*The Press, Presidents, and Crises* Brigitte Lebens Nacos, 1990      *Presidential Crisis Rhetoric and the Press in the Post-Cold War World* Jim A. Kuypers, 1997-08-26 Kuypers combines rhetorical theory and framing analysis in an examination of the interaction of the press and the president during international crisis situations in the post Cold War world Three crises are examined Bosnia Haiti and the North Korean nuclear capability issue Kuypers effectively demonstrates the changed nature of presidential crisis rhetoric since the end of the Cold War Kuypers employs a new historical critical approach to analyze both the press and the Clinton administration s handling of three international crisis situations Using case studies of Bosnia Haiti and the alleged North Korean nuclear buildup in 1993 he examines contemporary presidential crisis communication and the agenda setting and agenda extension functions of the press The importance of this study lies in its timeliness President Clinton is the first atomic age president not to have the Cold War meta narrative to use in legitimating international crises Prior studies in presidential crisis rhetoric found that the president received broad and consistent support during times of crisis Kuypers found that the press often advanced an oppositional frame to that used by the Clinton administration The press frames were found to limit the options of the President even when the press supported a particular presidential strategy This is a major study that will be of interest to scholars and researchers of the press the modern presidency and American foreign policy      **Presidents in Crisis** Michael Bohn, 2016-03-01 Every American president when faced with a crisis longs to take bold and decisive action When American lives or vital interests are at stake the public and especially the news media and political opponents expect aggressive leadership But contrary to the dramatizations of Hollywood rarely does a president have that option In *Presidents in Crisis* a former director of the Situation Room takes the reader inside the White House during seventeen grave international emergencies handled by the presidents from Truman to Obama from North Korea s invasion of South Korea to the revolutions of the Arab Spring and from the thirteen days of the Cuban Missile Crisis to the taking of American diplomats hostage in Iran and George W Bush s response to the attacks of September 11 2001 In narratives that convey the drama of unfolding events and the stakes of confrontation when a misstep can mean catastrophe he walks us step by step through each crisis Laying out the key players and personalities and the moral and political calculations that the leaders have had to make he provides a fascinating insider s look at modern presidential decision making and the fundamental role in it of human frailty      **Terrorism and the Media** Brigitte Lebens Nacos, 1994 Exploring the recent increase in anti American terrorism this updated study argues that terrorist groups are now exploiting the link between the media and public opinion polls particularly regarding the popularity of American presidents in order to publ      *FDR and the News Media* Betty Houchin Winfield, 1994 Power was at the heart of FDR s relationship with the media the power of the nation s chief executive to control his public messages versus the power of the free press to act as an independent watchdog over the president and the government This compelling study points to Roosevelt s consummate

news management as a key to his political artistry and leadership legacy      When Presidents Lie Eric Alterman, 2005-10  
Assesses the impact of governmental and presidential lies on American culture revealing how such lies become ever more complex and how such deception creates problems far more serious than those lied about in the beginning      The Presidency and the Rhetoric of Foreign Crisis Denise M. Bostdorff, 1994 The Presidency and the Rhetoric of Foreign Crisis examines presidential crisis management or the way U S presidents portray foreign crises to the American public as a potent tool for the accumulation and at times the forfeiture of political power Arguing that it is largely through presidential communication that foreign crises become real for American citizens Bostdorff does not claim that presidents fabricate crises but rather that they vigorously advance their version of the crisis to the American public in order to rally support for their foreign policies Bostdorff contends that presidential language can heighten the significance of events that otherwise would attract little public attention such as a coup on the tiny Caribbean island of Grenada and thereby persuade citizens to support U S military intervention and to view the commander in chief as a decisive victorious leader To prove her assertions Bostdorff presents case studies from six successive administrations Beginning with Kennedy and the Cuban missile crisis of 1962 she examines Johnson and the Gulf of Tonkin Nixon and Cambodia Ford and the Mayaguez Carter and Iran and Reagan and Grenada Concluding with an evaluation of Bush and Panama Bostdorff identifies the recurring themes that defined crisis rhetoric explains how that rhetoric encourages particular public reactions and raises disturbing questions about the implications for the American polity      Clash Jon Marshall, 2022-05 Finalist for the AEJMC James A Tankard Book Award  
Donald Trump s presidency was marked by angry attacks on journalists an extraordinary ability to capture the media spotlight a flood of disinformation from the White House and bitter partisanship reflected in the media Trump s dysfunctional relationship with the press affected how the United States dealt with the crises of COVID 19 climate change social unrest due to systemic racism and efforts to overturn the 2020 election But Trump s troubled relationship with the press didn t happen by chance Clash explores the political economic social and technological forces that have shaped the relationship between U S presidents and the press during times of crisis In addition to Trump s presidency Clash examines those of John Adams Abraham Lincoln Woodrow Wilson Franklin Roosevelt Richard Nixon Ronald Reagan Bill Clinton George W Bush and Barack Obama Some of these presidents faced military or international crises Others were challenged by economic downturns or political scandals And sometimes the survival of America s system of government was at stake By examining what happened between presidents and the press during these pivotal times Clash helps us understand how we arrived at our current troubled state of affairs It concludes with recommendations for strengthening the role the press plays in keeping presidents accountable      The Modern Presidency and Crisis Rhetoric Amos Kiewe, 1994 This volume examines how presidents from Truman to Bush rhetorically approached and managed political military judicial legislative and economic crises during their presidencies Editor Amos Kiewe assembles new essays by communications scholars who look at rhetoric initiated during

national crises and account for various rhetorical developments affected by crises changes in presidential rhetoric and rhetorical and situational crisis constraints Their studies suggest similarities in rhetoric in different types of crises and yield resources for postulating patterns of crisis rhetoric Each chapter's author presents a crisis rhetoric case study analyzing initial strategies and tactics shifts in rhetorical tactics adjustments of discourse to particular phases in the crises and unique rhetorical approaches designed to accommodate unexpected turns of events The contributors discuss how presidents use rhetorical inventions flip flops face saving posturing and even silence to diffuse crises Specific topics include Eisenhower's response to the constitutional crisis in Little Rock Kennedy and the Berlin Wall crisis Johnson and the Kennedy assassination Nixon and Watergate and Bush and the Persian Gulf Crisis Recommended for political scientists and communication theorists

Presidents, Secretaries Of State, And Crises In U.s. Foreign Relations Lawrence Falkowski, 2019-06-21 This book presents a new approach to analyzing the impact of individuals on U S foreign policy and reports the results of this analysis for all post World War II presidents and secretaries of state including President Carter and Secretary of State Vance Its compelling but fundamentally simple theme suggests that it may be unnecessary to adopt traditional models of psychology in order to predict the behavior of foreign policy decision makers Earlier studies based on these models are either too judgmental to be predictively useful or too abstract to be relevant to the policy process itself In contrast the underlying assumption here is that the information necessary to make accurate predictions is more easily obtainable and understandable than once thought The methods employed to test Dr Falkowski's predictive model are easy to understand and to replicate The results indicate a strong relationship between variations in the memories of leaders and their abilities to adopt flexible courses of action when faced with crisis situations This relationship exists for all presidents and secretaries of state studied suggesting that it is possible to predict the behavior of new or potential leaders before they are faced with crisis decisions The implications of these results are far reaching and might be directly applicable to the selection of new leaders
