Constrained Effects of Rhetoric suggests that while presidents have increased their rhetoric regarding the economy they have not had much success in shaping it. Considering this research, Arthur argues that the president's decision to address the economy so often must stem from a symbolic placation or institutional necessity that is intended to comfort constituencies or somehow garner electoral advocacy from the party's base. No other viable explanation exists given the lack of results presidents obtain from discussing the economy and their persistent determination to do so. This discrepancy suggests that presidential rhetoric on the economy is at best a tool used to appear concerned to everyone and toe the party line to their base. Arthur presents an overview of economic rhetoric from the presidential office that will be of interest to scholars of the economy and political communication.

### **The Politics of Economic Leadership**

B. Dan Wood, 2021-02-09 The American president is widely viewed by the public and media as the nation s single most influential political and economic figure But social scientists have often concluded that presidential words fall on deaf ears or have little lasting impact on policy or public opinion Then why did Bill Clinton make 12 798 public references to the economy during his eight years in office compared with Harry Truman s mere 2 124 during his own two terms Why George W Bush s 3 351 remarks during his first term Did all these words matter The Politics of Economic Leadership is the first comprehensive effort to examine when why and how presidents talk about the economy as well as whether the president s economic rhetoric matters It demonstrates conclusively that such presidential words do matter Using an unprecedented compendium of every known unique statement by U S presidents about the economy from World War II through the first George W Bush administration Dan Wood measures the relative intensity and optimism of presidents economic rhetoric His pathbreaking statistical analysis shows that presidential words can affect everything from approval of the president s job performance to perceptions of economic news consumer confidence consumer behavior business investment and interest rates The impacts are both immediate and gradual Ultimately Wood concludes rhetoric is indeed a tool of presidential leadership that can be used unilaterally to affect a range of political and economic outcomes

### **Interactive Political Leadership**

Eva Sørensen, 2020-01-09 Building on recent theories of interactive governance and political leadership Interactive Political Leadership develops a concept of interactive political leadership and a theoretical framework for studying the role of elected politicians in the age of governance The purpose of the theoretical framework is to inspire and guide empirical research into how elected politicians perform political leadership in a society where citizens and other stakeholders play an active role in making and implementing political decisions and what barriers challenges and dilemmas they encounter in relation to the performance of interactive political leadership The research framework draws extensively on recent theories of interactive governance and political leadership and other new developments in political science and public administration research Moreover it finds inspiration in current tendencies and embryonic examples of interactive political leadership performed by

elected politicians operating at different levels of governance in Western liberal democracies The basic assumption is that political legitimacy is essential for the survival of a political system and that interactive political leadership stands out as a promising way of securing what political scientists denote as input throughput output and outcome legitimacy in the age of governance Hence interactive political leadership aims to establish a bridge between representative democracy and emergent forms of political participation to promote political learning and accountability to strengthen the political entrepreneurship of elected politicians and to advance the political system s implementation capacity through resource mobilization The book develops 20 propositions that sets the agenda for a new and much needed field of empirical research into political leadership in the age of governance
