human action and challenges what it means to play Do we play video games or do video games play us Is nonhuman play a mere paradox or the future of gaming And what do video games have to do with quantum theory In Playing at a Distance Sonia Fizek engages with these and many more daunting questions forging new ways to think and talk about games and play that decenter the human player and explore a variety of play formats and practices that require surprisingly little human action Idling in clicker games wandering in walking simulators automating gameplay with bots or simply watching games rather than playing them Fizek shows how these seemingly marginal cases are central to understanding how we play in the digital age Introducing the concept of distance Fizek reorients our view of computer mediated play To play at a distance she says is to delegate the immediate action to the machine and to become participants in an algorithmic spectacle Distance as a media aesthetic framework enables the reader to come to terms with the ambiguity and aesthetic diversity of play Drawing on concepts from philosophy media theory and posthumanism as well as cultural and film studies Playing at a Distance invites a wider understanding of what digital games and gaming are in all their diverse experiences and forms In challenging the common perception of video games as inherently interactive the book contributes to our understanding of the computer s influence on practices of play and prods us to think more broadly about what it means to play   *The Art of Hacking* Anto.Y,2012-03 Hacker is a person who uses his creativity and knowledge to overcome limitations often in technological contexts Introduction About Hacking If you ask a random person on the street what a hacker is they might recall ever seeing the word in connection to some criminal who hacked some website and stole for example credit card data This is the common image the media sketches of the hacker The somewhat more informed person might think that a hacker is not really a criminal but somebody with a lot of knowledge about computers and security Of course this second definition is a lot better than the first one but I still don t think it catches the essence of what makes one a hacker First of all hacking hasn t necessarily got to do with computers There have been hackers in the Medieval Ages and maybe even in the Stone Ages The fact that they used other means to express their skills and knowledge doesn t make them less than any hacker in the modern ages We are just blessed with the fact that at this moment we are all surrounded by technology a lot of people even are dependent of it   **JavaFX 9 by Example** Carl Dea,Gerrit Grunwald,José Pereda,Sean Phillips,Mark Heckler,2017-09-06 Create media rich client applications using JavaFX 9 and the Java 9 platform Learn to create GUI based applications for mobile devices desktop PCs and even the web Incorporate media such as audio and video into your applications Interface with hardware devices such as Arduino and Leap Motion Respond to gesture control through devices such as the Leap Motion Controller Take advantage of the new HTTP2 API to make RESTful web requests and WebSockets calls New to this edition are examples of creating stylized text and loading custom fonts guidance for working with Scene Builder to create visual layouts and new content on developing iOS and Android applications using Gluon mobile The book also covers advanced topics such as custom controls JavaFX 3D gesture devices printing and animation Best of all the book is full of
