# PATENT ABUSES KEEP PRESCRIPTION DRUGS UNAFFORDABLE

*Charlie Katel*

## TOPLINE POINTS

- ★ The cost of prescription drugs has skyrocketed over the past 10 years.
- ★ A key reason drugs are so expensive is that brand-name drug manufacturers abuse America's patent system and the Food and Drug Administration's drug approval process to artificially block generic competition and raise prices.
- ★ Policymakers can enhance competition and make prescription drugs more affordable by closing loopholes in America's patent system that allow brand-name drug manufacturers to delay competition.

America's patent system and the Food and Drug Administration's (FDA) drug approval process have promoted enormous pharmaceutical breakthroughs that have saved and improved the lives of millions of Americans. Unfortunately, both systems also contain numerous loopholes that allow drug manufacturers to block competitors from selling affordable generic versions of their drugs.

These patent abuses have significantly increased the cost of prescription drugs and made it harder for patients to access the medications they need. A plentiful supply of generic options is essential to lowering the cost of prescription drugs. Policymakers must close the loopholes in America's patent system and drug approval process and end these harmful abuses. This will ensure that families can access cutting-edge pharmaceutical innovations and affordable generic drugs.

**Presidential Road Show** Diane J. Heith, 2015-12-03 In *The Presidential Road Show: Public Leadership in an Era of Party Polarization and Media Fragmentation* Diane J. Heith evaluates presidential leadership by critically examining a fundamental tenet of the presidency: the national nature of the office. The fact that the entire nation votes for the office seemingly imbues the presidency with leadership opportunities that rest on appeals to the mass public. Yet presidents earn the office not by appealing to the nation but rather by assembling a coalition of supporters, predominantly partisans. Moreover, once in office, recent presidents have had trouble controlling their message in the fragmented media environment. The combined constraints of the electoral coalition and media environment influence the nature of public leadership presidents can exercise. Using a data set containing not only speech content but also the classification of the audience, Diane J. Heith finds that rhetorical leadership is constituency driven and targets audiences differently. Comparing tone, content, and tactics of national and local speeches reveals that presidents are abandoning national strategies in favor of local leadership efforts that may be tailored to the variety of political contexts a president must confront.

**Drugs 101, 2nd Edition** Margaret O. Hyde, John F. Setaro, MD, 2013-01-01 What are illicit drugs? Why do people use them? What are the effects on the body of using drugs? Are some drugs more dangerous than others? What is addiction? Why are some people able to stop using drugs at will while others become addicted? Respected science author Margaret O. Hyde and Yale University School of Medicine physician John F. Setaro take a fresh approach to the problem of drug abuse among teens. This book looks at drugs and drug abuse honestly and realistically, from a review of the intoxicating and health effects of drugs to the war on drugs to the debate over legalization. The authors' straightforward descriptions of the physical, psychological, social, and legal effects of drug use will be highly informative to those teens in the process of making a decision about drugs. The book will also benefit the one out of ten American teens who have already used drugs and will be invaluable to the many for whom drugs have become a dependency.
