## **Mmr Science And Fiction:**

*MMR* Richard C. Horton, 2004 The publication of Andrew Wakefield's work in *The Lancet* in 1998 inadvertently triggered a collapse of public confidence in the MMR vaccine Six years into this health crisis a key and much disputed part of the report was retracted Now *The Lancet's* editor Dr Richard Horton considers the implications of this affair Horton is an advocate of the MMR his own child has had the triple vaccine and here he gives an insider's account of the events surrounding this controversy He reviews the history of the MMR vaccine and the claims about its safety discussing why we consistently fail to debate controversial science rationally He analyses the malign influence of financial conflicts of interest in medical research today and looks at what might be done to improve our present understanding of autism He examines prospects for completely eradicating measles from the world a disease which kills 700 000 children each year

*The Science and Fiction of Autism* Laura Ellen Schreibman, 2009-06-30 Autism is a complex and incurable constellation of bizarre behaviors impaired cognition limited language and most distressingly a lack of responsiveness to other people and it has been the center of impassioned debates for decades What is it What causes it How can it be treated In *The Science and Fiction of Autism* one of the country's leading experts in behavioral treatments approaches autism through the context of its controversies showing where extraordinary and unfounded claims have falsely raised hopes stirred fears and ruined lives Arguing that autism is an entirely biological disorder however complex its neurological origins Laura Schreibman lays waste to the beliefs that it is caused by refrigerator mothers or the MMR vaccine as well as to the simplistic claims that it can be cured by a variety of unsubstantiated treatments Drawing from her own long clinical experience with autistic children and their parents Schreibman arms her readers students educators psychologists and parents alike with information and arguments to deal with the onslaught of good bad deficient and irrelevant ideas about autism

### **Health, Risk and News**

Tammy Boyce, 2007 The controversy surrounding the measles mumps and rubella MMR vaccine and autism has raised unprecedented questions about the communication of health and science *Health Risk and News* The MMR Vaccine and the Media examines how this story came to be so influential and asks if the media are to blame for unduly panicking the public Drawing on comprehensive research on media coverage interviews with a range of journalists and sources and analysis of audience opinion this book explores how medical controversies are covered with attention to issues of balance and objectivity expertise news values risk and media effects It will be of interest to students and scholars of media studies journalists and health professionals

### **New Methodological Perspectives on Observation and Experimentation in Science** Wenceslao J.

González, 2010-12-29 Observation and experimentation are central topics of philosophy and methodology of science The empirical sciences have commonly been associated to observational and experimental processes because they have been

considered crucial for testing the contents of these. Thus observation and experimentation have received attention from different angles and they have been historically relevant in the advancement of science. Their philosophical methodological analysis includes some key aspects those related to axiological, epistemological and methodological issues.

New Methodological Perspectives on Observation and Experimentation in Science deals with a classic topic that is seen from new angles. Its nine chapters seek non traditional aspects trying to extend the boundaries of this philosophical methodological theme. They are presented in five sections: 1. A Philosophical Methodological Context, 2. Experience and Scientific Observations, 3. Empirical Support and Experiments in Science, 4. Changes in the Framework on Observation and Experimentation, and 5. Enlarging the Philosophical Scope.

Law and Ecology

Wenceslao J. Gonzalez is Professor of Logic and Philosophy of Science, University of A Coruña. He is a Full Member of the International Academy for Philosophy of Sciences (AIPS), Visiting fellow at the Center for Philosophy of Science, University of Pittsburgh, and a Team Leader of the European Science Foundation program entitled The Philosophy of Science in a European Perspective. He has been named a Distinguished Researcher by the Main National University of San Marcos in Lima, Peru. He has been a visiting researcher at the Universities of St Andrews, Manchester and London, LSE. He has given lectures at the Universities of Pittsburgh, Stanford, Quebec, and Helsinki. The conferences in which he has participated include those organized by the Universities of Uppsala, New South Wales, Bologna, Canterbury, NZ, and Beijing. He has edited 26 volumes on philosophy and methodology of science.

