**Presenting Service** Lendal Henry Kotschevar,1999      *Communication and Information Technology in Society* Jolanta Kowal,Anna Kuzio,Mirosława Wawrzak-Chodaczek,2016-04-26 These volumes explore a number of significant and interdisciplinary questions relevant to the wider debate regarding the use of information and communication technologies ICT in a variety of research fields including management education science and the media Bringing together research from European countries currently in a state of transition all three volumes mark a significant contribution to the wider discussion on the role of ICT in today s world

**Web Services** Gustavo Alonso,Fabio Casati,Harumi Kuno,Vijay Machiraju,2013-03-14 Like many other incipient technologies Web services are still surrounded by a tremendous level of noise This noise results from the always dangerous combination of wishful thinking on the part of research and industry and of a lack of clear understanding of how Web services came to be On the one hand multiple contradictory interpretations are created by the many attempts to realign existing technology and strategies with Web services On the other hand the emphasis on what could be done with Web services in the future often makes us lose track of what can be really done with Web services today and in the short term These factors make it extremely difficult to get a coherent picture of what Web services are what they contribute and where they will be applied Alonso and his co authors deliberately take a step back Based on their academic and industrial experience with middleware and enterprise application integration systems they describe the fundamental concepts behind the notion of Web services and present them as the natural evolution of conventional middleware necessary to meet the challenges of the Web and of B2B application integration Rather than providing a reference guide or a how to write your first Web service kind of book they discuss the main objectives of Web services the challenges that must be faced to achieve them and the opportunities that this novel technology provides Established as well as recently proposed standards and techniques e g WSDL UDDI SOAP WS Coordination WS Transactions and BPEL are then examined in the context of this discussion in order to emphasize their scope benefits and shortcomings Thus the book is ideally suited both for professionals considering the development of application integration solutions and for research and students interesting in understanding and contributing to the evolution of enterprise application technologies

**Managing Services** Kathryn Haynes,Irena Grugulis,2014 The book is a collection of perspectives on service and service management written by leading researchers in the field It considers the range and importance of services the challenges of managing services and recent contemporary innovations in services and service management **Interactive TV Standards** Steven Morris,Anthony Smith-Chaigneau,2012-08-06 For any digital TV developer or manager the maze of standards and

specifications related to MHP and OCAP is daunting you have to patch together pieces from several standards to gather all the necessary knowledge you need to compete worldwide The standards themselves can be confusing and contain many inconsistencies and missing pieces Interactive TV Standards provides a guide for actually deploying these technologies for a broadcaster or product and application developer Understanding what the APIs do is essential for your job but understanding how the APIs work and how they relate to each other at a deeper level helps you do it better faster and easier Learn how to spot when something that looks like a good solution to a problem really isn't Understand how the many standards that make up MHP fit together and implement them effectively and quickly Two DVB insiders teach you which elements of the standards that are needed for digital TV highlight those elements that are not needed and explain the special requirements that MHP places on implementations of these standards Once you've mastered the basics you will learn how to develop products for US European and Asian markets saving time and money By detailing how a team can develop products for both the OCAP and MHP markets Interactive TV Standards teaches you how to leverage your experience with one of these standards into the skills and knowledge needed to work with the critical related standards Does the team developing a receiver have all the knowledge they need to succeed or have they missed important information in an apparently unrelated standard Does an application developer really know how to write a reliable piece of software that runs on any MHP or OCAP receiver Does the broadcaster understand the business and technical issues well enough to deploy MHP successfully or will their project fail Increase your chances of success the first time with Interactive TV Standards

**Implementing Service Quality in IP Networks** Vilho Räsänen, 2003-07-25 While more and more data is shifted from circuit switched to packet switched networks the users of these networks expect a smooth continuously unproblematic service unrelated to the amount of data transported Therefore the reliability of a network as well as the satisfaction of its users relies largely on Quality of Service QoS Service quality through resource management in IP networks will ensure that sufficient resources are available to fulfil the delay of applications and packet loss requirements This year several books on QoS from the angle of operators engineers have been published HOWEVER none of these titles tackle the management side of the problem This book shows how to determine quality requirements of services it discusses and considers the various means of allocating network resources and of supervising the service quality Furthermore it explores strategies for allocating network resources and their relation to revenue or operator utility as well as service allocation optimization The book concludes with a Nokia case study that illustrates the previously mentioned concepts Essential reading for networking professionals wishing to understand service quality management in IP networks as well as students needing to understand principles and basic techniques of service quality management
