course The international is a perilous place and nuclear weapons represent the ultimate self help device This book seeks to unsettle this complacency by re conceptualizing nuclear weapon armed states as nuclear regimes of truth and refocusing on the processes through which governments produce and maintain country specific discourses that enable their continued possession of nuclear weapons Illustrating the value of studying nuclear regimes of truth the book conducts a discourse analysis of the UK s nuclear weapons policy between 1980 and 2010 In so doing it documents the sheer imagination and discursive labour required to sustain the positive value of nuclear weapons within British politics as well as providing grounds for optimism regarding the value of the recent treaty banning nuclear weapons

British Grand Strategy in the Age of American Hegemony William D. James, 2024-01-18 Is the United Kingdom capable of grand strategy Common wisdom suggests otherwise Some think it implausible amid the maelstrom of domestic politics while others believe the UK lacks the necessary autonomy as a cog in the US led order British Grand Strategy in the Age of American Hegemony challenges these claims William D James contends that grand strategy is an unavoidable part of governing Grand strategy is the highest level of national security decision making encompassing judgements over a state s overarching objectives and interests as well as its security environment and resource base Getting these decisions right is vital in moments of geopolitical flux Employing several historical case studies between 1940 2003 and marshalling a host of primary sources James argues that British politicians and officials have thought in grand strategic terms under American hegemony even if they do not realise or admit to this He also demonstrates that the role of allies in shaping British grand strategy has been overstated Finally James highlights the conditions under which domestic political actors can influence grand strategic decision making Written for practitioners as well as scholars the book concludes with several policy recommendations at this inflection point in British history

Understanding Influence Thomas Waldman, Sultan Barakat, 2016-02-24 The overarching objective of this book is to analyse the manner in which statebuilding oriented research has and can influence policies in fragile post conflict environments Large scale externally assisted statebuilding is a relatively new and distinct foreign policy domain having risen to the forefront of the international agenda as the negative consequences of state weakness have been repeatedly revealed in the form of entrenched poverty regional instability and serious threats to international security Despite the increasing volume of research on statebuilding the use and uptake of findings by those involved in policymaking remains largely under examined As such the main themes running through the book relate to issues of research influence use and uptake into policy It grapples with problems associated with decision making dynamics knowledge management and the policy process and draws on concepts and analytical models developed within the public policy and research utilisation literature This book will be of great interest to researchers knowledge managers and policymakers working in the fields of post war reconstruction statebuilding fragile states stabilisation conflict and development

The use of airspace Great Britain: Parliament: House of Commons: Transport Committee, 2009-07-10 The Government s Future of Air Transport strategy aims to significantly

increase UK airport capacity over the next two decades to accommodate the predicted growth in demand for air travel New runways at Heathrow and Stansted airports are two of the key airport development proposals If all the White Paper supported airport development proposals came to fruition current Government forecasts predict that the number of passengers passing through UK airports will increase from 241 million passengers a year in 2007 to 455 million passengers a year in 2030 This UK growth matches air traffic predictions for the whole continent Eurocontrol the European Organisation for the Safety of Air Navigation predicts that European air traffic will double by 2020 If rising demand for air travel is to be met effectively through additional airport capacity a corresponding increase in airspace capacity must be realised However a country's airspace the portion of atmosphere above its territory and territorial waters controlled by that country is a finite resource UK airspace particularly in the South East of England is already some of the busiest and most complex to manage in the world This will almost certainly require improvements in the efficiency of the UK air traffic management system The Committee's inquiry aims to look at how to meet these challenges Its findings are aimed at those organisations responsible for airspace related decisions in the UK the CAA NATS and the Department for Transport Passenger numbers and freight demand globally have declined in 2008 and in the first months of 2009 In its conclusions and recommendations the Committee covered the management of airspace strategy change and co ordination in airspace management environmental impacts of airspace changes and European developments

Government and Armed Forces in Britain, 1856-1990 Paul Smith, 2010-07-15 In a period that began with Britain controlling a world wide empire and included two world wars followed by the Cold War and massive expenditure on nuclear armaments the relationship between the politicians and the generals has been central to British history While it is correctly assumed that the Armed Forces have never threatened British political stability in modern times the relationship between the military and their political masters is a major if under emphasised theme of British history While in theory the politicians decided strategy and the military implemented it in practice decisions often depended on the personalities and experience of those involved Asquith the epitome of the civilian left major strategic decisions in the hands of the military while Churchill an ex soldier and ex First Lord of the Admiralty rode roughshod over professional military advice In a period when arms before ever more technologically sophisticated there was also the problem of how far politicians could decide on strategies proposed by the military other than by the crude yardstick of cost The essays in *Government and the Armed Forces in Britain 1856-1990* provide a coherent account not only of the major decision making of warfare but also of the changes in the organisation and control of the Armed Forces *Parliamentary Papers* Great Britain.
