Quickening Of America Rebuilding Our Nation Remaking Our Lives:

The Quickening of America Frances Moore Lappe, Paul Martin Du Bois, 1994-04 Change is the watchword of the nineties Ordinary Americans are coming together to change their workplaces their communities their schools and their lives This deeply personal inspiring and interactive book is full of practical advice on how to get involved **The End of the Hamptons** Corey Dolgon, 2005-05-01 Winner of the 2005 Book Prize from the Association for Humanist Sociology A portrait of the contentious controversial history of the Manhattan elite s favorite fabled summer playground In this absorbing account of New York s famous vacation playground Corey Dolgon goes beyond the celebrity tales and polo games to tell us the story of this complex and contentious land From the displacement of Native Americans by the Puritans to the first wave of Manhattan elites who built the Summer Colony to the current infusion of telecommuting Manhattanites who now want to live there year round the story of the Hamptons is a vicious cycle of supposed paradise lost Drawing on this fabled land s history **The End of the Hamptons** provides a fascinating portrait of current controversies the Native Americans fighting over land claims and threatening to build a casino the environmental activists clashing with the McMansion builders and the Latino day laborers and working class natives trying to eke out a living in an ever increasingly expensive town **Toward a Civil Society C.** David Lisman, 1998-08-30 Addressing the need for marshaling the resources of education to help promote a more civil society this book argues that education has a critical role to play in challenging the dominant views of politics and education Service learning or academically based community service is seen as a promising educational pedagogy that can help students acquire civic virtue and serve as a mechanism to enable institutions of higher education become stronger community partners However there is currently a lack of theoretical grounding for the service learning movement consequently service learning is in danger of being co opted by academic traditionalism which could vitiate service learning s social transformative potential and in fact undermine efforts at democratic revitalization The author provides a basic explanation of service learning and how it is connected to promoting civic virtue It examines the underlying public philosophy debate between weak and strong democracy theorists or procedural and civic republicanism This book argues that certain approaches to service learning such as the voluntarist or charity model the experiential education model and the justice model are ineffective because of their association with weak democracy theory or procedural republicanism The central argument of this book is that a progressive communitarian public philosophy maintaining that individuals attain meaning and significance in the context of community is the most appropriate grounding for service learning **Sovereigns Peacefully Take Charge** Allan Matthews, 2006-01-12 Reviewing how we the people became sovereigns this book encourages citizens to become peaceful activists to supplement representative government The author declares seventy five grievances against the United States government He proposes or endorses remedies in the forms of constitutional amendments or ordinary statutory law some of them of popular initiative and referendum Much of this entails transfer of powers from the national

government back to the people or to local state or transnational governments The proposals include reforms at the United Nations and measures to end world poverty spread health care and education and manage resources for a sustainable environment **AmeriCorps*Vista Source** ,1998 Emotionally Intelligent Leadership for Students Marcy L. Creating Sustainable Community Programs Mark R. Daniels,2001-02-28 Public opinion polls consistently reveal the lack of confidence disillusionment and mistrust that citizens feel toward government Daniels and his contributors believe that the relationship between citizens and their governments can be changed by facilitating greater citizen collaboration with government particularly through local sustainable programs As the case studies show often sustainable community programs are created through grassroots movements that are initiated and managed by citizens themselves bringing them in contact with their local elected and appointed officials Unlike traditional programs that are administered by local officials on behalf of their citizens once sustainable community programs are created citizens administer their own programs in collaboration with local officials The case studies look at a variety of sustainable programs primarily in the United States that help to deal with issues such as recycling transportation microcredit site redevelopment pollution health care and hunger Creating Sustainable Community Programs is the first book on sustainable programs that is intended for an audience of public administration scholars researchers and students as well as practitioners who are searching for ways to change the relationship between citizens and their governments
