Presidency And The Management Of National Security:

The Presidency and the Management of National Security Carnes Lord, 1988 In this brilliant examination of the management of national security over the past 40 years a former officer of the National Security Council explores the creation of the NSC its changing function and its uses and misuses by presidents along with specific suggestions for corrections

Managing National Security Policy William W. Newmann, 2010-06-15 The U S national security decision making system is a product of the Cold War Formed in 1947 with the National Security Council it developed around the demands of competing with and containing the USSR But the world after the collapse of communism and particularly the tragedy of September 11 is vastly different A threatening but familiar enemy has given way to a complex environment of more diverse and less predictable threats As the creation of the Homeland Security Council and Office of Homeland Security indicate the United States must now reevaluate standard national security processes for this more uncertain world In this timely book William W Newmann examines the way presidents manage their advisory process for national security decision making and the way that process evolves over the course of an administration s term Three detailed case studies show how the president and his senior advisors managed arms control and nuclear strategy during the first terms of the Carter Reagan and G H W Bush presidencies These studies enhanced by interviews with key members of the national security teams including James Baker Brent Scowcroft and Zbigniew Brzezinski reveal significant patterns of structure and adaptation They provide a window to how decision making in the modern White House really works at a moment when national security decisions are again at the top of the agenda Specifically Newmann investigates this pattern Each president begins his administration with a standard National Security Council based interagency process which he then streamlines toward a reliance on senior officials working in small groups and a confidence structure of a few key advisors Newmann examines the institutional pressures that push administrations in this direction as he also weighs the impact of the leadership styles of the presidents themselves In so doing he reaches the conclusion that decision making can be an audition process through which presidents discover which advisors they trust And the most successful process is one that balances formal informal and confidence sources to maintain full discussion of diverse opinions while settling those debates informally at the senior most levels Unlike previous studies Managing National Security Policy views decision making as dynamic rather than as a static system inaugurated at the beginning of a president s term The key to understanding the decision making process rests upon the study of the evolving relationships between the president and his senior advisors Awareness of this evolution paints a complex portrait of policy making which may help future presidents design national security decision structures that fit the realities of the office in today s world

Policy Vincent Boucher Charles Philippe David and Karine Pr mont develop a new concept to study entrepreneurial behaviour among foreign policy advisers and offer the first comprehensive framework of analysis to answer this crucial question why do some entrepreneurs succeed in guaranteeing the adoption of novel policies while others fail They explore case studies of attempts to reorient US foreign policy waged by National Security Council entrepreneurs examining the key factors enabling success and the main forces preventing the adoption of a preferred option the entrepreneur s profile presidential leadership major players involved in the policy formulation and decision making processes the national political context and the presence or absence of significant opportunities By carefully analyzing significant diplomatic and military decisions of the Johnson Nixon Reagan and Clinton administrations and offering a preliminary account of contemporary national security entrepreneurship under presidents George W Bush Barack Obama and Donald Trump this book makes the case for an agent based explanation of foreign policy change and continuity

LBJ and the Presidential Management of Foreign Relations Paul Y. Hammond, 2010-07-22 In this insightful study Paul Y Hammond an experienced analyst of bureaucratic politics adapts and extends that approach to explain and evaluate the Johnson administration s performance in foreign relations in terms that have implications for the post Cold War era The book is structured around three case studies of Johnson s foreign policy decision making The first study examines economic and political development It explores the way Johnson handled the provision of economic and food assistance to India during a crisis in India s food policies This analysis provides lessons not only for dealing with African famine in later years but also for assisting Eastern Europe and the former Soviet Union The second case study focuses on U S relations with Western Europe at a time that seemed to require a major change in the NATO alliance Here Hammond illuminates the process of policy innovation particularly the costs of changing well established policies that embody an elaborate network of established interests The third case study treats the Vietnam War with special emphasis on how Johnson decided what to do about Vietnam Hammond critiques the rich scholarship available on Johnson s advisory process based on his own reading of the original sources These case studies are set in a larger context of applied theory that deals more generally with presidential management of foreign relations examining a president s potential for influence on the one hand and the constraints on his or her capacity to control and persuade on the other It will be important reading for all scholars and policymakers interested in the limits and possibilities of presidential power in the post Cold War era

Difficult Transitions Kurt M. Campbell, James B. Steinberg, 2009-11-09 New presidents have no honeymoon when it comes to foreign policy Less than three months into his presidency for example John F Kennedy authorized the disastrous effort to overthrow Fidel Castro at the Bay of Pigs More recently George W Bush had been in office for less than eight months when he was faced with the attacks of September 11 How should an incoming president prepare for the foreign policy challenges that lie immediately ahead That s the question Kurt Campbell and James Steinberg tackle in this compelling book Drawing on their decades of government service in the corridors of Capitol Hill the intimate confines of the White House the State Department and the bare knuckles Pentagon bureaucracy Campbell and Steinberg identify the major foreign policy pitfalls that face a new presidential administration They explain clearly and concisely what it takes to get foreign policy right from the start The authors set the scene with a historical overview of presidential transitions and foreign policy including case studies of such prominent episodes as the Black Hawk Down tragedy in Somalia that shook the Clinton administration in its first year and the Bush administration s handling of the collision between a U S reconnaissance plane and a Chinese fighter jet in the spring of 2001 They pinpoint the leading causes of foreign policy fiascos including the tendency to write off the policies of the outgoing administration and the failure to appreciate the differences between campaign promises and policy realities Most important they provide a road map to help the new administration steer clear of the land mines ahead America s next president will confront critical foreign policy decisions from day one Dif ficult Transitions provides essential guidance for getting those choices right
