Nothing To Read Newspapers And Elections In A Social Experiment:

Nothing to Read Jeffery J. Mondak, 1995 Demonstrates that newspapers make a difference in elections **Candidate Character Traits in Presidential Elections** David B. Holian, Charles L. Prysby, 2014-10-03 Voter perceptions of the personal traits of presidential candidates are widely regarded to be important influences on the vote Media pundits frequently explain the outcome of presidential elections in terms of the personal appeal of the candidates Despite the emphasis on presidential character traits in the media the scholarly investigation in this area is limited In this book David Holian and Charles Prysby set out to examine the effect that trait perceptions have on the vote how these perceptions are shaped by other attitudes and evaluations and what types of voters are most likely to cast a ballot on the basis of the character traits of the presidential candidates Using the American National Election Studies ANES surveys the authors find that traits do have a very substantial effect on the vote that different candidates have advantages on different traits and that the opinions expressed by media pundits about how the candidates are viewed by the voters are often simplistic and sometimes quite mistaken Character traits are important to voters but we need a better and more complete understanding of how and why these factors influence voters An essential read which provides a clear and original argument to all those interested in furthering their understanding of the importance of candidate character traits for the quality of American elections and democracy *Social Capital and the Transition to Democracy* Gabriel Badescu, Eric Uslander, 2004-06 This edited collection presents the latest quantitative research on how post communist countries are adapting to Western models of society [The Oxford Handbook of Electoral Persuasion](#) Elizabeth Suhay, Bernard Grofman, Alexander H. Trechsel, 2020-04-01 Elections are the means by which democratic nations determine their leaders and communication in the context of elections has the potential to shape people's beliefs attitudes and actions Thus electoral persuasion is one of the most important political processes in any nation that regularly holds elections Moreover electoral persuasion encompasses not only what happens in an election but also what happens before and after involving candidates parties interest groups the media and the voters themselves This volume surveys the vast political science literature on this subject emphasizing contemporary research and topics and encouraging cross fertilization among research strands A global roster of authors provides a broad examination of electoral persuasion with international perspectives complementing deep coverage of U S politics Major areas of coverage include general models of political persuasion persuasion by parties candidates and outside groups media influence interpersonal influence electoral persuasion across contexts and empirical methodologies for understanding electoral persuasion **Public Opinion and Polling around the World** John G. Geer, 2004-07-21 Covering the intricate facets of America's most important democratic tradition this book serves as an important resource to understand how citizens' views are translated into governmental action Public Opinion and Polling around the World presents a thorough review of public opinion from its roots in colonial America to its role in today's emerging democracies More than

100 entries prepared by top scholars examine the 200 year history of public opinion measurement methodologies with an emphasis on telephone interviews and Internet polls and key figures like George Gallup and Elmo Roper who created their own polling systems An analysis of theories compares schools of thought from the fields of psychology sociology and economics and explores how people form opinions A fascinating snapshot of the public s current views on economic issues foreign policy gender gay rights and other hot button topics observes patterns across genders race ethnic origins class and religion in regions all over the world Students academicians and political observers will discover answers to such questions as does public opinion shape the behavior of government

Political Communication Richard M. Perloff, 2013-10-18 In this political communication text Richard M Perloff examines the various ways in which messages are constructed and communicated from public officials and politicians through the mass media to the ultimate receivers the people With a focus on the history of political communication he provides an overview of the most significant issues in the study of politics and the media In addition to synthesizing facts and theories and highlighting the scholarly contributions made to the understanding of political communication effects Political Communication addresses such factors as the rhetorical accomplishments of American presidents the ongoing tangles between the press and the presidency and the historical roots of politics as it is practiced and studied today It also addresses major issues about the press and politics that continually resurface such as question of press bias and the use and manipulation of media by politicians to accomplish national goals As a comprehensive and engaging introduction to contemporary political communication this volume provides all readers with a historical perspective on American politics and press and offers a unique appreciation of the strengths and virtues of political communication in America

Democracy without Journalism? Victor Pickard, 2019-11-01 Victor Pickard shows that the modern journalism crisis is the culmination of long term historical tensions and structural contradictions such as an over reliance on advertising revenue monopoly control over media infrastructures and a lack of independent oversight He looks to alternative media institutions that first evolved during the Progressive and New Deal Eras as well as public media models around the world to imagine a new kind of journalism