Trusting Science

Kostas Kampourakis, 2025

Certain scientific fields have long been battlegrounds of controversy, echoing a deep seated public distrust towards science. This distrust is especially pronounced in areas of policy science, that is science that informs policy decisions such as vaccination programs. This book explores the roots of this distrust, setting it apart from outright denial of science. While absolute denial is rare, distrust can be quite widespread, often nourished by personal experiences or the persuasive testimonies of others. *Trusting Science* embarks on a journey to uncover some underexplored causes of science distrust. It thus underscores the necessity of demystifying science by illuminating the nature of scientific evidence, the inevitable presence of uncertainty, the indispensable role of expertise, and the subtle sway of personal biases. Drawing on historical examples from vaccination and other life sciences, *Trusting Science* offers opportunities for reflection about how science is done, and argues that a renaissance in science education and communication is crucial for cultivating realistic expectations and rebuilding public trust in science.

**The Law-Science Chasm**

Cedric Charles Gilson, 2012-11-01

THE LAW SCIENCE CHASM is a socio legal study that takes seriously the varying approaches to science that physicians and scientists use, as compared to legal actors such as judges and lawyers. Offering a way to mediate and translate their different perspectives and assumptions, Gilson uses sociological and philosophical methodologies to explain each discipline to the other. Gilson's book takes seriously the idea of the autopoietic closure of society's communicative subsystems and works out the consequences in particular for science and law. This analysis both lends support to the credibility of the approach adopted and sheds light on

the problems and the direction in which potential solutions might lie The book consequently makes an important contribution not only to the literature dealing with the relationship between science and law but also to the literature dealing with the application of autopoietic systems theory to tangible concerns This book is therefore of clear significance to those continuing to wrestle with the challenges thrown up by science for law and policy even when the spotlight of public attention is directed elsewhere JOHN PATERSON Professor of Law University of Aberdeen from the Foreword Part of the new Dissertation Series from Quid Pro Books

**Risk Communication and Public Health** Peter Bennett, 2010 Controversies about risks to public health regularly hit the news whether about food safety environmental issues medical interventions or lifestyle risks such as drinking To those trying to manage or regulate risks public reactions sometimes seem bizarre To the public the behaviour of those supposedly in charge can seem no less odd Trust is currently at a premium This new edition of Risk Communication and Public Health covers the theoretical and research background and presents a wide range of contemporary case studies and the learning experiences from these and the political institutional and organisational issues they raise It concludes with an analysis of the lessons learned and gives pointers for the future The book offers international perspectives and contributors include representatives from consumer organisations as well as public health practitioners and academics This edition is substantially updated with new material and case studies but retains the same focus the improvement of communication and promotion of good practice in risk communication in Government the Health Service and elsewhere This second edition presents a broad view of the issues around risk communication and public health in a way that will be of interest to a range of public health practitioners managers and policy makers postgraduate students and academics in a number of disciplines and those interested in environmental health

**Deadly Choices** Paul A. Offit, 2015-03-10 A renowned researcher vigorously challenges the anti vaccine movement in this powerful defense of science in the face of fear

**Trust** Adriano Fabris, 2020-04-06 This book presents cutting edge concepts on the question of trust Written by leading experts it investigates a paradoxical feature of contemporary society while information and communication technologies on the one hand and scientific discourses on the other can promote more informed participation in public and democratic life they have also led to a dramatic decline in our communicative and cooperative skills The book analyzes the notion of trust from an interdisciplinary perspective by combining the normative continental and empirical Anglo American approaches and by considering the political epistemological and historical transformations in the interpersonal relationships sparked by new technologies Using trust as a model it then investigates and clarifies the new types of participation that are made possible by scientific and technological advances

**Viruses, Plagues, and History** Michael B. A. Oldstone, 2020-08-01 More people were killed by smallpox during the twentieth century over 300 million than by all of the wars of that period combined In 1918 and 1919 influenza virus claimed over 50 million lives A century later influenza is poised to return ongoing plagues of HIV AIDS and hepatitis infect millions and Ebola Zika and West Nile viruses cause new concern and panic The overlapping

histories of humans and viruses are ancient Earliest cities became both the cradle of civilization and breeding grounds for the first viral epidemics This overlap is the focus of virologist immunologist Michael Oldstone in *Viruses Plagues and History* Oldstone explains principles of viruses and epidemics while recounting stories of viruses and their impact on human history This fully updated second edition includes engrossing new chapters on hepatitis Zika and contemporary threats such as the possible return of a catastrophic influenza and the impact of fear of autism on vaccination efforts This is a fascinating panorama of humankind's longstanding conflict with unseen viral enemies both human successes such as control of poliomyelitis measles smallpox and yellow fever and continued dangers such as HIV and Ebola Impeccably researched and accessibly written *Viruses Plagues and History* will fascinate all with an interest in how viral illnesses alter the course of human history

