Preparing For Korean Unifications Scenarios And Implications:

Preparing for Korean Unification Jonathan D. Pollack, Chung Min Lee, 1999 This study examines four alternative scenarios that would result in the unification of the Korean peninsula The authors describe the defining characteristics of each scenario potential indicators that would predict specific outcomes some possible variations in paths to unification and some operational implications for the U S Army under different conditions and circumstances The four scenarios peaceful unification collapse and absorption unification through armed conflict and disequilibrium and external intervention highlight both the increasing vulnerabilities of the North Korean state and the substantial uncertainties that attach to each outcome and to the potential U S policy responses

Preparing for the Possibility of a North Korean Collapse Bruce W. Bennett, 2013-09-19 A North Korean government collapse would have serious consequences in North Korea and beyond At the very least a collapse would reduce the already scarce food and essential goods available to the population in part due to hoarding and increasing costs This could lead to a humanitarian disaster Factions emerging after a collapse could plunge the country into civil war that spills over into neighboring countries Weapons of mass destruction WMD could be used and even proliferated This report examines ways of controlling and mitigating the consequences recognizing that the Republic of Korea ROK and its U S ally will almost certainly need to intervene militarily in the North likely seeking Korean unification as the ultimate outcome But such an intervention requires serious preparation North Koreans must be convinced that they will be treated well and could actually have better lives after unification The allies need to prepare to deliver humanitarian aid in the North stop conflict demilitarize the North Korean military and security services over time and secure and eventually eliminate North Korean WMD Potential Chinese intervention must be addressed ideally leading to cooperation with ROK and U S forces Plans are needed for liberating North Korean political prisons before the guards execute the prisoners Property rights need to be addressed The ROK must sustain its military capabilities despite major reductions in force size due to very low birthrates And ROK reluctance to broadly address North Korean collapse must be overcome so that plans in these areas can move forward

Chapter 1-8 analyze the cost of division and the benefits of unification from the security and economic perspective of the United States, Japan, China, and Russia. Chapter 9 and 10 look at the bigger picture by discussing the division cost and benefits of unification from the standpoint of the Asia Pacific region as a whole. Based on the analyses of the chapters, the conclusion chapter examines the similarities and differences of the division cost that the four powers must bear as well as the benefits they will obtain.

All Possible Wars? Sam J. Tangredi, 2000 This survey is a product of the Quadrennial Defense Review QDR 2001 Working Group a project of the Institute for National Strategic Studies at the National Defense University Sponsored by the Chairman of the Joint Chiefs of Staff the working group is an independent honest broker effort intended to build intellectual capital for the upcoming QDR More specifically it aims to frame issues develop options and provide insights for the Chairman the services and the next administration in three areas defense strategy criteria for sizing conventional forces and force structure for 2005 2010 One of the group's initial tasks was to assess the future security environment to the year 2025 This was pursued by surveying the available literature to identify areas of consensus and debate The goal was to conduct an assessment that would be far more comprehensive than any single research project or group effort could possibly produce This survey documents major areas of agreement and disagreement across a range of studies completed since the last QDR in 1997 Because it distills a variety of sources and organizes and compares divergent views this volume makes a unique contribution to the literature It also provides a particularly strong set

of insights and assumptions on which both strategists and force planners can draw in the next Quadrennial Defense Review This survey does not claim to predict or illustrate all possible wars that Anmrca might face between now and the year 2025 Rather it attempts through analysis of representative and reputable sources to incorporate the most likely characteristics of the future security environment into a single scenario while heightening our awareness of dissenting viewpoints and plausible wild cards Asian Security Handbook 2000 David G. Wiencek,2000 **Nuclear North Korea** Victor D. Cha,David C. Kang,2018-09-11 Victor D Cha and David C Kang s Nuclear North Korea was first published in 2003 amid the outbreak of a lasting crisis over the North Korean nuclear program It promptly became a landmark of an ongoing debate in academic and policy circles about whether to engage or contain North Korea Fifteen years later as North Korea tests intercontinental ballistic missiles and the U S president angrily refers to Kim Jong un as Rocket Man Nuclear North Korea remains an essential guide to the difficult choices we face Coming from different perspectives Kang believes the threat posed by Pyongyang has been inflated and endorses a more open approach while Cha is more skeptical and advocates harsher measures though both believe that some form of engagement is necessary the authors together present authoritative analysis of one of the world s thorniest challenges They refute a number of misconceptions and challenge the faulty thinking that surrounds the discussion of North Korea particularly the idea that North Korea is an irrational actor Cha and Kang look at the implications of a nuclear North Korea assess recent and current approaches to sanctions and engagement and provide a functional framework for constructive policy With a new chapter on the way forward for the international community in light of continued nuclear tensions this book is of lasting relevance to understanding the state of affairs on the Korean peninsula

The United States and Asia ,2001 Publisher Provided Annotation The past 20 years have been a time of relative peace in Asia and notwithstanding the 1997 1998 financial crisis a period of robust economic growth as well Currently however Asia is beset by a variety of problems that could well imperil the stability it has long enjoyed including territorial disputes nuclear rivalry rising nationalist sentiments and increased military capabilities This report summarizes the manner in which the United States can best meet these challenges and thereby ensure continued peace and stability in the region In the interests of this goal the report outlines an integrated political military and economic strategy that the United States can pursue to inhibit the growth of rivalries in Asia and more broadly prevent the rise of instability in the region Also delineated are changes in U S military posture that will be made necessary by this strategy **The Stryker Brigade Combat Team** Alan J. Morgan,Karl P. Mueller,Evan S. Medeiros,Kevin L.

Pollpeter, Roger Cliff, 2008-07-29 Escalation is a natural tendency in any form of human competition and today's security environment demands that the United States be prepared for a host of escalatory threats This analysis of escalation dynamics and approaches to escalation management draws on a range of historical examples from World War I to the struggle against global Jihad to inform escalation related decisionmaking **Nuclear Deterrence and Defense** James M. Smith, 2001

Dillon, 2007 The People's Republic of China has emerged as a significant regional superpower At best China will be an economic challenge to the United States at worst the PRC will be a very real national security threat Dillon persuasively argues that a Cold War mentality cannot work against China The U S must instead craft an ambitious new geostrategic plan