Democracy Without Journalism? Victor W. Pickard, 2020 As local media institutions collapse and news deserts sprout up across the country the US is facing a profound journalism crisis Meanwhile continuous revelations about the role that major media outlets from Facebook to Fox News play in the spread of misinformation have exposed deep pathologies in American communication systems Despite these threats to democracy policy responses have been woefully inadequate In *Democracy Without Journalism* Victor Pickard argues that we re overlooking the core roots of the crisis By uncovering degradations caused by run amok commercialism he brings into focus the historical antecedents market failures and policy inaction that led to the implosion of commercial journalism and the proliferation of misinformation through both social media and mainstream news The problem isn t just the loss of journalism or irresponsibility of Facebook but the very structure upon which our profit driven media system is built The rise of a

misinformation society is symptomatic of historical and endemic weaknesses in the American media system tracing back to the early commercialization of the press in the 1800s While professionalization was meant to resolve tensions between journalism's public service and profit imperatives Pickard argues that it merely camouflaged deeper structural maladies Journalism has always been in crisis The market never supported the levels of journalism especially local international policy and investigative reporting that a healthy democracy requires Today these long term defects have metastasized In this book Pickard presents a counter narrative that shows how the modern journalism crisis stems from media's historical over reliance on advertising revenue the ascendance of media monopolies and a lack of public oversight He draws attention to the perils of monopoly control over digital infrastructures and the rise of platform monopolies especially the Facebook problem He looks to experiments from the Progressive and New Deal Eras as well as public media models around the world to imagine a more reliable and democratic information system The book envisions what a new kind of journalism might look like emphasizing the need for a publicly owned and democratically governed media system Amid growing scrutiny of unaccountable monopoly control over media institutions and concerns about the consequences to democracy now is an opportune moment to address fundamental flaws in US news and information systems and push for alternatives Ultimately the goal is to reinvent journalism

Personality and the Foundations of Political Behavior Jeffery J. Mondak, 2010-06-07 The first study in more than 30 years to investigate the broad significance of personality traits for mass political behavior *Techno Politics in Presidential Campaigning* John Allen Hendricks, Lynda Lee Kaid, 2014-06-03 This volume examines the use of new media and technologies to reach voters in the 2008 US Presidential campaigns and the role these tactics played in attracting new voters and communicating with the electorate Chapters focus on how the technologies were used by candidates the press and voters

Media, Social Mobilisation and Mass Protests in Post-colonial Hong Kong Francis L. F. author. (Francis Lap Fung) Lee, Joseph Man Chan, Since 2003 Hong Kong has witnessed a series of large scale protests which have constituted the core of a reinvigorated pro democracy movement What drove tens of thousands of citizens to the street on a yearly basis to protest What were the social and organizational bases of the protest movement How did media and public discourses affect the protests formation and mobilization How did the protesters understand their own actions and the political environment This book tackles such questions by using a wide range of methods including population and protest onsite surveys media content *The Oxford Handbook of Political Psychology* Leonie Huddy, David O. Sears, Jack S. Levy, 2013-08-01 Political psychology applies what is known about human psychology to the study of politics It examines how people reach political decisions on topics such as voting party identification and political attitudes as well as how leaders mediate political conflicts and make foreign policy decisions The Oxford Handbook of Political Psychology gathers together a distinguished group of scholars from around the world to shed light on these vital questions Focusing first on political psychology at the individual level attitudes values decision making ideology personality and then moving to the collective group identity mass

mobilization political violence this fully interdisciplinary volume covers models of the mass public and political elites and addresses both domestic issues and foreign policy Now with new material providing an up to date account of cutting edge research within both psychology and political science this is an essential reference for scholars and students interested in the intersection of the two fields **The Spectacle of U.S. Senate Campaigns** Kim Fridkin Kahn, Patrick J. Kenney, 2021-03-09

This book offers a bold comprehensive look at how campaigns actually work from the framing of issues to media coverage to voters decisions In so doing it challenges the common wisdom that campaigns are a noisy symbolic aspect of electoral politics in which the outcomes are determined mainly by economic variables or presidential popularity Campaigns the authors argue do matter in the political process Examining contested U S Senate races between 1988 and 1992 Kim Kahn and Patrick Kenney explore the details of the candidates strategies and messages the content tone and bias of the media coverage and the attitudes and behaviors of potential voters Kahn and Kenney discover that when the competition between candidates is strong political issues become clearly defined and the voting population responds Through a mix of survey data content analysis and interviews the authors demonstrate how competition influences serious political debates in elections Candidates take stands and compare themselves to their opponents The news media offer more coverage of the races presenting evaluations of the candidates positions critiques of their political careers and analyses of their campaign ads In response the voters pay closer attention to the rhetoric of the candidates as they learn more about central campaign themes often adjusting their own voting criteria The book concentrates on Senate races because of the variance in campaign strategy and spending media coverage and voter reactions but many of the findings apply to elections at all levels **Impersonal**

