Pressing Questions Issue 2:

Demoralizing Violence Ezio Di Nucci, 2025-06-12 Is non violence oppressive This book argues that non violent ethics keeps minoritized peoples down and helps the bourgeoisie tolerate structural injustice Like sex violence needs de moralizing in order to fulfil its emancipatory potential Social injustice and global inequality will not deprive the privileged of their sleep if radical measures are morally ruled out from the start And the ethics of non violence robs the working classes of one of the few mechanisms they have left to help them cope with our increasingly digitalized bureaucracies developed around the needs of highly educated urban classes There is not just the normative obvious point that it is not fair to deprive the oppressed of one of the only resources they have left it is also that it isn't surprising that the bourgeoisie would settle on a non violent ethics since that happens to prop up their privileged position while at the same time soothing their precious conscience capital with a soul The book defends three overall claims first non violence is oppressive in the traditional feminist sense of keeping people down second non violence helps the bourgeoisie tolerate structural injustice and thirdly that access to violent means is not distributed fairly across gender or race for example Diversity And Difference In Early Childhood Education: Issues For Theory And Practice Robinson, Kerry, Jones Diaz, Criss, 2005-12-01 Early childhood professionals are often required to work with children and families from a range of diverse backgrounds This book gives an overview of relevant social theories such as post structuralism cultural studies post colonialism feminist perspectives and queer theory

The Rise and Fall of Scottish Common Sense Realism Douglas McDermid, 2018-03-09 The Rise and Fall of Scottish Common Sense Realism examines the ways in which five Scottish philosophers Lord Kames 1696 1782 Thomas Reid 1710 1796 Dugald Stewart 1753 1828 Sir William Hamilton 1788 1856 and James Frederick Ferrier 1808 1864 tackled a problem which has haunted Western philosophy ever since Descartes that of determining whether any form of perceptual realism is defensible or whether the very idea of a material world existing independently of perception and thought is more trouble than it is worth This century long conversation about the relation between mind and world led these five Scots to think uncommonly hard about a host of challenging issues in epistemology metaphysics philosophy of mind and meta philosophy In order to present each philosopher's views in a fair and reasonably charitable light Douglas McDermid has tried to identify the main problems each was attempting to solve to relate his work to that of his predecessors where possible to describe the mistakes real or perceived he was particularly anxious to correct to explain the internal logic of his position and to discuss some of the main objections which he anticipated and tried to rebut McDermid's hope is that even seasoned students of the realism controversy may learn something new and valuable from this exercise if only because he has chosen to focus not on the usual suspects Descartes Locke Berkeley Hume and Kant but on a fresh and undervalued cast of characters **Manual**

Anke Bartels,Lars Eckstein,Nicole Waller,Dirk Wiemann,2017-02-13 Postcolonial Justice addresses a major issue in current postcolonial theory and beyond namely the question of how to reconcile an ethics grounded in the reciprocal acknowledgment of diversity and difference with the normative if not universal thrust that appears to energize any notion of justice The concept of postcolonial justice shared by the essays in this volume carries an unwavering commitment to difference within and beyond Europe while equally rejecting radical cultural essentialisms which refuse to engage in utopian ideals of convivial exchange across a plurality of subject positions Such utopian ideals can no longer claim universal validity as in the tradition of the European enlightenment instead they are bound to local frames of speaking from which they project world Marine Mammal Ecology and Conservation Ian L. Boyd,W. Don Bowen,Sara J. Iverson,2010-08-12 Marine mammals command a high level of public attention reflected in specific legislation for their protection and management in many countries They also present particular challenges to ecologists and conservation biologists They are mostly difficult to observe they occupy an environment that is vast in its three dimensional extent there are often perceived conflicts between marine mammals and people and furthermore several species are now close to extinction Marine mammals have some intriguing features in their biology the ability to dive to crushing depths to perform breath hold dives that defy our current understanding of mammalian physiology and many have an ability to hunt down prey using sophisticated sonar that we are only just beginning to understand Many species also have complex social structures We still have much to learn about these extraordinary animals so a comprehensive and authoritative overview of current methodology is now timely The intention of this book is both to summarize the state of the art and to encourage innovation and further progress in this research field
