Why? Charles Tilly,2012-08-23 An eminently readable and interesting analysis of the four basic reasons people give to explain events or behaviors Library Journal In the tradition of the legendary sociologist Erving Goffman Tilly seeks to decode the structure of everyday social interaction and the result is a book that forces readers to reexamine everything from the way they talk to their children to the way they argue about politics Malcolm Gladwell New Yorker Why is a book about the explanations we give and how we give them a fascinating look at the way the reasons we offer every day are dictated by and help constitute social relationships Written in an easy to read style by distinguished social historian Charles Tilly the book explores the manner in which people claim establish negotiate repair rework or terminate relations with others through the

reasons they give Tilly examines a number of different types of reason giving For example he shows how an air traffic controller would explain the near miss of two aircraft in several different ways depending upon the intended audience for an acquaintance at a cocktail party he might shrug it off by saying This happens all the time or offer a chatty colloquial rendition of what transpired for a colleague at work he would venture a longer more technical explanation and for a formal report for his division head he would provide an exhaustive detailed account Tilly demonstrates that reasons fall into four different categories Convention I m sorry I spilled my coffee I m such a klutz Narratives My friend betrayed me because she was jealous of my sister Technical cause effect accounts A short circuit in the ignition system caused the engine rotors to fail Codes or workplace jargon We can t turn over the records We re bound by statute 369 Tilly illustrates his topic by showing how a variety of people gave reasons for the 9 11 attacks He also demonstrates how those who work with one sort of reason frequently convert it into another sort For example a doctor might understand an illness using the technical language of biochemistry but explain it to his patient who knows nothing of biochemistry by using conventions and stories Replete with sparkling anecdotes about everyday social experiences including the author s own Why makes the case for stories as one of the great human inventions

**Living within a Fair Share Ecological Footprint** Robert Vale, Brenda Vale, 2013-09-02 According to many authorities the impact of humanity on the earth is already overshooting the earth s capacity to supply humanity s needs This is an unsustainable position This book does not focus on the problem but on the solution by showing what it is like to live within a fair earth share ecological footprint The authors describe numerical methods used to calculate this concentrating on low or no cost behaviour change rather than on potentially expensive technological innovation They show what people need to do now in regions where their current lifestyle means they are living beyond their ecological means such as in Europe North America and Australasia The calculations focus on outcomes rather than on detailed discussion of the methods used The main objective is to show that living with a reduced ecological footprint is both possible and not so very different from the way most people currently live in the west The book clearly demonstrates that change in behaviour now will avoid some very challenging problems in the future The emphasis is on workable practical and sustainable solutions based on quantified research rather than on generalities about overall problems facing humanity

**Sociocultural Perspectives on Youth Ethical Consumerism** Giuliano Reis, Michael Mueller, Rachel Gisewhite, Luiz Siveres, Renato Brito, 2017-11-07 This exciting new book advances current practice based and theoretical knowledge around how youth

defines and engages with consumerism to provoke a larger conversation within science and environmental education. It is also geared towards unveiling those literacy praxes that can assist youth to adopt more ethically oriented consumerist habits. More specifically, this book studies how youth's participation in the global consumer market intersects with media technologies, new literacies, as well as science and the environment from sociocultural perspectives. In addition, it considers how school science has mediated youth participation in hyper consumerism from food and technology to shelter and transportation. This important and timely book is a must read for those interested in topics such as critical youth studies, critical media literacy, STEM arts based research, STSE education, citizenship education, cultural studies, policy studies, curriculum studies, socio-scientific issues, technology, sustainability, food studies, social justice, poverty, and consumer behaviour. A wide range of science, technology, and environmental educators from Australia, Brazil, Canada, Netherlands, and the United States have combined their perspectives to produce this exciting, innovative, timely, and important book. It should be essential reading for all teachers, teacher educators, and curriculum developers keen to address key issues raised by a commitment to assist students in refining their understanding of what constitutes socially, culturally, ethically, and politically responsible consumer practices and supporting them in formulating and engaging in effective individual and collective action.

Derek Hodson, Emeritus Professor of Science Education, Ontario Institute for Studies in Education (OISE), University of Toronto  
 Professor of Science Education at The University of Auckland, New Zealand, and Founding Editor of the Canadian Journal of Science, Mathematics, and Technology Education (CJSMTE). The authors in the book deconstruct and analyse intricate economic, sociopolitical, and affective networks that are behind the cycles of production, distribution, and consumption of objects that are present in youngsters' daily lives and their attitudes towards them. Apart from breaking new ground by proposing and discussing socioculturally informed research about the topic, the book connects with pedagogical approaches that value critical perspectives on the nature of the relationship between science, technology, society, and environment. It is a must read for both researchers and practitioners interested in issues related to sustainability and citizenship education.