Influence Diana C. Mutz, 1998-11-28 People s perceptions of the attitudes and experiences of mass collectives are an increasingly important force in contemporary political life In *Impersonal Influence* Mutz goes beyond simply providing examples of how impersonal influence matters in the political process to provide a micro level understanding of why information about distant and impersonal others often influence people s political attitudes and behaviors *Impersonal Influence* is worthy of attention both from the standpoint of its impact on contemporary politics and because of its potential to expand the boundaries of our understanding of social influence processes and media s relation to them The book s conclusions do not exonerate media from the effects of inaccurate portrayals of collective experience or opinion but they suggest that the ways in which people are influenced by these perceptions are in themselves not so much deleterious to democracy as absolutely necessary to promoting accountability in a large scale society *Voting the Agenda* Stephen P. Nicholson, 2021-01-12 How do voters make decisions in low information elections How distinctive are these voting decisions Traditional approaches to the study of voting and elections often fail to address these questions by ignoring other elections taking place simultaneously In this groundbreaking book Stephen Nicholson shows how issue agendas shaped by state ballot propositions prime voting decisions for presidential gubernatorial Senate House and state legislative races As a readily

accessible source of information the issues raised by ballot propositions may have a spillover effect on elections and ultimately define the meaning of myriad contests Nicholson examines issues that appear on the ballot alongside candidates in the form of direct legislation Found in all fifty states but most abundant in those states that feature citizen initiated ballot propositions direct legislation represents a large and growing source of agenda issues Looking at direct legislation issues such as abortion taxes environmental regulation the nuclear freeze illegal immigration and affirmative action Nicholson finds that these topics shaped voters choices of candidates even if the issues were not featured in a particular contest or were not relevant to the job responsibilities of a particular office He concludes that the agendas established by ballot propositions have a far greater effect in priming voters than is commonly recognized and indeed that the strategic use of initiatives and referenda by political elites potentially thwarts the will of the people

The SAGE Handbook of Political Communication Holli A Semetko, Margaret Scammell, 2012-04-03 This authoritative and comprehensive survey of political communication draws together a team of the world s leading scholars to provide a state of the art review that sets the agenda for future study It is divided into five sections Part One explores the macro level influences on political communication such as the media industry new media technology and political systems Part Two takes a grassroots perspective of the influences of social networks real and online on political communication Part Three discusses methodological advances in political communication research Part Four focuses on power and how it is conceptualized in political communication Part Five provides an international regional and comparative understanding of political communication in its various contexts The SAGE Handbook of Political Communication is an essential benchmark publication for advanced students researchers and practitioners in the fields of politics media and communication sociology and research methods

New Directions in Public Opinion Adam J. Berinsky, 2015-12-21 The field of public opinion is one of the most diverse in political science Over the last 60 years scholars have drawn upon the disciplines of psychology economics sociology and even biology to learn how ordinary people come to understand the complicated business of politics But much of the path breaking research in the field of public opinion is published in journals taking up fairly narrow questions one at a time and often requiring advanced statistical knowledge to understand these findings As a result the study of public opinion can seem confusing and incoherent to undergraduates To engage undergraduate students in this area a new type of textbook is required The second edition of New Directions in Public Opinion brings together leading scholars to provide an accessible and coherent overview of the current state of the field of public opinion Each chapter provides a general overview of topics that are at the cutting edge of study as well as well established cornerstones of the field Each contributor has made substantive revisions to their chapters and three chapters have been added on genetics and biology immigration and political extremism and the Tea Party Suitable for use as a main textbook or in tandem with a lengthier survey this book comprehensively covers the topics of public opinion research and pushes students further to explore critical topics in

contemporary politics **Doing News Framing Analysis** Paul D'Angelo, Jim A. Kuypers, 2010-02-26 Suitable for those wishing to learn about news framing this guide moves empirical inquiry forward edifies analysts of framing and producers of frames fosters understanding among the various scholarly camps of framing scholars and urges greater clarity from framing analysts in various aspects their empirical inquiry Provided by publisher **The Electoral Challenge** Stephen C. Craig, David B. Hill, 2010-07-27 What decides elections Is it the national economic condition voters partisan attachments or the campaigns that candidates run How much do campaigns matter Scholars and political consultants will give you different answers Stephen C Craig and David B Hill bring together the voices of both in this engaging volume now updated to include the volatile and groundbreaking 2008 campaigns and elections Each chapter features an essay from a top scholar in the field followed by a response from political consultants Contributors bring to bear the best literature and empirical evidence to determine what we know about the factors that drive election outcomes all while inviting students to join in the conversation

How Media Inform Democracy Toril Aalberg, James Curran, 2012-02-27 In this timely book leading researchers consider how media inform democracy in six countries the United States the United Kingdom Belgium the Netherlands Norway and Sweden Taking as their starting point the idea that citizens need to be briefed adequately with a full and intelligent coverage of public affairs so that they can make responsible informed choices rather than act out of ignorance and misinformation contributors use a comparative approach to examine the way in which the shifting media landscape is affecting and informing the democratic process across the globe In particular they ask Can a comparative approach provide us with new answers to the question of how media inform democracy Has increased commercialization made media systems more similar and affected equally the character of news and public knowledge throughout the USA and Europe Is soft news and misinformation predominantly related to an American exceptionalism based on the market domination of its media and marginalized public broadcaster This study combines a content analysis of press and television news with representative surveys in six nations It makes an indispensable contribution to debates about media and democracy and about changes in media systems It is especially useful for media theory comparative media and political communication courses
