Truman, 1948, Volume 4 Truman, Harry S., 1963-01-01 Public Papers of the Presidents of the United States *The Myth of Presidential Representation* B. Dan Wood, 2009-06-22 The Myth of Presidential Representation evaluates the nature of American presidential representation examining the strongly embedded belief held by the country's founders as well as current American political culture and social science theory that presidents should represent the community at large Citizens expect presidents to reflect prevailing public sentiment and compromise in the national interest Social scientists express these same ideas through theoretical models depicting presidential behavior as driven by centrism and issue stances adhering to the median voter Yet partisanship seems to be a dominant theme of modern American politics Do American presidents adhere to a centrist model of representation as envisioned by the founders Or do presidents typically attempt to lead the public toward their own more partisan positions If so how successful are they What are the consequences of centrist versus partisan presidential representation The Myth of Presidential Representation addresses these questions both theoretically and empirically **The Provisional Pulpit** Brandon Rottinghaus, 2010-04-07 The cornerstone of the public presidency is the ability of the White House to influence shape and even manipulate public opinion Ultimately although much has been written about presidential leadership of opinion we are still left with many questions pertaining to the success of presidential opinion leadership efforts throughout the modern presidency What is still missing is a systematic sequential approach to describe empirical trends in presidential leadership of public opinion in order to expand on important scholarly queries to resolve empirical disputes in the literature and to check the accuracy of conventional political wisdom on how when and under what conditions presidents lead public opinion In The Provisional Pulpit Brandon Rottinghaus develops a simple theory of presidential leadership arguing that presidential messages are more likely to be received if there are fewer countervailing agents or messages to contradict the president's message He concludes based upon the findings presented in this book that the bully pulpit is largely provisional for modern presidents The more the president can avoid the political echo chamber associated with partisan battles or communications the better the chance the president has to lead public opinion The Provisional Pulpit adds an important layer of understanding to the issue of how and under what conditions presidents lead public opinion All modern presidents clearly attempt to lead public opinion often due to factors outside their control they fail This book is an exploration into how and when they succeed **Presidential Saber Rattling** B. Dan Wood, 2012-08-27 The founders of the American republic believed presidents should be wise and virtuous statesmen consistently advocating community interests when conducting American foreign policy Yet the most common theoretical model used today for explaining the behavior of politicians is grounded in self interest rather than community

interest This book investigates whether past presidents acted as noble statesmen or were driven by such self interested motivations as re election passion partisanship media frenzy and increasing domestic support The book also examines the consequences for the nation of presidential behavior driven by self interest Between 1945 and 2008 presidents issued 4 269 threats to nineteen different countries Professor B Dan Wood evaluates the causes and consequences of these threats revealing the nature of presidential foreign policy representation and its consistency with the founding fathers intentions