**The Quotable George W. Bush** Bill Adler, 2011-05-13 I want you to tell your children that when they hear all the talk and all the speculation and all the thousands of hours of so-called experts babbling away about this or the other, that the true policy of this government is to achieve peace for generations to come. And we can show the world the true face of America as well. Oh, it's a diverse face, no question about it, which is our strength, not our weakness. But it's a face that can be bound by common goals and common values. It's a face that can stand squarely in the face of evil by the collective acts of people doing good in America. You've read the Bushisms, but here is another portrait of the man and the politician. Long before then Governor of Texas, George W. Bush ran for the presidency; he was acknowledged

by the media as someone who could be counted on to provide memorable quotes seemingly without much effort. Instead of focusing on the malapropisms and verbal stumblings for which this Bush is most infamous, *The Quotable George W. Bush* offers illuminating insights into the ideals, political and social philosophy, and leadership agenda of one of our most decisive straightforward presidents. This book is the closest thing we have to a living memoir of the important years of President Bush's life, and it presents a true portrait of the man. The audience for *The Quotable George W. Bush* includes stalwart Republicans, conservatives, and the voting majority that consistently gives the president high marks and supports his administration without question. ***The Believer*, 2003      *Journal of East Asian Libraries*, 2003      **Forthcoming Books** Rose Army, 2002-04      □□ □□ □□ □□, 2025-08-04 21 9 11      *The Italian 100* Stephen J. Spignesi, 2003. An invaluable addition to the Citadel 100 series that ranks the most prominent Italian figures in history from the Chairman of the Board to the Mayor of New York City. Now more than ever, Americans have entered into a passionate love affair with all things Italian, from the world-changing adventures of Christopher Columbus to the drama of opera to Italian cinema to the epic family saga of *The Sopranos*. *The Italian 100* chronicles the rich legacy of Italians and Italian Americans in a ranking of the most influential 100 and the enduring nature of their contributions. The giants who immeasurably changed the size and shape of our world: Galileo ranked 1, Christopher Columbus 2, and Marconi 3, grace the top of the list, while artistic and literary giants such as Michaelangelo, Leonardo da Vinci, Botticelli, Petrarch, and Dante feature prominently. Also profiled are the brilliant and sometimes despotic political leaders such as Niccolò Machiavelli, Lorenzo de' Medici, Garibaldi, Rudolph Giuliani, and Benito Mussolini, and geniuses of music, theater, and film such as Vivaldi, Puccini, Pavarotti, Fellini, Scorsese, and Sinatra. *The Italian 100* also highlights less familiar figures who have left legacies of equal magnitude, such as Guido of Arezzo, who invented the musical staff; Leonardo Fibonacci, who introduced Arabic numerals to the Western world; Saint Fabiola, the Roman matron credited with cofounding the first public hospital in Western Europe; and Bartolommeo Cristofori, inventor of the modern piano. Part cultural companion, part historical reference, and part celebration, *The Italian 100* is a fresh and sometimes controversial look at a people who throughout more than fifteen centuries have had an enormous and profound effect on every aspect of the modern world. ***The Quotable John Wayne*, 2019-08-09** Perhaps best known for his classic movie lines such as "Fill your hands, you sons of bitches," from *True Grit*, the late actor John Wayne often displayed a spontaneous and biting wit when away from the screen as well. When a reporter from the *Harvard Crimson* sarcastically asked Wayne if he looked at himself as an American Legend, for example, the Duke replied, "Well, not being a Harvard man, I don't look at myself any more than necessary." ***Five Families*** Selwyn Raab, 2014-05-13. The New York Times bestseller chronicling the history of NYC's infamous five mafia families is now the basis for the upcoming The HISTORY Channel documentary series *American Godfathers: The Five Families*. Genovese, Gambino, Bonnano, Colombo, and Lucchese. For decades, these Five Families ruled New York and built the American Mafia, or Cosa Nostra, into an underworld empire. Today, the Mafia is an endangered species.**

battered and beleaguered by aggressive investigators incompetent leadership betrayals and generational changes that produced violent and unreliable leaders and recruits A twenty year assault against the five families in particular blossomed into the most successful law enforcement campaign of the last century Selwyn Raab's Five Families is the vivid story of the rise and fall of New York's premier dons from Lucky Luciano to Paul Castellano to John Gotti and more The book also brings the reader right up to the possible resurgence of the Mafia as the FBI and local law enforcement agencies turn their attention to homeland security and away from organized crime New York Magazine, 1987-07-13 New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country With award winning writing and photography covering everything from politics and food to theater and fashion the magazine's consistent mission has been to reflect back to its audience the energy and excitement of the city itself while celebrating New York as both a place and an idea **The New York Times Index**, 2002
