comfortable Achieving this involved the comfort and solace to be found in daily routines religious faith and above all relationships with family and friends Such emotional comforts and the attachment to things and places that embodied and memorialized them made country houses into homes **Growing Up in England** Anthony Fletcher, 2010-04-13 This book presents an entirely fresh view of the upbringing of English children in upper and professional class families over three centuries Drawing on direct testimony from contemporary diaries and letters the book revises previous understandings of parenting and what it was like to grow up in the period between 1600 and 1914 Using advice literature which set out developing ideologies of childhood gender and parenting the book explores the separate but complementary roles of mothers and fathers in raising their children Male upbringing is discussed in terms of schooling female through the moral and social context of a domestic schoolroom dominated by a governess Boys were trained for the world girls for society and marriage Rare teenage diaries surviving from the Georgian and Victorian periods show teenagers speaking for themselves about education relationships with parents siblings and friends and their social class and gender identity **Consumption and the Country House** Jon

Stobart, Mark Rothery, 2016-06-02 This study explores the consumption practices of the landed aristocracy of Georgian England Focussing on three families and drawing on detailed analysis of account books receipted bills household inventories diaries and correspondence Consumption and the Country House charts the spending patterns of this elite group during the so called consumer revolution of the eighteenth century Generally examined through the lens of middling families homes and motivations this book explores the ways in which the aristocracy were engaged in this wider transformation of English society Analysis centres on the goods that the aristocracy purchased both luxurious and mundane the extent to which they pursued fashionable modes and goods the role that family and friends played in shaping notions of taste the influence of gender on taste and refinement the geographical reach of provisioning and the networks that lay behind this consumer activity and the way this all contributed to the construction of the country house The country house thus emerges as much

more than a repository of luxury and splendour it lay at the heart of complex networks of exchange sociability demand and supply Exploring these processes and relationships serves to reanimate the country house making it an active site of consumption rather than simply an expression of power and taste and drawing it into the mainstream of consumption histories At the same time the landed aristocracy are shown to be rounded consumers driven by values of thrift and restraint as much as extravagant desires and valuing the old as well as the new not least as markers of their pedigree and heritage

The Spectator, 1868 *The Agrarian History of England and Wales* Edward John T.
