People in Crisis Lee Ann Hoff, Lisa Brown, Miracle R. Hoff, 2011-02-25 The first edition of People in Crisis published in 1978 established success as a comprehensive and user friendly text for health and social service professionals The book and its following incarnations included critical life events and life cycle transition challenges clearly pointing out the interconnections between such events stressful developmental changes and their potential for growth but also danger of suicide and or violence toward others This revised edition includes new case examples and expanded coverage of cross cultural content including commonalities and differences in origins manifestations and crisis responses The authors illustrate the application of crisis concepts assessment and intervention strategies across a wide range of health and mental health settings as well as at home school workplace and in the community Each chapter contains a closing summary that includes discussion questions references and online data sources for maximum application and learning Updated chapters discuss new research based content on workplace violence and abuse youth violence in schools and higher education settings the use of psychotropic drugs including for very young children in the absence of comprehensive assessment the crisis vulnerability of war veterans and the hazards of pathologizing what should be considered a normal response to the repeated and catastrophic trauma of war the intersection of socio political factors with individuals psychological healing from catastrophic experiences such as war and natural disaster **Crisis** Lee Ann Hoff, 2014-08-29 Unlike books focusing on a single crisis topic Crisis helps recognize common signs of endangerment across a range of life challenges by showing the interconnections between various harmful events Through media coverage of school shootings suicides domestic abuse workplace violence and more we ve become accustomed to hearing about violence and trauma almost invariably followed by reports that show all of the warning signs that were missed While it is impossible to predict when where and with whom a crisis will occur we do have the means to be better equipped to intervene in stressful situations before they tip over into a crisis Important preventative information is readily available and this book better prepares us to take appropriate responsive action Often a crisis is the result of a critical life event whether or not a life changing event turns into a crisis depends on the type timing and interpretation of the event the person's life cycle development phase history of healthy coping and available timely support In sum Lee Ann Hoff illustrates how to recognize crisis as both danger and opportunity The more we know about how to spot a potential crisis and what to do the more likely distressed persons will get the help they need
