Making Master Guitars Roy Courttnall, 1993-08-01 Making Master

Guitars is a craftsman's handbook about the exciting and challenging pursuit of making classical guitars a craft that the author reveals to be surprisingly accessible by following his instructions. The book is unique in that it includes nine separate detailed plans of instruments constructed by internationally famous guitar makers. The author has had the rare opportunity of examining these instruments in detail and has made many replicas of each one. Superbly illustrated by Adrian Lucas. Part one: The Master Makers and their Guitars is devoted to separate chapters on each famous maker including Antonio de Torres, Hermann Hauser, Santos Hernandez y Aguado, Ignacio Fleta, Robert Bouchet, Daniel Friederich, and Jose Romanillos. The reader will find historical information about the life of and influences on each maker, as well as detailed sets of working drawings for their guitars. Also included are rare photographs of the guitars. Part two: Workshop Tools and Materials provides essential information about the tools, working environment, and material needed by the guitar maker. Part three: Guitar Construction. The Spanish Method comprises a step-by-step method of guitar construction illustrated by numerous photographs and drawings. The method of making a guitar is presented with great clarity so that even the newcomer to this fascinating craft will be able to produce a superb instrument. This book will be essential for the guitar maker and the historian, providing as it does a unique record of the different methods of guitar design and strutting systems that have evolved since Antonio de Torres first defined the essential characteristics of the modern classical guitar in the 1850s. *The Natural History of the Traditional Quilt* John Forrest, Deborah Blincoe, 2011-01-19. Traditional quilts serve many purposes over the course of a useful life. Beginning as a beautiful bed covering, a quilt may later function as a ground cover at picnics until years of wear relegate it to someone's ragbag for scrap uses. Observing this life cycle led authors John Forrest and Deborah Blincoe to the idea that quilts like living things have a natural history that can be studied scientifically. They explore that natural history through an examination of the taxonomy, morphology, behavior, and ecology of quilts in their native environment, the homes of humans who make use, keep, and bestow them. The taxonomy proposed by Forrest and Blincoe is rooted in the mechanics of replicating quilts so that it can be used to understand evolutionary and genetic relationships between quilt types. The morphology section anatomizes normal and abnormal physical features of quilts while the section on conception and birth in the life cycle discusses how the underlying processes of replication intersect with environmental factors to produce tangible objects. This methodology is applicable to many kinds of crafts and will be of wide interest to students of folklore, anthropology, and art history. Case studies of traditional quilts and their makers in the Catskills and Appalachia add a warm human dimension to the book. **Quilt Designs from the Thirties** Sara Nephew, 1994-01-01. Includes a brief history of 1930s quilting, designs, reliable information on how to identify, authenticate, clean, and repair quilts, a special section highlighting 13 quilt makers of the 1930s with examples of their work and patterns for 13 quilt blocks. *American Quilts* Robert Shaw, 2009. This photographed book covers the historical panorama of quiltmaking in the United States from the quintessential patterns to their cultural significance. Book jacket.
