Perspectives on Presidential Leadership Michael Patrick Cullinane, Clare Frances Elliott, 2014-02-18. In 2011 Barack Obama invited ten distinguished biographers to the White House to ask them one question: which past American president should I emulate? This was not the first time Obama asked scholars this, but the answer he received would differ as presidential legacies waxed and waned. In 2008 Obama chose Lincoln, in 2009 Reagan, and in 2010 Theodore Roosevelt. *Perspectives on Presidential Leadership* is an examination of presidential legacy, and in particular an analysis of the first ever UK ranking of American presidents which took place in 2011. In thirteen chapters, thirteen individual presidential administrations are assessed. Some presidents have been considered a success, others a failure; both types are featured in these thirteen case studies in a measured attempt to understand how the perception of presidential leadership evolves, shifts, and contorts across three centuries of American politics. The case studies also derive from the expertise of the collected British, Irish, and Canadian authors, all of whom are leading scholars in their fields, and many of which took part in the 2011 survey. At a time when understanding presidential legacy is in high demand, this book offers a unique international perspective. Through extended commentary and interdisciplinary study of the UK perspective, it provides groundbreaking research. **Problems of Communism**, 1987 *Daily Report, Foreign Radio Broadcasts* United States. Central Intelligence Agency, 1963.

Dangerous Ground Scott Ritter,2010-03-30 In *Dangerous Ground* Scott Ritter one of the world's leading experts on arms control tells a bold and revisionist account of the inseparable histories of the post World War II American presidency and nuclear weapons Unpacking sixty years of nuclear history Ritter shows that nuclear weapons have become such a fixture that they define present day America on economic military political and moral grounds And despite fears of global nuclear proliferation the greatest threat to international stability Ritter argues is the US's addiction to nuclear weapons Even in light of Barack Obama's historic speech in April 2009 which called for the eventual abolition of nuclear weapons America continues to guard a significant and dangerous nuclear stockpile The notion that we are more secure with nuclear weapons is deeply entrenched in the American psyche and virulently protected by forces in the US establishment As long as this paradigm persists Ritter suggests there will be no fundamental US policy change and as such no change in global nuclear proliferation
