Nounmodifying Constructions In Japanese A Framesemantic Approach Studies In Language Companion Series:

Noun-modifying Constructions in Japanese Yoshiko Matsumoto, 1997-01-01 This study examines the clausal noun modifying construction NMC in Japanese a much discussed construction that embraces what have usually been called relative clause and noun complement constructions Drawing upon a broad range of naturally occurring NMCs including types that fall outside the domains of relative clause and noun complement constructions Yoshiko Matsumoto argues for an analysis of NMCs that gives an important role to semantics and pragmatics The framework in which this approach is presented draws from and further refines concepts of frame semantics By using a frame semantic definition of semantic integration the author reveals the commonality of diverse types of NMCs in Japanese and posits a tripartite classification of NMCs which is both more comprehensive and more revealing than the traditional dichotomy between relative clause and noun complement constructions As the first comprehensive and systematic study in English of Japanese NMCs with diverse lexical heads this work is further notable for its detailed discussion of the dependence of NMCs on both linguistic and extra linguistic context

Noun-Modifying Clause Constructions in Languages of Eurasia Yoshiko Matsumoto, Bernard Comrie, Peter Sells, 2017-02-28 This volume presents a cross linguistic investigation of clausal noun modifying constructions in genetically varied languages of Eurasia Contrary to a common premise that in any language adnominal clauses that share some features of relative clauses constitute a structurally distinct construction some languages of Eurasia exhibit a General Noun Modifying Clause Construction GNMCC a single construction covering a wide range of semantic relations between the head noun and the clause Through in depth examination of naturally occurring and elicited data from Ainu languages of the Caucasus e g Ingush Georgian Bezhta Hinuq Japanese Korean Marathi Nenets Sino Tibetan languages e g Cantonese Mandarin Rawang and Turkic languages e g Turkish Sakha the chapters discuss whether or not the language in question exhibits a GNMCC and the range of noun modification covered by such a construction The findings afford us new facts new theoretical perspectives and the first step toward a more global assessment of the possibilities for GNMCCs

Nominalization in Asian Languages Foong Ha Yap,Karen Grunow-Hårsta,Janick Wrona,2011-06-29 Research on nominalization a process that gives rise to referring expressions has always played a central role in linguistic investigations Over the years there has also been growing evidence that nominalization constructions often extend to non referential domains They participate in noun modifying expressions e g genitive and relative clauses subordinate clauses and topic constructions finite structures with the nominalizers reanalyzed as TAM markers and stance constructions with evaluative attitudinal evidential and epistemic overtones This volume brings together historical and crosslinguistic evidence from more than 20 different languages representing six different language families spanning the Asian continent and the Pacific and

Indian oceans to elucidate the strategies and grammaticalization pathways that give rise to both referential and non referential uses of nominalization constructions This collection highlights the diversity of strategies and at the same time the robust cyclical nature of change within and across languages The combined diachronic and typological analyses in this volume are particularly valuable for linguistic research on diachronic morphosyntax and linguistic universals and are also an important supplementary cross referencing tool for linguistic investigations of versatile and ubiquitous morphemes in under documented languages

Usage-based Approaches to Japanese Grammar Kaori Kabata, Tsuyoshi Ono, 2014-06-15 This volume brings together papers that take usage based approaches to study the nature of human language with a focus on the grammar of Japanese The 12 chapters provide a rich array of data and methodologies with topics ranging from phonology modality and grammatical morphemes to sentential construction and discourse level phenomena such as turn taking speech register and language change As a whole they demonstrate that usage based linguistics illuminates various phenomena in the language that could not have been well accounted for by resorting solely to a formal theory such as the Universal Grammar based approach Reflecting theoretical methodological and technological advancements made in and outside the field of cognitive functional linguistics in recent years the papers contained in this volume both individually and collectively have significant implications towards linguistics in general and Japanese linguistics in particular as we as Japanese language teaching