**Callous Disregard** Andrew J. Wakefield, 2017-11-21 *Callous Disregard* is the account of how a doctor confronted first a disease and then the medical system that sought and still seeks to deny that disease leaving millions of children to suffer and a world at risk In 1995 Dr Andrew Wakefield came to a fork in the road As an academic gastroenterologist at the Royal Free School of Medicine and the University of London he was confronted by a professional challenge and a moral choice Previously healthy children were according to their parents regressing into autism and developing intestinal problems Many parents blamed the MMR vaccine Trusting his medical training the parental narrative and above all the instinct of mothers for their children's well being he chose what would become a very difficult road Dr Wakefield provides the facts and an explanation of the problem that confronted him and his colleagues fifteen years ago He does this in a detailed forensic analysis of the lies obfuscation cover up and dystopian science and medicine that panders to commercial interests at the expense of your children

**An Alternative History of Hyperactivity** Matthew Smith, 2011 In 1973 San Francisco allergist Ben Feingold created an uproar by claiming that synthetic food additives triggered hyperactivity then the most commonly diagnosed childhood disorder in the United States He contended that the epidemic should not be treated with drugs such as Ritalin but instead with a food additive free diet Parents and the media considered his treatment the Feingold diet a compelling alternative Physicians however were skeptical and designed dozens of trials to challenge the idea The resulting medical opinion was that the diet did not work and it was rejected Matthew Smith asserts that those scientific conclusions were in fact flawed An Alternative History of Hyperactivity explores the origins of the Feingold diet revealing why it became so popular and the ways in which physicians parents and the public made decisions about whether it was a valid treatment for hyperactivity Arguing that the fate of Feingold's therapy depended more on cultural economic and political factors than on the scientific protocols designed to test it Smith suggests the lessons learned can help resolve medical controversies more effectively

*A History of Vaccines and Anti-Vaxxers* Anthony C Cartwright, 2025-02-05 Traces the history of anti vaxxers from 19th century opposition to Edward Jenner's smallpox vaccine to modern day vaccine hesitancy and misinformation Retired drug regulator and medical historian Anthony C Cartwright tells the story of the anti vaxxers starting with objections by Anti Vacks to Edward Jenner's smallpox vaccine in the early 19th century and then a propaganda war waged by the Anti Compulsory Vaccination League and its successor from 1853 to 1972 There was political lobbying and demonstrations across Britain against compulsory smallpox vaccination for children Parents who refused to have their children treated were fined and even went to prison The campaign spread to America and there were links to many countries The popular appeal of anti vaxxer views is reviewed in a new analysis and linked to libertarian objections to compulsion and fears of vaccine safety for their children The early anti vax leaders were germ theory deniers and believers in alternative medicine Using his regulatory expertise to review issues of historic safety quality and efficacy of vaccines major questions about later vaccines such as an early polio vaccine actually increasing polio deaths infant deaths in L Beck from a TB contaminated BCG vaccine and reports linking neurological reactions to Diphtheria Tetanus and Pertussis DTP vaccine are considered These caused reluctance to vaccinate Andrew Wakefield's fraudulent 1998 scientific paper linking MMR vaccine to autism fuelled the fire for the anti vaxxers and caused an epidemic of measles cases in children Although modern Covid 19 vaccines were thoroughly tested for safety and efficacy anti vaccine sentiment came to a head again Demonstrators marched in cities round the world carrying signs protesting government policies and this book looks at the websites which proliferated on the Internet bearing false witness about dangers Lessons can be learned from history to mitigate vaccine hesitancy and mistrust and to ensure all ethnic groups and sections of society receive the healthcare they deserve
