Brinker, **Analysis Techniques for Racecar Data Acquisition** Jorge Sergers,2014-02-24 Racecar data acquisition used to be limited to well funded teams in high profile championships Today the cost of electronics has decreased dramatically making them available to everyone But the cost of any data acquisition system is a waste of money if the recorded data is not interpreted correctly This book updated from the best selling 2008 edition contains techniques for analyzing data recorded by any vehicle s data acquisition system It details how to measure the performance of the vehicle and driver what can be learned from it and how this information can be used to advantage next time the vehicle hits the track Such information is invaluable to racing engineers and managers race teams and racing data analysts in all motorsports Whether measuring the performance of a Formula One racecar or that of a road legal street car on the local drag strip the dynamics of vehicles and their drivers remain the same Identical analysis techniques apply Some race series have restricted data logging to decrease the team s running budgets In these cases it is extremely important that a maximum of information is extracted and interpreted from the hardware at hand A team that uses data more efficiently will have an edge over the competition However the ever decreasing cost of electronics makes advanced sensors and logging capabilities more accessible for everybody With this comes the risk of information overload Techniques are needed to help draw the right conclusions quickly from very large data sets In addition to updates throughout this new edition contains three new chapters one on techniques for analyzing tire performance one that provides an introduction to metric driven analysis a technique that is used throughout the book and another that explains what kind of information the data contains about the track Win from the Back: Memoirs of a Racecar Mechanic Carla,Jeff,Lew,Chad Parks,2011-11-08 This is a mechanics story Lew has worked on a variety or cars and racecars though out his career This is also the story of a little boy who used to listen to the Indianapolis 500 on the radio in his little hometown in Pennsylvania and dream about going there This is the story of a man whos dream came true when he walked through the gates of the Indianapolis Speedway for the first time in 1970 It is also the story of a family their friends and a lifestyle Lews wife Joan always said Life with Lew has been interesting I never knew what to expect That is the truth **Developments in Modern Racecar Driver Crash Protection and Safety** John Melvin,J Kirk Russell,2013-10-14 For many years the evolution of safety improvements in motorsports was

the result of a combination of science and perceived safe practices Most safety developments were not based on rigorous laboratory testing but rather on intuition and a let's try it and see what happens approach During the last few decades motorsports has benefited from the organized research efforts made possible by academia manufacturers and sanctioning bodies leading to present day motorsports safety methodologies based on solid data and testing This compendium edited by some of the foremost racing safety experts comprises selected technical papers that document the development and implementation of key motorsports safety technologies now in use It is intended to provide racing professionals and enthusiasts with a concise overview of the significant engineering developments in motorsports driver safety that has occurred during the past two decades The 13 papers chosen for this compendium published between 1990 and 2013 reflect landmark safety studies and developments of that time Eleven of the papers were published by SAE International and two were presented at the Stapp Car Crash Conference The papers cover the following topics Crash testing simulations Human crash injury and survival Reducing driver injury in severe crashes Head and neck restraints including the HANS device Race car seats Restraint systems Track safety and barrier systems The final paper is a study on the detailed performance of restraint systems and seats in examples of severe stock car crashes The paper represents a succinct example of modern crash investigation of racing crashes with crash recording data detailed injury analysis and protective system performance The progress in motorsports safety as described in this compendium has been dramatically effective in reducing driver injuries at the top levels of motorsports Unfortunately this is not true at the lower levels where drivers continue to suffer preventable injuries and fatalities Racecar Drivers and What They Do Liesbet Slegers, 2017-08-01
