Make Waves Patti B. Johnson, 2024-09-18 *Make Waves* encourages readers to step up and be the one to initiate change in their work and lives. Author Patti B. Johnson walks readers through the tools and techniques that they can use to create change in their own situations, elaborating on these tools gives readers a sense of how to encourage and instill these wave-making behaviors within their organization. Using case studies as illustrative examples, *Make Waves* highlights the important steps that individuals can take toward positive change, bridging the gap between desires and actions necessary to realize bigger changes. This new edition provides a more current and timely view of change with the expansion of the section on the mindset of a Wave Maker and more current examples. New areas of focus are: How our thoughts drive our readiness to change; Our personal backpacks and what we carry with us into every situation regardless of the facts and the importance of knowing our goals and triggers; Our habits drive almost half of our daily decisions yet a change requires us to approach our work and life differently. The most common obstacles to thinking like a Wave Maker. **People, Planet, Profit Kit**

Oung, 2022-03-17 When you see or read about excessive corporate profiteering, business malpractices, poor social welfare, and environmental and ecological disasters, do you have an urge to do something? With so many analysis reports, academic journals, news coverage, and documentaries on the subject, why is there so little action? Most management gurus and executives recognize that it is possible to achieve a triple bottom line: running a business for the benefit of the people, the planet, and profit at the same time. To achieve this, businesses have to solve their internal issues involving the leadership team, the management team, and the technical team. Drawing from leadership and management practices, practical case studies, and using energy, water, raw material waste, and its associated environmental impact as examples, *People Planet Profit* describes the ten internal issues: five technical, two leadership, and three managerial, and solutions to these issues. A coherent, joined-up, and concerted effort allows responsible businesses to initiate, gain momentum, and achieve success in reducing their environmental impact. The same tools can then be applied to other areas of a triple bottom line. Membrane Computing

Rudolph Freund, Gheorghe Paun, Grzegorz Rozenberg, Arto Salomaa, 2005-12-23 This book constitutes the thoroughly refereed, extended postproceedings of the 6th International Workshop on Membrane Computing (WMC 2005) held in Vienna, Austria, in July 2005. The 20 revised full papers presented together with 5 invited papers went through two rounds of reviewing and improvement. The papers in this volume cover all the main directions of research in membrane computing, ranging from theoretical topics in mathematics and computer science to application issues, especially in biology. More specifically, these papers present research on topics such as computational power and complexity classes, new types of P systems, relationships to Petri nets, quantum computing, and brane calculi, determinism vs. nondeterminism, hierarchies, the size of small families, algebraic approaches, and designing polynomial solutions to NP-complete problems through the use of membrane systems.

Qualitative Spatial Reasoning M. Teresa Escrig, Francisco Toledo, 1998 With the aim of automatically reasoning with spatial aspects in a cognitive way several qualitative models have been developed recently in the Qualitative Spatial Reasoning field However there is no model to reason with several spatial aspects in a uniform way Moreover most of these models simplify spatial objects to points In this book we present a novel approach for integrating the qualitative concepts of orientation distance and cardinal directions using points as well as extended objects as primitive of reasoning based on Constraint Logic Programming The resulting model has been applied to build a qualitative Navigation Simulator on the
