Planners Politics And Health Services:

Planners, Politics, and Health Services Gregory Parston, 1980 Health Planning for Effective Management William A. Reinke, 1988-04-14 Emphasizing practical considerations in designing and carrying out primary health care programs this is a superb introductory text for public health students It will be of particular interest to those working with rural populations in developing countries with limited resources Part I covers policy issues and the conceptual framework for planning management and evaluation Part II reviews essential methods for effective implementation considering the economic political epidemiologic demographic and other components that contribute to the assessment of health needs and resource allocation Part III discusses specific tools and techniques in program management related to decision analysis network analysis survey techniques cost effectiveness appraisal and much more Comprehensive and informative this highly practical work is the result of many years of experience in teaching and working with health care planners from around the world

Current Catalog National Library of Medicine (U.S.), 1980 Includes subject section name section and 1968 1970 technical reports Health Services Planning Richard K. Thomas, 2007-06-02 Health Services Planning provides the reader with an understanding of the key concepts related to the planning process and offers step by step guidelines for developing any type of plan for a community a health system or an organization The author addresses the challenge of health planning at both the community level and within the healthcare organization In addition the book provides detailed guidance on the development of strategic plans business plans and marketing plans The book provides background on the sociocultural context for health planning and the nature of the demand for health services Resource material is provided on the research process necessary to support planning activities and sources of data for health planning Illustrative material is provided through boxes and exhibits throughout the text An extensive appendix provides examples of various types of plans drawn from the experiences of the author A glossary provides the reader with definitions of key terms Readers will gain an appreciation of the importance of planning for the orderly development of health services at the community or organization level The necessary skills will be learned to allow the reader to formulate plans or at the least be able to intelligently discuss the planning process with other health professionals Health Services Planning is a useful textbook in health administration programs as well as a resource to health professionals in both public and private sector healthcare organizations who need to have an understanding of the planning process **Planning, Politics and the State** Nicholas Low, 2013-09-13 First Published in 1990 John Maynard Keynes once made the bold prediction that the three hour work day would prevail for his grandchildren s generation Seventy years later the question of working time is as pertinent as it was at the inception of the 40 hour week Not until now however has there been a global comparative analysis of working time laws policies and actual working hours Despite a century long optimism about reduced working hours and some progress in legal measures limiting working hours this book demonstrates that differences in actual working hours between industrialized and developing

countries remain considerable without any clear sign of hours being reduced This study aims to offer some suggestions about how this gap can begin to be closed most basic questions facing planning theory and practice today The author argues that it is not plans that determine the shape of cities but political processes In the 1980s state planning came under siege planners had to justify their existence to politicians the business world and the public Though planning must still be accountable neither the complete domination of the market nor traditional post war planning ideologies are wholly acceptable in the 1990s A new agenda and a major rethinking of planning from first principles is required but what form should this take Showing that political theory provides the proper foundation for understanding planning practice the book explores in turn assenting and dissenting planning paradigms Exploration of the former begins with Weber and moves through pluralism corporatism and neo liberalism Dissenting theory is organized around the work of Marx orthodox neo Marxism Gramsci s philosophy of praxis the critical theory of the Frankfurt School and the work of Habermas The author concludes with a presentation of an integrated political perspective upon planning and the state

Williams,2019-07-26 Whilst there is extensive literature analysing the design and function of new buildings and places the actual process through which development proposals are actually fashioned through complex negotiation and deal making involving many different stakeholders with different agendas is largely undocumented Conventional planning theory tends to assume a logical rational and linear decision making process which bears little relationship to reality This book aims to shed some light on that reality The King s Cross scheme is one of the largest and most complex developments taking place in Britain today The planning negotiations which took six years were probably some of the most exhaustive debates around a development ever A report of over 600 pages of technical information was eventually presented to the committee and after two evenings and ten hours of presentations and debate the committee approved the scheme by just two votes *Planning for Resilient Small and Medium-Sized Cities in Ghana* Stephen Kofi Diko,Seth Asare Okyere,Stephen Leonard Mensah,Louis Kusi Frimpong,2025-09-10 Planning for Resilient Small and Medium Sized Cities in Ghana explores the resilience and planning dynamics and complexities of rapid urban transitions in Ghana s small and medium sized cities SMCs and their implications for Africa and the Global South The book argues that Ghana s urban future may have more to do with the steady growth of SMCs where urban consolidation is gradually taking a foothold Recognizing that Ghana s primary cities are well known to be socio ecological hotspots of risk reactive urban planning and entrenched inequalities of alarming proportions

this book asks would SMCs follow these troubling realities and trajectories in large cities or leapfrog to resilient futures that work for all Through a range of interdisciplinary perspectives the contributions emphasize the need for integrated planning strategies to navigate socio ecological challenges and opportunities that SMCs face in terms of infrastructure governance and climate resilience By centering overlooked and understudied SMCs in Ghana s urban scholarship this book realigns resilience planning to the spaces and places emerging as the frontiers of socio ecological crises It will be of interest to students and researchers of city and regional planning urban studies geography environmental studies and science public policy development studies and public health as well as urban planners community development practitioners geographers environmental disaster and resilient personnel and policymakers *The Politics of Knowledge* Lily M. Hoffman,1989-01-01

In this book the author examines the question of the compatibility of politics policy making and professional work Based on nineteen case studies of organizations Hoffman looks at what happened as doctors and planners set out to redistribute services to minorities and the poor between 1960 and 1980 *Principles of Planning, Evaluation, and Research for Health Care Programs* () (Kay) M. M. M. Perrin,2020-10-12

Principles of Planning Evaluation and Research for Health Care Programs provides a basic understanding of the importance of and the key approaches used to conduct health program research and evaluations The book also examines ethical and cultural competency issues unique to conducting evaluations Additionally it offers an introduction to systems thinking and its implications for evaluating the impact of interventions Written with the undergraduate in mind this book is ideal for students pursuing a wide spectrum of health careers Through activities and case studies readers will gain a solid foundation for understanding all aspects of evaluation while developing the critical thinking skills needed to dissect peer reviewed publications as well as popular media health claims **Hearings, Reports and Prints of the Senate Committee on Labor and Public Welfare** United States. Congress. Senate. Committee on Labor and Public Welfare,1966 **The Politics and Ideology of Planning** Tim Marshall,2020-12-09

Planning is a battleground of ideas and interests perhaps more visibly and continuously than ever before in the UK These battles play out nationally and at every level from cities to the smallest neighbourhoods Marshall goes to the root of current planning models and exposes who is acting for what purposes across these battlegrounds He examines the ideological structuring of planning and the interplay of political forces which act out conflicting interest positions This book discusses how structures of planning can be improved and explores how we can generate more effective political engagements in the future *Medical Geography (Routledge Revivals)* Michael Pacione,2014-06-17

Geographers have for a long time contributed much valuable detailed data on the geographical patterns of disease and health care delivery to the medical world On its first publication in 1985 this edited collection addressed the need for a review of progress in the field of medical geography that could also shape further developments Topics under discussion include national systems of health care the utilisation of health services medical planning and medical geography in the developing world This is a comprehensive
