Pro Of Creative Political Leaders:

The Oxford Handbook of Political Leadership R. A. W. Rhodes, Paul 't Hart, 2014-05-29 Political leadership has made a comeback It was studied intensively not only by political scientists but also by political sociologists and psychologists Sovietologists political anthropologists and by scholars in comparative and development studies from the 1940s to the 1970s Thereafter the field lost its way with the rise of structuralism neo institutionalism and rational choice approaches to the study of politics government and governance Recently however students of politics have returned to studying the role of individual leaders and the exercise of leadership to explain political outcomes The list of topics is nigh endless elections conflict management public policy government popularity development governance networks and regional integration In the media age leaders are presented and stage managed spun DDLas the solution to almost every social problem Through the mass media and the Internet citizens and professional observers follow the rise impact and fall of senior political officeholders at closer quarters than ever before This Handbook encapsulates the resurgence by asking where are we today It orders the multidisciplinary field by identifying the distinct and distinctive contributions of the disciplines It meets the urgent need to take stock It brings together scholars from around the world encouraging a comparative perspective to provide a comprehensive coverage of all the major disciplines methods and regions It showcases both the normative and empirical traditions in political leadership studies and juxtaposes behavioural institutional and interpretive approaches It covers formal office based as well as informal emergent political leadership and in both democratic and undemocratic polities

The Sustaining Hand Bryan D. Jones, Lynn W. Bachelor, 1993 The Primacy of Persons in Politics John von Heyking, Thomas W. Heilke, 2013 What is the nature of political activity This question has vexed political thinkers since Plato wrote *Statesman* and remains challenging today Contemporary intellectual categories obstruct individuals from understanding politics as a distinct species of activity with its own realm of expertise modes and ends Instead politics is poorly directed by notions of achieving a complete or final end of affairs It tends to be conflated with other types of activities and realms of life including economics power seeking and law and procedure As a result politics often is untethered from morality Taking as their departure point the political philosophical analyses of German scholar Tilo Schabert the philosophical and empirical essays in this volume invite the reader to move beyond the sterile dichotomy of political activity as either pure will or as folded into a more manageable activity The contributors argue that politics is a highly creative human activity that eludes capture within a final and static analytical framework concluding that ethical political action is indeed part of the essence of politics ABOUT THE EDITORS John von Heyking professor of political science at the University of Lethbridge Alberta Canada is author of *Augustine and Politics as Longing in the World* and *Friendship and Politics Essays in Political Thought* and editor of two volumes in the *Collected Works of Eric Voegelin* series Thomas Heilke is professor of political science and director of the Center for Global and International Studies at the University of Kansas His many

published works include *From Ideologies to Public Philosophies* and *Great Ideas Great Schemes Political Ideologies in the 19th and 20th Centuries*. Besides the editors the contributors are Dan Avnon, Toivo Koivukoski, András L. Naczi, Erik Neveu, Tilo Schabert, David E. Tabachnick and Alexander Thumfart. PRAISE FOR THE BOOK: This is precisely the sort of book that all political scientists should read. Tilo Schabert's work and the elaboration of it in this volume offers theoretical tools for understanding the world of politics that are missing from the positivist approach. Not only will this affirm the usefulness of political theory to non political theorists it might also remind political theorists themselves to re engage the empirical aspect of their own vocation. This volume is a testament to the continued salience of political theory and should be required reading for all those who aspire to a career in the discipline. Richard Avramenko, assistant professor of political science, University of Wisconsin-Madison.

Interactive Political Leadership, Eva Sørensen, 2020-01-09. Building on recent theories of interactive governance and political leadership, *Interactive Political Leadership* develops a concept of interactive political leadership and a theoretical framework for studying the role of elected politicians in the age of governance. The purpose of the theoretical framework is to inspire and guide empirical research into how elected politicians perform political leadership in a society where citizens and other stakeholders play an active role in making and implementing political decisions and what barriers, challenges and dilemmas they encounter in relation to the performance of interactive political leadership. The research framework draws extensively on recent theories of interactive governance and political leadership and other new developments in political science and public administration research. Moreover, it finds inspiration in current tendencies and embryonic examples of interactive political leadership performed by elected politicians operating at different levels of governance in Western liberal democracies. The basic assumption is that political legitimacy is essential for the survival of a political system and that interactive political leadership stands out as a promising way of securing what political scientists denote as input, throughput, output and outcome legitimacy in the age of governance. Hence, interactive political leadership aims to establish a bridge between representative democracy and emergent forms of political participation to promote political learning and accountability to strengthen the political entrepreneurship of elected politicians and to advance the political system's implementation capacity through resource mobilization. The book develops 20 propositions that sets the agenda for a new and much needed field of empirical research into political leadership in the age of governance.

Concepts for Air Force Leadership, 1990. The Vertical Mosaic, John Porter, 2015-05-07. Sociologist Irving Louis Horowitz described it as the sociological study of present day Canada.
