Prescription For Preventing Aids Cure:

Prescribing HIV Prevention Nicola Bulled, 2016-06-16 Critical health communication scholars point out that the acceptance of HIV risk prevention methods are bound inside inequitable structures of power and knowledge Nicola Bulled's in depth ethnographic account of how these messages are selected transmitted and reacted to by young adults in the AIDS torn population of Lesotho in southern Africa provides a crucial example of the importance of a culture centered approach to health communication She shows the clash between traditional western perceptions of how increased knowledge will increase compliance with western ideas of prevention and mixed messages offered by local religious educational and media institutions Bulled also demonstrates how structural and geographical forces prevent the delivery and acceptance of health messages and how local communities shape their own knowledge of health disease and illness This volume will be of interest to medical anthropologists and sociologists to those in health communication and to researchers working on issues related to HIV

Global

Prescriptions Rosalind P. Petchesky, 2003-08 Global Prescriptions is a critical yet optimistic analysis of the role of transnational women's groups in setting the agendas for women's health in international and national settings. The book reviews a decade of women's participation in UN conferences, transnational networks, national advocacy efforts, and sexual and reproductive health provision, assessing both their strengths and weaknesses. It critiques the Cairo, Beijing, and Copenhagen conference documents and World Bank, WHO, and health sector reform policies. It also offers case studies of national level reform and advocacy efforts and appraises the controversy concerning TRIPS trade and essential AIDS drugs. The author takes into account the formidable political and ideological forces confronting global justice movements and also offers a sobering reassessment of transnational women's NGOs themselves and such problems as NGOization, fragmentation, and donor dependency. Petchesky argues that the power of women's transnational coalitions is only as great as their organic connection with grassroots social movements.

Multicultural Human Services for AIDS Treatment and Prevention Marcia Bok, Julio Morales, 2014-05-01 This much needed book presents an introduction and overview of multicultural AIDS issues in social work practice. In a culturally diverse nation, it is essential that professionals look at AIDS within a cultural context in order to find the most effective treatment and prevention strategies for everyone. Emphasizing this need for a culturally sensitive approach, Multicultural Human Services for AIDS Treatment and Prevention increases social workers' often limited knowledge and experience with various social and ethnic groups. It provides specific suggestions and recommendations for program development and acts as a foundation upon which to build new strategies for policy research and practice. Multicultural Human Services for AIDS Treatment and Prevention emphasizes the importance of encouraging and sharing research that addresses AIDS and minority populations and assessing prevention, education, and behavioral change strategies from culturally specific and relevant perspectives. It includes chapters focusing on African Americans, Native American Indians, Hawaiians, Puerto Ricans, and Mexican prostitutes, groups that often suffer disproportionately from poverty and its myriad effects. Some topics discussed in the book are helping clients reduce cultural dissonance, how to enhance behavior change, child welfare, and permanency planning, empowerment of clients, and health care models, knowledge, attitudes, and behaviors regarding HIV/AIDS, cultural contradictions, and ambivalence in response to AIDS. Multicultural Human Services for AIDS Treatment and Prevention is an extremely useful and informative book for all professionals in social work and human services who want to be better prepared to help all groups of people. The book is also an ideal text for upper level social work students studying topics such as multicultural issues in social work practice, AIDS in a cultural context, and health policy and health care systems.
