Planning for the International Polar Year 2007-2008 National Research Council, Division on Earth and Life Studies, Polar Research Board, Committee on International Polar Year 2007-2008: Report of the Implementation Workshop, 2005-02-04 The International Polar Year IPY 2007 2008 will be an internationally coordinated campaign of polar observations research and analysis that will further our understanding of physical and social processes in the polar regions examine their globally connected role in the climate system and establish research infrastructure for the future Within this context the IPY will galvanize new and innovative observations and research while at the same time building on and enhancing existing relevant initiatives It also will serve as a mechanism to attract and develop a new generation of scientists and engineers with the versatility to tackle complex global issues In 2004 the National Academies Polar Research Board organized a workshop to explore the challenges associated with these initiatives Planning for the International Polar Year 2007 2008 summarizes the presentations and discussions from this workshop *A Vision for the International Polar Year 2007-2008*, 2004-01-01 In 2007 2008 many nations around the world will host an intense coordinated field campaign of polar observations research and analysis called the International Polar Year This report presents an overview of potential science themes enabling technologies and public outreach opportunities that can be used to focus International Polar Year on societal needs The committee recommends that the U S scientific community and participating agencies use this opportunity to better understand environmental change and variability in the polar regions explore new scientific frontiers ranging from the molecular to the planetary scales and engage the public through varied educations and outreach activities *Lessons and Legacies of International Polar Year 2007-2008* National Research Council, Division on Earth and Life Studies, Polar Research Board, Committee on the Lessons and Legacies of International Polar Year 2007-2008, 2012-09-08 International Polar Year 2007 2008 IPY was an intense coordinated field campaign of observations research and analysis It was the largest most comprehensive campaign ever mounted to explore Earth's polar domains Legacies and Lessons of the International Polar Year 2007 2008 summarizes how IPY engaged the public to communicate the relevance of polar research to the entire planet strengthened connections with the Indigenous people of the Arctic and established new observational networks Legacies and Lessons of the International Polar Year 2007 2008 also addresses the objectives articulated for IPY in the 2004 National Research Council report *A Vision for International Polar Year* NRC 2004 These objectives include suggestions for scientific communities and agencies to use the IPY to initiate a sustained effort aimed at assessing large scale environmental change and variability in the polar regions the need to explore new scientific frontiers from the molecular to the planetary scale investment in critical infrastructure and technology to guarantee that IPY 2007 2008 leaves enduring benefits for the nation and for the residents of northern regions as well as increase public understanding of the importance of polar regions in the global system Legacies and Lessons of the International Polar Year 2007 2008 explains how activities at both poles led

to scientific discoveries that provided a step change in scientific understanding and helped translate scientific knowledge into policy relevant information At a time when the polar regions are undergoing a transformation from an icy wilderness to a new zone for human affairs these insights could not be more timely or more relevant From outreach activities that engaged the general public to projects that brought researchers from multiple disciplines and several nations together the legacies of IPY extend far beyond the scientific results achieved and valuable lessons learned from the process will guide future endeavors of similar magnitude

Climate Change and Arctic Sustainable Development UNESCO,2009-01-01 The Arctic is undergoing rapid and dramatic environmental and social transformations due to climate change This has ramifications for the entire planet as change spreads through interconnected global networks that are environmental cultural economic and political Today with the major thrust of research shifting away from deciphering causes and monitoring trends the central preoccupation of a growing circle of actors has become the exploration of strategies for responding and adapting to climate change But to understand the far reaching nature of climate change impacts and the complexities of adaptation a truly interdisciplinary approach is required Unique in the UN system UNESCO brings together the domains of natural sciences social sciences culture education and communication Given this broad mandate UNESCO favors integrated approaches for monitoring and adapting to climate change in the Arctic fostering dialogue among scientists circumpolar communities and decision makers This book brings together the knowledge concerns and visions of leading Arctic scientists in the natural and social sciences prominent Chukchi Even Inuit and Saami leaders from across the circumpolar North and international experts in education health and ethics They highlight the urgent need for a sustained interdisciplinary and multi actor approach to monitoring managing and responding to climate change in the Arctic and explore avenues by which this can be achieved

Publisher s description **Genetic Resources and Traditional Knowledge** Tania Bubela,E. Richard Gold,2012-01-01 This fascinating study describes efforts to define and protect traditional knowledge and the associated issues of access to genetic resources from the negotiation of the Convention on Biological Diversity to the Declaration on the Rights of Indigenous Peoples and the Nagoya Protocol Drawing on the expertise of local specialists from around the globe the chapters judiciously mix theory and empirical evidence to provide a deep and convincing understanding of traditional knowledge innovation access to genetic resources and benefit sharing Because traditional knowledge was understood in early negotiations to be subject to a property rights framework these often became bogged down due to differing views on the rights involved New models developed around the notion of distributive justice and self determination are now gaining favor This book suggests through a discussion of theory and contemporary case studies from Brazil India Kenya and Canada that a focus on distributive justice best advances the interests of indigenous peoples while also fostering scientific innovation in both developed and developing countries Comprehensive as well as nuanced Genetic Resources and Traditional Knowledge will be of great interest to scholars and students of law political science anthropology and geography National and international
