Prescription Games Money Ego And Power Inside The Global Pharmaceutical Industry:

Prescription Games Jeffrey Robinson, 2001 The major pharmaceutical companies according to John le Carr who has based his novel *The Constant Gardener* on their depredations are engaged in the systematic corruption of the medical profession country by country Jeffrey Robinson can back up that charge In *Prescription Games* Jeffrey Robinson exposes the yawning abyss between the claims to altruism made by pharmaceutical companies and the harsh reality of their everyday practice When the industry claims that the enormous markup they charge for new drugs pays the cost of developing new ones they don't say that as much as 80 per cent of R D money is actually directed at developing drugs designed to compete with existing brands or at creating variations on drugs whose patents are about to expire expenditures only the industry itself and its shareholders will benefit from Within the industry there are blockbuster drugs that create vast wealth for the companies that manufacture them Most are designed to treat conditions that are endemic among prosperous western populations that can afford them But there are no blockbuster drugs to treat diseases like tuberculosis cholera and malaria that ravage the Third World because Third World countries can't afford the prices People in Africa and Asia die from new strains of tuberculosis while people in Europe and North America are offered expensive treatments for obesity hair loss and sexual dysfunction In this hard hitting exposé Robinson also examines the extension of patent protection the end of generic drug competition in Canada the Nancy Olivieri scandal how a drug manufacturer fought to conceal research findings that would damage sales of its product the illicit drug trade and espionage among drug manufacturers

Cry for Health Jesse Sleeman, 2010 Since the 1950s the prevalence of the so called diseases of civilisation cancer heart disease strokes diabetes autoimmune diseases autism and so on has continued to skyrocket in Western countries Today as the same story is beginning to be repeated in newly industrialised nations modern diseases are reaching pandemic proportions Why has this happened The medical profession s spin is that the culprit is the aging of the

population But as Cry for Health Vol 1 reveals there is overwhelming evidence for why our populations are ailing evidence health authorities and governments have chosen to ignore or have refused to acknowledge or have kept hidden from the public to keep them clueless to the real culprits many modern technologies and our modern lifestyles In unravelling this story the book firstly identifies the extent of the modern pandemic the saga of death by doctoring and the many reasons for iatrogenic disease secondly it exposes the failure of medical science to fully understand life health and disease because of its denial of the existence of the vital force and thirdly it explores the impact of man made chemicals electropollution and modern farming and food processing practices on our health

An Imperfect Offering James Orbinski,2010-11-01 This book is a series of stories in which I ask again and again how to be in relation to the suffering of others It is a personal narrative about the political journey I have taken over the last twenty years as a humanitarian doctor as a citizen and as a man This is a story about a way of seeing that requires humility so that one can recognize the sameness of self in the other It is about the mutuality that can exist between us if we so choose I have come to see humanitarianism not as separate from politics but in relation to it and as a challenge to political choices that too often kill or allow others to be killed Speaking is the first political act It is the first act of liberty and it always implicitly involves another In speaking one inherently recognizes that I am and I am not alone In this space lies our humanity Having seen things we hope never to see confronted suffering dispassion and evil we hope never to encounter and faced deep personal torment James Orbinski still believes in the good we can be if we so choose His chosen medium is stories from his own experience a form of testimony from the front lines embodied in which are warnings hope and lessons in how we can inject humanitarian activity into our lives Being political he has discovered is not only reserved for politicians admitting imperfection is essential to compassion The crystal clarity of Orbinski s voice is matched by the urgency of his message at a time of great political and moral uncertainty *An Imperfect Offering* is invaluable reading for anyone who feels he she can make a difference

Crime and Regulation Fiona Haines,2017-11-30 This volume brings together key articles in the burgeoning field of regulation The collection is interdisciplinary in keeping with study of regulation itself yet the book arranges and explores these articles to make the bewildering array of issues and concepts that comprise the study of regulation comprehensible to a criminological audience It will be of interest to all scholars and students of criminology and criminal justice as well as those concerned with reducing the crimes and harms of the powerful
